Understanding the Decision to Surrender Your Dog

Surrendering a dog to humane society is often a last resort when owners find themselves unable to provide adequate care. Understanding the reasons behind this decision is crucial, as it helps in making informed and responsible choices. Common reasons for surrender include financial difficulties, housing restrictions, behavioral issues, or significant changes in lifestyle such as moving or health problems.

Reasons for Surrendering a Dog

Many circumstances can lead to the decision to surrender a dog. Recognizing these reasons helps in assessing the situation realistically.

- Financial constraints impacting ability to afford food, veterinary care, or other essentials
- Changes in living situation, such as moving to a pet-restricted apartment or relocating to a new city
- Time constraints due to work or family commitments

- Behavioral challenges that the owner feels ill-equipped to manage
- Health problems of the owner that limit their ability to care for the dog

Emotional Considerations

The emotional impact of surrendering a dog is significant for many owners. It is important to acknowledge the feelings of guilt, sadness, or stress and to approach the process with compassion for both the dog and oneself. Humane societies often provide support and resources to help owners cope with these emotions.

Preparing for the Surrender Process

Proper preparation can make surrendering a dog to humane society less stressful and more efficient. Preparation includes gathering necessary documents, ensuring the dog is healthy and comfortable, and communicating effectively with the shelter staff.

Gathering Documentation

Most humane societies require certain documentation before accepting a dog. This may include:

- Proof of ownership
- Vaccination records and veterinary history
- Microchip information, if applicable
- Details about the dog's behavior and temperament
- Any medical conditions or special needs

Preparing Your Dog

Ensuring your dog is as comfortable as possible before surrender can reduce stress. This includes providing a familiar blanket or toy, feeding the dog before the visit, and maintaining a calm demeanor during transport. If possible, brief exercise or playtime can also help ease anxiety.

Contacting the Humane Society

Reaching out to the local humane society ahead of time is essential. This allows owners to learn about specific procedures, available resources, and any fees associated with surrendering a dog. Many shelters require appointments or have intake hours that must be followed.

What to Expect When Surrendering a Dog

Understanding what happens during the surrender process can help owners prepare mentally and practically. Humane societies have protocols designed to ensure the safety and well-being of the animals they accept.

Intake Procedure

Upon arrival, the dog will go through an intake assessment, which typically includes:

- Health evaluation by a veterinarian or trained staff
- Behavioral assessment to understand temperament and any issues
- Recording of personal information about the dog
- Photographs and identification labeling

Possible Waiting Period

Some shelters may have a waiting period before accepting a dog, depending on space and resources. Owners should be prepared for this possibility and ask about timelines when contacting the humane society.

Surrender Fees and Policies

Many humane societies charge a surrender fee, which helps cover medical care and sheltering costs. Policies vary, so it is important to clarify fees, refund possibilities, and any contractual agreements before surrendering the dog.

Alternatives to Surrendering Your Dog

Before deciding to surrender, exploring alternatives can sometimes keep the dog in a safe and loving environment. These options may alleviate the need to part ways with a pet permanently.

Rehoming Independently

Owners might consider finding a new home for their dog through trusted friends, family, or online community groups. This method allows more control over where the dog goes and ensures the new owner is carefully vetted.

Seeking Behavioral Training or Support

If behavioral issues are a reason for surrender, professional trainers or behaviorists can provide assistance. Many communities offer affordable

training programs that can resolve common problems.

Temporary Foster Care

Some humane societies and rescue organizations provide foster care programs for dogs when owners face temporary hardships. This option allows the dog to remain safe without permanent surrender.

After Surrender: What Happens to Your Dog?

Once a dog is surrendered to a humane society, the organization takes responsibility for its care and future placement. Understanding this process can provide reassurance about the dog's welfare.

Medical Care and Evaluation

The dog will receive thorough medical examinations, vaccinations, and treatment as needed. This care ensures the dog is healthy and ready for potential adoption.

Adoption Process

Humane societies work to find suitable adoptive homes. This typically involves screening prospective adopters, conducting interviews, and sometimes home visits to match the dog with an appropriate family.

Potential Outcomes

While many dogs are successfully adopted, some may face longer shelter stays depending on age, health, or behavior. Humane societies strive to provide quality care regardless of outcome and may collaborate with rescue groups to increase adoption chances.

surrendering a dog to humane society: The Oxford Handbook of Animal Studies Linda Kalof, 2017-02-01 Intellectual struggles with the animal question-- how humans can rethink and reconfigure their relationships with other animals-- first began to take hold in the 1970s. Over the next forty years, scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals. The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time, paying special attention to the commodification of animals, the degradation of the natural world and a staggering loss of animal habitat and species extinction, and the increasing need for humans to coexist with other animals in urban, rural and natural contexts. Linda Kalof maps these themes into the five major categories that structure this volume: Animals in the Landscape of Law, Politics and Public Policy; Animal Intentionality, Agency and Reflexive Thinking; Animals as Objects in Science, Food, Spectacle and Sport; Animals in Cultural Representations; and Animals in Ecosystems. Written by international scholars with backgrounds in philosophy, law, history, English, art, sociology, geography, archaeology, environmental studies, cultural studies, and animal advocacy, the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings.

surrendering a dog to humane society: Underdogs Arnold Arluke, Andrew Rowan, 2020-12-01 Underdogs looks into the rapidly growing initiative to provide veterinary care to underserved communities in North Carolina and Costa Rica and how those living in or near poverty respond to these forms of care. For many years, the primary focus of the humane community in the United States was to control animal overpopulation and alleviate the stray dog problem by euthanizing or sterilizing dogs and cats. These efforts succeeded by the turn of the century, and it appeared as though most pets were being sterilized and given at least basic veterinary care, including vaccinations and treatments for medical problems such as worms or mange. However, in recent years animal activists and veterinarians have acknowledged that these efforts only reached pet owners in advantaged communities, leaving over twenty million pets unsterilized, unvaccinated, and untreated in underserved communities. The problem of getting basic veterinary services to dogs and cats in low-income communities has suddenly become spotlighted as a major issue facing animal shelters, animal rescue groups, animal control departments, and veterinarians in the United States and abroad. In the past five to ten years, animal protection organizations have launched a new focus trying to deliver basic and even more advanced veterinary care to the many underserved pets in the United States. These efforts pose a challenge to these groups as does pet keeping to people living in poverty across most of the world who have pets or care for street dogs.

surrendering a dog to humane society: Pets, People, and Pragmatism Erin McKenna, 2013-03-18 Pets, People, and Pragmatism examines human relationships with pets without assuming that such relations are either benign or unnatural and to be avoided. The book addresses a lack of respect in pet-people relationships; for respectful relationships to be a real possibility, however, humans must make the effort to understand the beings with which we live, work, and play. American pragmatism understands that humans and other animal beings have been interacting and transforming each other for thousands of years. There is nothing "unnatural" about the human domestication of other animal beings, though domestication does raise specific practical and ethical questions. A pragmatist account of our relationship with those animal beings commonly considered as pets does not prohibit the use of these beings in research, entertainment, competition, or work. It does, however, find abuse and neglect ethical. Because abuse can occur in any use of other animal beings, this pragmatist account takes up the abusive practices in research, entertainment, competition, and work without arguing that these practices are inherently abusive. Some of the sources of abuse have been addressed by utilitarian and deontological accounts, but a pragmatist evolutionary perspective offers unique insights and results in some surprising conclusions: For instance, there may be an ethical obligation to let a horse race, a dog show, or a cat compete in agility. Pets, People, and Pragmatism embarks on a philosophical journey that will captivate scholars and pet enthusiasts alike. It provides an important contribution to longstanding debates in the area of animal issues and strengthens the idea of multiple approaches to nonhuman beings. It also opens space for approaches that challenge some of the assumptions in the field of philosophy that have resulted in a dualistic and hierarchical approach to metaphysics and ethics.

surrendering a dog to humane society: Dog Training: Discover The Top 7 Things You Need To Teach Your Dog So They Are Peaceful And Disciplined Old Natural Ways, Valerie Fennel, 2018-11-01 Having pets is almost as American as apple pie and cheeseburgers. Dogs are thought to be man's best friend, and people take in these animals without a second thought a lot of the time. However, if you don't have previous experience with dogs or a sound understanding of their psychologies and perspectives, chances are your relationship with your dog, and the dog's life will suffer as a result. People love to take out their inability to understand their pets on their pets. They lack patience and understanding for these animals, who, without their approval, were taken from their place in the wild and domesticated for human use. Just because people believe that humans are at the top of the ladder, animals have come to be seen as beneath us and meant to serve people.
