princeton history department faculty: The New Princeton Companion Robert K. Durkee, 2022-04-05 The definitive single-volume compendium of all things Princeton The New Princeton Companion is the ultimate reference book on Princeton University's history and traditions, personalities and key events, and defining characteristics and idiosyncrasies. Robert Durkee brings a unique insider's perspective to the school's dramatic transformation over the past five decades,

showing how it has become more multicultural, multiracial, and multinational, all the while advancing its distinctive academic mission. Featuring more than 400 entries presented alphabetically, this wide-ranging collection covers topics from academic departments, cultural resources, and student organizations, hoaxes, and pranks to athletic teams, the town of Princeton, and university presidents. There are entries on coeducation, women, people of color, traditionally underrepresented groups, the diversification of campus iconography, and the protest activity that helped to usher in many of these changes. This marvelous compendium also includes annotated maps tracing the growth of the campus over more than two and a half centuries, lists ranging from prizewinners of many kinds to Olympic medalists, and an illustrated calendar that highlights something that happened in Princeton's history on every day of the year. Now completely updated, revised, and expanded from the classic 1978 edition, *The New Princeton Companion* tells you virtually everything there is to know about this remarkable institution of higher learning, revealing what it stands for, what it aspires to, and how it evolved from a tiny colonial college to one of the most acclaimed research universities in the world.

princeton history department faculty: Leaders in the Historical Study of American Education Wayne J. Urban, 2012-01-01 This volume consists of twenty six autobiographical essays by leading historians of American education which document the enormous variety of paths taken to get into this field. A companion to earlier volumes on philosophy of education and curriculum studies, the historians in this volume reflect a wide variety of interests that underlay accomplishment in this scholarly field. They come from diverse backgrounds that have animated their scholarly careers in compelling ways. Readers in any variety of educational or historical study should learn from this volume how unplanned careers can still result in highly successful sets of accomplishments. That realization is a tribute both to the individual contributors and to the great attractiveness of educational history to committed scholars of various backgrounds and orientations.

princeton history department faculty: The Making of Princeton University James Axtell, 2021-03-09 In 1902, Professor Woodrow Wilson took the helm of Princeton University, then a small denominational college with few academic pretensions. But Wilson had a blueprint for remaking the too-cozy college into an intellectual powerhouse. *The Making of Princeton University* tells, for the first time, the story of how the University adapted and updated Wilson's vision to transform itself into the prestigious institution it is today. James Axtell brings the methods and insights from his extensive work in ethnohistory to the collegiate realm, focusing especially on one of Princeton's most distinguished features: its unrivaled reputation for undergraduate education. Addressing admissions, the curriculum, extracurricular activities, and the changing landscape of student culture, the book devotes four full chapters to undergraduate life inside and outside the classroom. The book is a lively warts-and-all rendering of Princeton's rise, addressing such themes as discriminatory admission policies, the academic underperformance of many varsity athletes, and the controversial bicker system through which students have been selected for the University's private eating clubs. Written in a delightful and elegant style, *The Making of Princeton University* offers a detailed picture of how the University has dealt with these issues to secure a distinguished position in both higher education and American society. For anyone interested in or associated with Princeton, past or present, this is a book to savor.

princeton history department faculty: Arms and the University Donald Alexander Downs, Ilia Murtazashvili, 2012-02-27 The gap between the U.S. military and society has widened in recent years, posing problems for the constitutional order. The gap is especially acute in major universities. *Arms and the University* probes various dimensions of the tense relationship between the military and the university. Developing and applying a theory of civic and liberal education, this book shows how some military presence on campus can contribute to the diversity of ideas and the education of all students.

princeton history department faculty: The Princeton Fugitive Slave Lolita Buckner Inniss, 2019-09-03 A study of the life of a Maryland slave, his escape to freedom in New Jersey, and the

trials that ensued. James Collins Johnson made his name by escaping slavery in Maryland and fleeing to Princeton, New Jersey, where he built a life in a bustling community of African Americans working at what is now Princeton University. After only four years, he was recognized by a student from Maryland, arrested, and subjected to a trial for extradition under the 1793 Fugitive Slave Act. On the eve of his rendition, after attempts to free Johnson by force had failed, a local aristocratic white woman purchased Johnson's freedom, allowing him to avoid re-enslavement. The Princeton Fugitive Slave reconstructs James Collins Johnson's life, from birth and enslaved life in Maryland to his daring escape, sensational trial for re-enslavement, and last-minute change of fortune, and through to the end of his life in Princeton, where he remained a figure of local fascination. Stories of Johnson's life in Princeton often describe him as a contented, jovial soul, beloved on campus and memorialized on his gravestone as "The Students Friend." But these familiar accounts come from student writings and sentimental recollections in alumni reports—stories from elite, predominantly white, often southern sources whose relationships with Johnson were hopelessly distorted by differences in race and social standing. In interrogating these stories against archival records, newspaper accounts, courtroom narratives, photographs, and family histories, author Lolita Buckner Inniss builds a picture of Johnson on his own terms, piecing together the sparse evidence and disaggregating him from the other black vendors with whom he was sometimes confused. By telling Johnson's story and examining the relationship between antebellum Princeton's Black residents and the economic engine that supported their community, the book questions the distinction between employment and servitude that shrinks and threatens to disappear when an individual's freedom is circumscribed by immobility, lack of opportunity, and contingency on local interpretations of a hotly contested body of law. Praise for *The Princeton Fugitive Slave* "Fascinating historical detective work . . . Deeply researched, the book overturns any lingering idea that Princeton was a haven from the broader society. Johnson had to cope with the casual racism of students, occasional eruptions of racial violence in town and the ubiquitous use of the N-word by even the supposedly educated. This book contributes to our understanding of slavery's legacy today." —Shane White, author of *Prince of Darkness: The Untold Story of Jeremiah G. Hamilton, Wall Street's First Black Millionaire* "Collectively, Inniss's work provides an exciting model for future scholars of slavery and labor. Perhaps most importantly, Inniss skillfully and compassionately restores Johnson's voice to his own historical narrative." —G. Patrick O'Brien, *H-Slavery*

princeton history department faculty: Engagement with the Past William Palmer, 2021-10-21 Arthur M. Schlesinger, Jr., John Hope Franklin, Daniel Boorstin, C. Vann Woodward, Edmund S. Morgan, Barbara Tuckman, Eric Hobsbawn, Hugh Trevor Roper, Lawrence Stone—aside from carrying the distinction as some of the most successful and well-respected historians of the twentieth century, these scholars found their lives and careers evolving amid some of the world's pivotal historical moments. Dubbed the World War II Generation, the twenty-two English and American historians chronicled by William Palmer grew up in the aftermath of World War I, went to college in the 1930s as the threats of the Great Depression, Hitler, and Communism loomed over them, saw their careers interrupted by World War II, and faced the prospect of nuclear annihilation. They gained from their experiences the perspective and insight necessary to write definitive histories on topics ranging from slavery to revolution. *Engagement with the Past* offers biographies of these individuals in the context of their generation's intellectual achievement. Based upon extensive personal interviews and careful reading of their work, *Engagement with the Past* is a fascinating behind-the-scenes look at a generation of historians and how they helped record and shape modern history.

princeton history department faculty: Student Diversity at the Big Three Marcia Synnott,

2017-09-08 Strengthening affirmative action programs and fighting discrimination present challenges to America's best private and public universities. US college enrollments swelled from 2.6 million students in 1955 to 17.5 million by 2005. Ivy League universities, specifically Harvard, Yale, and Princeton, face significant challenges in maintaining their professed goal to educate a reasonable number of students from all ethnic, racial, religious, and socio-economic groups while maintaining the loyalty of their alumni. College admissions officers in these elite universities have the daunting task of selecting a balanced student body. Added to their challenges, the economic recession of 2008-2009 negatively impacted potential applicants from lower-income families. Evidence suggests that high Standard Aptitude Test (SAT) scores are correlated with a family's socioeconomic status. Thus, the problem of selecting the best students from an ever-increasing pool of applicants may render standardized admissions tests a less desirable selection mechanism. The next admissions battle may be whether well-endowed universities should commit themselves to a form of class-based affirmative action in order to balance the socioeconomic advantages of well-to-do families. Such a policy would improve prospects for students who may have ambitions for an education that is beyond their reach without preferential treatment. As in past decades, admissions policies may remain a question of balances and preferences. Nevertheless, the elite universities are handling admission decisions with determination and far less prejudice than in earlier eras.

princeton history department faculty: **W. Arthur Lewis and the Birth of Development Economics** Robert L. Tignor, 2020-06-23 W. Arthur Lewis was one of the foremost intellectuals, economists, and political activists of the twentieth century. In this book, the first intellectual biography of Lewis, Robert Tignor traces Lewis's life from its beginnings on the small island of St. Lucia to Lewis's arrival at Princeton University in the early 1960s. A chronicle of Lewis's unfailing efforts to promote racial justice and decolonization, it provides a history of development economics as seen through the life of one of its most important founders. If there were a record for the number of firsts achieved by one man during his lifetime, Lewis would be a contender. He was the first black professor in a British university and also at Princeton University and the first person of African descent to win a Nobel Prize in a field other than literature or peace. His writings, which included his book *The Theory of Economic Growth*, were among the first to describe the field of development economics. Quickly gaining the attention of the leadership of colonized territories, he helped develop blueprints for the changing relationship between the former colonies and their former rulers. He made significant contributions to Ghana's quest for economic growth and the West Indies' desire to create a first-class institution of higher learning serving all of the Anglophone territories in the Caribbean. This book, based on Lewis's personal papers, provides a new view of this renowned economist and his impact on economic growth in the twentieth century. It will intrigue not only students of development economics but also anyone interested in colonialism and decolonization, and justice for the poor in third-world countries.

princeton history department faculty: **The End of College** Robert Wilson-Black, 2021-10-05 College in the United States changed dramatically during the twentieth century, ushering in what we know today as the American university in all its diversity. Religion departments made their way

into institutions in the 1930s to the 1960s, while significant shifts from college to university occurred. The college ideal was primarily shaping the few to enter the Protestant management class through the inculcation of values associated with a Western civilization that relied upon this training done residually, primarily for young men. Protestant Christian leaders created religion departments as the college model was shifting to the university ideal, where a more democratized population, including women and non-Protestants, studied under professors trained in specialized disciplines to achieve professional careers in a more internationally connected and post-industrial class. Religion departments at mid-century were addressing the lack of an agreed-upon curricular center in the wake of changes such as the elective system, Carnegie credit-hour formulation, and numerous other shifts in disciplines spelling the end of the college ideal, though certainly continuing many of its traditions and structures. Religion departments were an attempt to provide a cultural and religious center that might hold, enhance existential and moral meaning for students, and strengthen an argument against the German research university ideals of naturalistic science whose so-called objectivity proved, at best, problematic and, at worst, inept given the political crisis in Europe. Colleges found they were losing sight of the college ideal and hoped religion as a taught subject could bring back much of what college had meant, from moral formation and curricular focus to personal piety and national unity. That hope was never realized, and what remained in its wake helped fuel the university model with its specialized religion departments seeking entirely different ends. In the shift from college to university, religion professors attempted to become creators of a legitimate academic subject quite apart from the chapel programs, attempts at moralizing, and centrality in the curriculum of Western Christian thought and history championed in the college model.
