**primary source document analysis worksheet:** *Hollywood or History* Scott L. Roberts, Charles J. Elfer, 2018-07-01 Teaching and learning through Hollywood, or commercial, film productions is anything but a new approach and has been something of a mainstay in the classroom for nearly a century. Purposeful and effective instruction through film, however, is not problem-free and there are many challenges that accompany classroom applications of Hollywood motion pictures. In response to the problems and possibilities associated with teaching through film, we have collaboratively developed a collection of practical, classroom-ready lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. We believe that film can serve as a powerful tool in the social studies classroom and, where appropriately utilized, foster critical thinking and civic mindedness. The College, Career, and Civic Life (C3) framework, represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading and writing. We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that this edited book might play a small role in the larger project of supporting practitioners, specifically K-12 teachers of United States history, by offering a collection of classroom-ready tools based on the *Hollywood or History?* strategy and designed to foster historical inquiry through the careful use of historically themed motion pictures. The book consists of K-5 and 6-12 lesson plans addressing the following historical eras (Adapted from: UCLA, National Center for History in Schools).

**primary source document analysis worksheet:** Supporting Reading in Grades 6-12 Sybil M.

Farwell, Nancy L. Teger, 2012-06-11 This book presents a curricular framework for students grades 6–12 that school librarians and teachers can use collaboratively to enhance reading skill development, promote literature appreciation, and motivate young people to incorporate reading into their lives, beyond the required schoolwork. Supporting Reading Grades 6–12: A Guide addresses head-on the disturbing trend of declining leisure reading among students and demonstrates how school librarians can contribute to the development of lifelong reading habits as well as improve students' motivation and test scores. The book provides a comprehensive framework for achieving this: the READS curriculum, which stands for Read as a personal activity; Explore characteristics, history, and awards of creative works; Analyze structure and aesthetic features of creative works; Develop a literary-based product; and Score reading progress. Each of these five components is explained thoroughly, describing how school librarians can encourage students to read as individuals, in groups, and as school communities; support classroom teachers' instruction; and connect students to today's constantly evolving technologies. Used in combination with an inquiry/information-skills model, the READS curriculum enables school librarians to deliver a dynamic, balanced library program that addresses AASL's Standards for the 21st-Century Learner.
