principal speech at graduation ceremony: The Oldest Rule Christopher B. Gilbert, 2014-12-05 This book could save you \$1 million! OK, maybe not but some school districts have spent that much defending themselves (and not always successfully) in First Amendment lawsuits brought by students and their parents. First Amendment litigation is on the rise across the nation, and as any principal who has sat through a deposition in one of those cases can tell you, the raw emotions and zealous anger that fuels such disputes can become a massive distraction from your real job of running a school. *The Oldest Rule* is a comprehensive examination of the different First Amendment issues involving students that public school administrators and attorneys are increasingly facing on daily basis. We will look at such topics as school prayer, dress codes, student threats and cyberbullying, the distribution of literature, the use of public facilities by outside groups, the celebration of religious holidays, and the rise of esoteric religions and their impact in the public

schools. Written by Chris Gilbert, an attorney with over twenty-one years experience advising and representing school districts big and small, urban and rural -- this book combines discussions of the legal standards and key case decisions with practical advice and hypotheticals.

principal speech at graduation ceremony: Achieving Success for New and Aspiring Superintendents Mary Frances Callan, William Levinson, 2011 The authors of this book wrote it for those aspiring to be superintendents, those new to the position and those completing their second or third year and who are looking to the future. What makes their approach unique is the belief that talented people who aspire to be superintendents are far more likely to accomplish that goal and achieve success on the job if they understand the totality of the position. School districts are complex organizations. Providing effective leadership to these organizations requires mastery of a wide array of leadership and organizational skills. Aspiring superintendents with vision and motivation who understand the inherent challenges of the position have a great advantage over those who do not. The book's goal is to provide readers with this advantage. This is why the book covers the full cycle of the first superintendent position: preparation, application and transition, the challenges of the first few years, and the decision to stay or move to another position. Aspiring and new superintendents who read the book will learn about the full range of skills and knowledge needed to succeed. They will be better prepared to be effective superintendents.
