princeton university continuing education: Technology and Adult Learning Adele F. Bane, Amy C. Lear, 1994

princeton university continuing education: Continuing Education in Colleges and Universities: Challenges and Opportunities Ronald White, Frank DiSilvestro, 2013-12-11 These are times of great opportunity and challenge for continuing education (CE) programs in colleges and universities. While lifelong learning remains central to CE's mission, means of promoting and delivering adult education programs through distance and online learning are undergoing tremendous technological transformation. Within institutions, CE units are increasingly collaborating with academic departments. In addition, demographic shifts have resulted in new audiences and types of programs offered, both credit and noncredit. Schools are pressured to increase their participation in economic development. All these changes carry administrative considerations. This volume suggests perspective and solutions for the challenges that must be successfully confronted by today's CE programs and the professionals who develop them. This is the 140th volume of this Jossey-Bass series. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

princeton university continuing education: The Care of Souls Logan C. Jones, 2019-04-22 The Care of Souls is a collection of essays and short reflections on the art of pastoral supervision in the clinical pastoral education (CPE) learning process. The essays focus on different aspects of supervisory theory, and are juxtaposed with reflections on the raw helplessness of both the patient and the chaplain, which can occur at the bedside. This collection highlights the critical importance of self-awareness, the inexact art of caring, and the hard necessity of listening to another person's pain.

princeton university continuing education: Bodies of Knowledge: Embodied Learning in Adult Education Randee Lipson Lawrence, 2012-06-19 Explore the multiple ways adults learn through their bodies. Embodied or somatic learning is a way of learning that relies on the body's knowledge. Our most basic form of learning in childhood is preverbal; however, traditional schooling forces us to check our bodies at the door, requiring us to sit at a desk and raise our hands, focusing primarily on cognition to the exclusion of other ways of knowing. By the time we reach adulthood, "being in our bodies" is a foreign concept and a source of discomfort for many of us. This volume challenges the dominant paradigm of how knowledge is constructed and shared. Embodied learning is examined through a variety of practice contexts, including higher education, community education, health care, and the workplace, and through multiple methods, including dance, theater, and outdoor experiential education. This is 134th volume of the Jossey-Bass quarterly report series New Directions for Adult and Continuing Education. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad

range of adult and continuing education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

princeton university continuing education: Tectonic Boundaries: Negotiating Convergent Forces in Adult Education Carmela R. Presenting multiple perspectives and environments, topics covered include: possibilities and requirements for change that will be needed in curriculum, philosophy, programs and practice, strategies for negotiating the interactive boundaries of a dynamic, complex, fluid global environment, and case studies and examples from theory, pedagogy, technology, healthcare, workplace, society, and policies. This is the 149th volume of the Jossey Bass series New Directions for Adult and Continuing Education. Noted for its depth of coverage, it explores issues of common interest to instructors, administrators, counselors, and policymakers in a broad range of education settings, such as colleges and universities, extension programs, businesses, libraries, and museums.

princeton university continuing education: *Cautionary Tales in the Ethics of Lifelong Learning Policy and Management* Richard G. Bagnall, 2004-05-31 This work is concerned with appraising the contemporary ethical impact of lifelong learning ideology and advocacy on education, through focusing on trends in educational policy and management that flow from the ideology. It has its origins in the author's concern that many of those trends are being defmed and promoted, or

opposed, without an adequate understanding of their ethical dimensions. The 21 trends examined in this work are seen as defining important dimensions of the quite radical changes in educational policy and management that are flowing from the practical realisation of lifelong learning ideology and advocacy. In here evaluating those trends from an ethical perspective, the thesis is developed that they lead inevitably to distinctive ethical dilemmas or tensions in the lived experience of educational participants. The dilemmas, though, are not seen as realities that can intelligently be either avoided or resolved. They are, rather, inescapable features of the trends, although they and the experience of them may be managed intelligently to a greater or lesser extent. This analysis is premised on the belief that an understanding of the dilemmas may be of practical value in assisting educators, and policy makers and managers, to live and work more intelligently with them and to better manage the educational changes that are defined by the trends. It may thereby contribute to moderating the excesses, sillinesses, and inanities so often evident in the directing and managing of reforms associated with the trends and to reduce the anguish and pain associated with them.

princeton university continuing education: *A Modern Guide to Adult Learning Systems* Richard Desjardins, Jan Kalenda, 2025-08-11 This book presents a comprehensive overview of Adult Learning Systems (ALS) in post-industrial market democracies, situating them within historically and spatially comparative contexts. It illustrates the diverse ways in which different systems have responded to the shared and specific challenges involving organised adult learning.

princeton university continuing education: *Foundations of Lifelong Education* R. H. Dave, 2014-05-18 *Foundations of Lifelong Education* deals with the interdisciplinary foundations of lifelong education and examines a number of basic issues concerning lifelong education, such as why education should be treated as a lifelong process, or how the functions of lifelong education are related to historical and contemporary developments in society. The goals, contents, and processes of learning appropriate to the aspirations of lifelong education are also explored, as well as the extent to which lifelong education is feasible and practicable in different socio-economic and ideological conditions. Comprised of eight chapters, this book begins with an overview of methodological considerations in the present study, such as the nature of the foundations content; general steps that may be followed for constructing discipline-based foundations; and the ways of incorporating several elements of interdisciplinarity into the study. The reader is then introduced to the sociological and philosophical aspects of lifelong education, along with the historical background on the concept of lifelong education. In addition to sociology and philosophy, lifelong education in relation to anthropology, ecology, psychology, and economics is also analyzed. The book concludes by presenting illustrative analyses and syntheses of the ideas discussed in the preceding chapters based on selected disciplines. This monograph is intended for educators, social reformers, and educational policymakers.

princeton university continuing education: A Novel Idea Randee Lipson Lawrence, Patricia Cranton, 2015-06-25 Lawrence and Cranton present a unique research methodology involving fictional characters as research participants. Transformative learning themes are identified through a content analysis of six contemporary novels. The characters from these novels are invited to come to a virtual space, the Butterfly Café where they engage in a series of dialogues on the research themes related to their transformative learning experiences. Each of the dialogues is followed by a debriefing session to deepen the understanding of the original themes Readers are given a window into Lawrence and Cranton's analysis and interpretive process as they engage in dialogue with Celie from the Color Purple, Macon from Accidental Tourist, Mariam and Laila from A Thousand Splendid Suns, and others. The dialogues become a story within the stories told in the novels. The end product is the introduction of a new model of transformative learning based on a metaphor of planting, cultivating, and growing seeds. Central to the model is becoming conscious, a process that appeared in each of the novels. Readers will find insights into transformative learning that are outside of the standard academic treatment of the topic. Moving the research into the realm of fiction provides the opportunity for a creative exploration of transformative learning. Yet, since fiction inevitably mirrors reality, readers will be able to relate the analysis, the dialogues, and the ensuing model to their own lives and to their adult education practice.
