principles of management quizlet: The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II - Volumes 1 & 2 - of this series, is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what, in fact, impacts and modifies the environment or reality and what are the factors behind that dynamics. What impacts and modifies the environment is science. This Volume 2 starts by showing how technology plays an important role in scientific progress. Although the relationship between the two is symbiotic, science can exist without technology but technology desperately needs science. Military technology is an example of how technology can help science advance. Some military inventions end up having civilian use. Science being at the center of society, the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science. Politics, says the author, influences science because of uncertainty in science, and economics does it thanks to the availability of money to scholars and scientists for their research. On the other hand, government also influences scientific progress through regulations. The book gives cyberspace regulation as an example. Furthermore, by showing how art influences science, the author really argues for the polyfactorial aspect of scientific progress. In that line of thought, he goes on to also prove that factors such as skepticism, curiosity, and the quest for knowledge greatly influence the advancement of science. That, says the author, "is a ninety-degree turn ... By ending Part two that way, I wanted to, somehow, link it to Part I, which argues that reality starts from within."

principles of management quizlet: Les réalités de la 'réalité' - deuxième partie: Vers une compréhension des facteurs responsables des progrès de la science moderne (Volume 2) Fritz Dufour, MBA' DÉSS, 2019-03-23 La différence entre la première partie et la deuxième partie - volumes 1 et 2 - de cette série est que, dans la première partie, l'auteur a montré comment ce que nous appelons la réalité commence avec le moi intérieur, alors que la deuxième partie décrit ce qui, en réalité, affecte et modifie l'environnement ou la réalité et quels sont les facteurs derrière cette dynamique. Ce qui impacte et modifie l'environnement, c'est la science. Ce volume 2 commence par montrer comment la technologie joue un rôle important dans les progrès scientifiques. Bien que la relation entre les deux soit symbiotique, la science peut exister sans technologie, mais la technologie a désespérément besoin de la science. La technologie militaire est un exemple de la manière dont la technologie peut faire progresser la science. Certaines inventions militaires finissent par avoir un usage civil. La science étant au centre de la société, le livre plaide en faveur de l'impact direct de sciences sociales telles que la politique et l'économie sur le progrès de la science. La politique, dit l'auteur, influence la science en raison de l'incertitude de la science, et l'économie le fait grâce à la disponibilité de fonds pour les chercheurs et les scientifiques. D'autre part, le gouvernement influence également le progrès scientifique par le biais de réglementations. Le livre donne comme exemple la régulation du cyberspace. En outre, en montrant comment l'art influence la science, l'auteur plaide en faveur de l'aspect polyfactoriel du progrès scientifique. Dans cette optique, il prouve également que des facteurs tels que le scepticisme, la curiosité et la quête du savoir influencent grandement le progrès de la science. Cela, dit l'auteur, « est un virage à 90 degrés ... En terminant la partie deux de cette façon, je voulais, d'une manière ou d'une autre, la relier à la première partie, qui affirme que la réalité commence de l'intérieur. »
