

sustainable development in a sentence

sustainable development in a sentence is a concept that encapsulates the balance between economic growth, environmental protection, and social equity. It represents a framework for meeting the needs of the present without compromising the ability of future generations to meet their own needs. This principle is central to global policies and initiatives aimed at fostering long-term prosperity and ecological stability. Understanding sustainable development in a sentence helps clarify the complex interplay of factors involved in achieving a resilient and inclusive society. This article explores the meaning, importance, and practical applications of sustainable development, highlighting key aspects such as environmental stewardship, economic viability, and social responsibility. By examining these dimensions, the article provides a comprehensive overview relevant to policymakers, businesses, educators, and individuals. The following sections will delve into definitions, core principles, challenges, and examples of sustainable development in action.

- Defining Sustainable Development in a Sentence
- Core Principles of Sustainable Development
- Importance of Sustainable Development
- Challenges in Achieving Sustainable Development
- Examples of Sustainable Development in Practice

Defining Sustainable Development in a Sentence

Sustainable development in a sentence can be succinctly defined as development that meets the needs of the present without compromising the ability of future generations to meet their own needs. This definition was popularized by the Brundtland Report in 1987 and has since formed the foundation for international sustainability efforts. It emphasizes a forward-looking approach that integrates environmental health, economic growth, and social well-being. The phrase captures the essence of balancing short-term gains with long-term sustainability.

In practice, sustainable development involves managing resources wisely, promoting equity, and ensuring that economic activities do not degrade the environment. It also includes the notion of intergenerational justice, meaning that current decisions should not impair future opportunities. The simplicity of defining sustainable development in a sentence belies the complexity involved in implementing it across diverse sectors and regions.

Core Principles of Sustainable Development

The concept of sustainable development is grounded in several key principles that guide actions and policies globally. These principles ensure that development efforts are balanced, inclusive, and resilient. Understanding these fundamentals is crucial for embedding sustainability into planning and

decision-making processes.

Environmental Protection

Environmental protection is a cornerstone of sustainable development. It involves conserving natural resources, preserving biodiversity, and reducing pollution and waste. Sustainable development in a sentence often reflects the need to maintain the planet's ecosystems to support life and human activities sustainably over time.

Economic Growth

Economic growth under sustainable development is focused on generating prosperity without exhausting natural capital. It promotes innovation, efficient resource use, and equitable distribution of wealth. Sustainable economic development seeks to create jobs and improve living standards while minimizing environmental degradation.

Social Equity

Social equity ensures that all individuals have access to essential services, opportunities, and rights. It addresses issues such as poverty, education, health, and participation in decision-making. Sustainable development in a sentence reflects the importance of fairness and inclusivity in societal progress.

Interconnectedness of the Three Pillars

The three pillars—environmental, economic, and social—are deeply interconnected. Sustainable development requires an integrated approach that considers the trade-offs and synergies between these dimensions. Policies and initiatives must aim for holistic outcomes rather than isolated gains.

Importance of Sustainable Development

Sustainable development in a sentence highlights its critical role in addressing global challenges such as climate change, resource depletion, and social inequality. It serves as a guiding framework for governments, organizations, and communities striving for a better future. The significance of sustainable development can be understood through its various benefits.

Mitigating Environmental Impact

By promoting responsible resource management and reducing emissions, sustainable development helps mitigate environmental damage. It supports actions like renewable energy adoption, conservation efforts, and pollution control to protect the Earth's systems.

Promoting Long-Term Economic Stability

Sustainable development encourages economic models that are viable over the long term. This includes diversifying economies, investing in green technologies, and fostering resilient infrastructure. Such strategies help prevent economic crises linked to environmental degradation or social unrest.

Enhancing Social Well-Being

Improving quality of life through access to education, healthcare, and equitable opportunities is a key advantage of sustainable development. It aims to reduce disparities and empower marginalized groups, contributing to social cohesion and stability.

Supporting Global Cooperation

Sustainable development fosters international collaboration by aligning goals and sharing resources. Initiatives like the United Nations Sustainable Development Goals (SDGs) exemplify this cooperative spirit, promoting collective action for common challenges.

Challenges in Achieving Sustainable Development

Despite widespread consensus on the importance of sustainability, achieving sustainable development remains complex and fraught with challenges. These obstacles stem from economic, political, social, and environmental factors that require coordinated efforts to overcome.

Resource Limitations

The finite nature of natural resources poses a significant challenge. Overconsumption and inefficient use lead to depletion and environmental degradation, complicating sustainable development efforts. Balancing resource use with regeneration is critical but difficult.

Economic and Political Barriers

Short-term economic interests often conflict with long-term sustainability goals. Political will can be lacking due to competing priorities or vested interests. Additionally, the costs associated with transitioning to sustainable practices can be prohibitive for some regions or industries.

Social Inequities

Addressing inequality is essential but challenging, as disparities in wealth, education, and access to resources persist globally. Sustainable development requires inclusive policies that consider the needs of vulnerable populations, which can be difficult to implement effectively.

Climate Change and Environmental Degradation

Global environmental issues such as climate change, deforestation, and pollution present urgent threats. These factors complicate sustainable development by altering ecosystems and exacerbating social and economic vulnerabilities.

Examples of Sustainable Development in Practice

Implementing sustainable development in a sentence translates into diverse real-world applications across sectors and regions. These examples demonstrate how the principles of sustainability can guide effective actions and policies.

Renewable Energy Initiatives

Transitioning to renewable energy sources like solar, wind, and hydroelectric power reduces carbon footprints and dependence on fossil fuels. Countries and companies investing in clean energy projects showcase sustainable development in action by promoting environmental and economic benefits.

Sustainable Agriculture

Practices such as crop rotation, organic farming, and water-efficient irrigation help maintain soil health and biodiversity. Sustainable agriculture supports food security while minimizing environmental impact, reflecting the integration of social and ecological considerations.

Green Urban Planning

Designing cities with green spaces, efficient public transport, and energy-efficient buildings helps reduce pollution and enhance livability. Sustainable urban development focuses on creating resilient communities that balance growth with environmental stewardship.

Corporate Social Responsibility (CSR)

Many businesses adopt CSR strategies that align with sustainable development goals. These include reducing waste, improving labor conditions, and engaging in community development, illustrating how the private sector contributes to sustainability.

Community-Based Conservation

Local communities managing natural resources sustainably demonstrate effective stewardship. These efforts preserve biodiversity and cultural heritage while supporting livelihoods, embodying the social and environmental pillars of sustainable development.

1. Renewable energy reduces greenhouse gas emissions and supports a sustainable economy.
2. Sustainable agriculture ensures food security and environmental protection.
3. Green urban planning improves quality of life and reduces ecological footprints.
4. Corporate social responsibility integrates business practices with social and environmental goals.
5. Community-based conservation empowers local stakeholders and preserves ecosystems.

Frequently Asked Questions

What is sustainable development in a sentence?

Sustainable development is the practice of meeting present needs without compromising the ability of future generations to meet theirs.

Why is sustainable development important in one sentence?

Sustainable development is important because it balances economic growth, environmental protection, and social equity for long-term well-being.

How does sustainable development impact the environment in a sentence?

Sustainable development minimizes environmental degradation by promoting responsible resource use and conservation.

Can you define sustainable development goals in a sentence?

Sustainable Development Goals are a set of 17 global targets established by the UN to address poverty, inequality, and environmental challenges by 2030.

What role do renewable energy sources play in sustainable development in a sentence?

Renewable energy sources support sustainable development by providing clean, infinite power that reduces carbon emissions.

How does sustainable development contribute to economic growth in a sentence?

Sustainable development fosters economic growth by encouraging innovation, efficiency, and

equitable resource distribution.

What is the relationship between social equity and sustainable development in a sentence?

Social equity ensures that sustainable development benefits all communities fairly, reducing disparities and promoting inclusion.

Additional Resources

1. *Our Common Future* – This seminal report by the World Commission on Environment and Development, also known as the Brundtland Report, introduced the concept of sustainable development. It emphasizes meeting the needs of the present without compromising the ability of future generations to meet their own needs. The book laid the foundation for global environmental policies and continues to influence sustainability discourse worldwide.
2. *Cradle to Cradle: Remaking the Way We Make Things* – Written by William McDonough and Michael Braungart, this book challenges the traditional "cradle-to-grave" manufacturing model. It advocates for designing products with a circular lifecycle, where materials are reused or repurposed indefinitely. The authors combine environmental science with innovative design principles to promote sustainability in industry.
3. *The Ecology of Commerce* – Paul Hawken explores the relationship between business and the environment in this insightful book. He argues that sustainable business practices are essential for long-term economic growth and environmental health. The book offers practical ideas for transforming commerce into a force for ecological restoration.
4. *Sustainability by Design: Subversive Strategy for Transforming Our Consumer Culture* – John R. Ehrenfeld presents a philosophical approach to sustainability, focusing on changing cultural values and behaviors that drive consumption. He suggests that technological solutions alone are insufficient and calls for a deeper transformation of societal goals. The book encourages readers to rethink what it means to live sustainably.
5. *Green Economy and Sustainable Development: Bringing Back the Social* – Edited by José Antonio Ocampo and Rob Vos, this collection examines the intersection of economic growth, environmental sustainability, and social equity. It critiques purely market-driven approaches and highlights the importance of social policies in achieving sustainable development. The contributors include leading economists and policymakers.
6. *Natural Capitalism: Creating the Next Industrial Revolution* – Paul Hawken, Amory Lovins, and L. Hunter Lovins propose a new economic model that values natural resources as capital. The book outlines strategies for energy efficiency, waste reduction, and sustainable resource management. It envisions a future where businesses thrive by aligning profitability with environmental stewardship.
7. *Planetary Boundaries: Exploring the Safe Operating Space for Humanity* – Johan Rockström and colleagues identify critical environmental limits that should not be exceeded to avoid catastrophic ecological damage. This framework helps policymakers and scientists assess the sustainability of human activities on a global scale. The book emphasizes the urgency of respecting Earth's biophysical thresholds.

8. *Designing Climate Solutions: A Policy Guide for Low-Carbon Energy* – Hal Harvey offers practical policy recommendations for reducing carbon emissions and promoting renewable energy. The book bridges the gap between scientific research and actionable government strategies. It is a valuable resource for policymakers, activists, and anyone interested in combating climate change through sustainable development.

9. *Beyond Growth: The Economics of Sustainable Development* – Herman E. Daly critiques the traditional focus on economic growth and proposes alternatives that prioritize ecological health and social well-being. The book discusses the limits to growth and advocates for steady-state economics. It is a foundational text for understanding the economic dimensions of sustainability.

sustainable development in a sentence: China's environmental policy in terms of European Union standards Jan Wiktor Tkaczyński, Łukasz Gacek, 2020-11-16 It is beyond dispute that both China and the European Union stand to gain from promoting low-carbon development through the dissemination of clean and renewable energy sources, as this inevitably leads to increased environmental protection. The depletion of fossil fuel resources and the accompanying changes in the global energy mix make Europe and China not only competitors in the global economic race, but also *nolens volens* partners. Their pragmatic partnership is characterized, on the one hand, by the need to take action to reduce the consumption of fossil fuels and, on the other, by the desire to minimize the negative environmental impact of their use. Hence, the existing and emerging cooperation between the two actors, while challenging for a number of reasons, is not only

an attempt to set up channels to exchange vital information, but also an exercise in setting the standards under which further cooperation will be forged.

sustainable development in a sentence: The Principle of Sustainability Klaus Bosselmann, 2016-12-08 This book investigates how sustainability informs key principles and concepts of domestic and international law. It calls for the recognition of ecological sustainability as a fundamental principle to guide the entire legal system rather than just environmental legislation. To this end, the book makes a contribution to global environmental constitutionalism, a rapidly growing area within comparative and international environmental law and constitutional law. This 2nd edition has been fully revised and updated to take account of recent developments and new case law. The book will be a valuable resource for students, researchers and policy makers working in the areas of environmental law and governance.

sustainable development in a sentence: The Oxford Companion to Comparative Politics Joel Krieger, 2013 The two-volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science. Comparative Politics, the discipline devoted to the politics of other countries or peoples, has been steadily gaining prominence as a field of study, allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit. Comparativists apply various theories and concepts to analyze the similarities and differences between political units, using the results of their research to develop causalities and generalizations. Each of these theories and outcomes are thoroughly defined in the Companion, as are major resultant conclusions, those comparativists who have influenced the field in significant ways, and politicians whose administrations have shaped the evaluation of contrasting governments. Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set, while over 100 new entries would thoroughly examine the field in a lasting, more theoretical than current-event-based, way. New entries cover such topics as failed states, Grand Strategies, and Soft Power; important updates include such countries as China and Afghanistan and issues like Capital Punishment, Gender and Politics, and Totalitarianism. Country entries include the most significant nations to permit a focus on non time-sensitive analysis. In addition, 25 1,000-word interpretive essays by notable figures analyze the discipline, its issues and accomplishments. Collectively, entries promote deeper understanding of a field that is often elusive to non-specialists.

sustainable development in a sentence: Protecting the Last Frontier Gabrielle Leterre, 2024-04-29 Aerospace Law and Policy Series Space resource activities—better known as “space mining”—is the next step in humankind’s utilization of outer space. Previous space activities have belatedly caused us to realize that fragile environments do not end with Earth’s atmosphere. Today, the most striking problem is the agglomeration and increasing generation of nonfunctional space objects (space debris) in orbit. Tomorrow, with the development of new space activities, unanticipated environmental problems will arise beyond Earth orbit. This book seeks to anticipate the inevitable legal framework that will need to be put in place and, in particular, considers the necessity to create legal standards to support the environmental sustainability of space resource activities. To that end, the book assesses the efficiency of existing space law in addressing environmental threats and reflects on the potential contribution international environmental law can offer. The array of applicable mechanisms considered includes a detailed examination of the following: what kind of environmental problems may arise from space resource activities; which

norms of international law are relevant in addressing these threats within the framework of sustainability; the United Nations Space Treaties; domestic space legislations that directly address space resource activities or that are particularly significant from an environmental perspective; and soft law, especially instruments and guidelines from international organizations acting in the space sector, such as the United Nations Committee on the Peaceful Uses of Outer Space (COPUOS) and the Committee on Space Research (COSPAR). Contrary to a common idea, space resources—such as the ones found in situ on celestial bodies—are limited and need to be managed rationally. It is indubitable that activities beyond Earth orbit will have an impact on the surrounding environment, raising a host of potential issues, which go beyond the question of debris, such as contamination and the risk of overexploitation. Ultimately, this book drafts the roadmap for the environmentally sustainable exploitation of space resources from a legal standpoint and proposes a sustainability framework articulated around a set of standards. Concerned lawyers and policymakers worldwide will greatly appreciate the book's set of objective standards and concrete measures. This practical approach, which includes the comprehensive review of instruments governing space activities, will lead them to navigate with assurance the different normative levels of legal action for astro-environmentalism.

sustainable development in a sentence: The Limits to Scarcity Lyla Mehta, 2010 First Published in 2010. Routledge is an imprint of Taylor & Francis, an informa company.

sustainable development in a sentence: IIM Indore IPM Entrance Exam IPMAT (Integrated Programme in Management Aptitude Test) - 10 Mock Tests and 9 Sectional Tests (1300 Solved Questions) with Free Access to Online Tests EduGorilla Prep Experts, 2020-12-28 IPMAT is an aptitude test conducted by IIM Indore for admission to its five- year course, IPM (Integrated Programme in Management). IPM is a dual degree programme offered by IIM Indore for candidates passing the 12th standard. It is a programme which allows entry to an IIM just after 12th standard. For securing admission in IPM, aspirants have to clear IPMAT. IPM stands out in terms of the environment that it provides and plans his/ her life and aligns the reality with aspirations.

sustainable development in a sentence: The Palgrave Handbook of Global Citizenship and Education Ian Davies, Li-Ching Ho, Dina Kiwan, Carla L. Peck, Andrew Peterson, Edda Sant, Yusef Waghid, 2018-01-11 This Handbook is a much needed international reference work, written by leading writers in the field of global citizenship and education. It is based on the most recent research and practice from across the world, with the 'Geographically-Based Overviews' section providing summaries of global citizenship and education provided for Southern Africa, Australasia, Europe, the Middle East, North America, Latin America, and East and South East Asia. The Handbook discusses, in the 'Key Ideologies' section, the philosophies that influence the meaning of global citizenship and education, including neo-liberalism and global capitalism; nationalism and internationalism; and issues of post-colonialism, indigeneity, and transnationalism. Next, the 'Key Concepts' section explores the ideas that underpin debates about global citizenship and education, with particular attention paid to issues of justice, equity, diversity, identity, and sustainable development. With these key concepts in place, the 'Principal Perspectives and Contexts' section turns to exploring global citizenship and education from a wide variety of viewpoints, including economic, political, cultural, moral, environmental, spiritual and religious, as well as taking into consideration issues of ethnicity, gender and sexuality, and social class. Finally, the 'Key Issues in the Teaching of Global Citizenship' section discusses how education can be provided through school subjects and study abroad programmes, as well as through other means including social media and online assessment, and political activism. This Handbook will be vital reading for academics, postgraduates and advanced undergraduates in the fields of sociology and education, particularly those with an interest in comparative studies.

sustainable development in a sentence: Educating for Sustainability Victor Nolet, 2015-08-14 Educating for Sustainability presents fundamental principles, theoretical foundations, and practical suggestions for integrating education for sustainability into existing schoolwide

systems and programs, organized in three sections: Principles of Education for Sustainability; Fostering a Sustainability Worldview; Learning and Thinking for Sustainability. Designed for teachers and teachers-to-be at all grade levels and across the content areas, the focus is on professional practices and pedagogical approaches rather than specific topics often associated with sustainability. Each chapter includes a number of supports to help readers monitor and improve their own professional practice and to deepen their own sustainability worldview, including textboxes in most chapters that provide more detailed or specialized information and a range of application exercises. All chapters include several Consider This activities and an Extend Your Professional Knowledge feature. Directly grounded in K-12 classroom practice, this book presents useful and realistic information for teachers looking to reorient their work toward sustainability and help their students develop new thinking and problem-solving abilities.

sustainable development in a sentence: Sustainability Thomas Pfister, Martin Schweighofer, André Reichel, 2016-05-26 Sustainability as a reference frame for dealing with the interconnection of environmental, economic and social issues on a global scale is not only characterized by complex problems and long-term strategies but also by differences and disagreements with regard to its meanings and how they should be realised. Therefore, Rather than seeking a single most appropriate definition of Sustainability, the main focus of this book is on how specific Sustainability problems are defined by whom and in which contexts, what solutions are pursued to tackle them, and which effects they have in practice. This account of the social nature of Sustainability is intended to assist its readers to better understand the complexities, dynamism, and ambivalence of this concept as well as to find their own position in relation to it. For this purpose, the book traces the historical development of the larger discourse on Sustainability and investigates responses to three grand Sustainability challenges: climate change, energy, and agricultural food production. It suggests that promoting Sustainability requires continuous and active care and is inseparable from political debate about the normative foundations of society.

sustainable development in a sentence: MAH CET LLB 5 Years Exam 2024 (Integrated Course) - 10 Mock Tests and 10 Sectional Tests (1800+ Solved MCQ) EduGorilla Prep Experts, • Best Selling Book for MAH CET LLB 5-Years Exam with objective-type questions as per the latest syllabus given by the Directorate of Higher Education Mumbai. • MAH CET LLB 5-Years Exam Preparation Kit comes with 20 Tests (10 Mock Tests and 10 Sectional Tests) with the best quality content. • Increase your chances of selection by 16X. • MAH CET LLB 5-Years Exam Prep Kit comes with well-structured and 100% detailed solutions for all the questions. • Clear exam with good grades using thoroughly Researched Content by experts.

sustainable development in a sentence: Army Public Schools Pgt & Tgt Screening Test 2022 English (12 Practice Sets) Prabhat Prakashan, 2023-10-01 The Book Army Public Schools PGT & TGT screening Test 2022 English (12 Practice Sets) , 2022 consists of past 12 Practice Tests, This book is for screening Test 2022 English covering 12 Practice Sets of English . The complete chapter-wise distribution of questions for all subjects is provided in the Table of Content. Selected Stories of Honoré de Balzac by Honoré de Balzac: In this collection, Honoré de Balzac presents a selection of his acclaimed short stories, showcasing his incredible talent for vivid storytelling and character development. With its rich language and engaging narratives, this book is a must-read for fans of classical literature. Key Aspects of the Book Selected Stories of Honoré de Balzac: Collection of Short Stories: The book features a collection of acclaimed short stories by Honoré de Balzac. Vivid Storytelling and Character Development: The stories showcase Balzac's incredible talent for vivid storytelling and character development. Useful for Literature Enthusiasts: The book is useful for fans of classical literature and those interested in the works of Balzac. Honoré de Balzac was a French novelist and playwright who is regarded as one of the greatest writers of Western literature. His book, Selected Stories of Honoré de Balzac, is highly regarded for its captivating storytelling and rich language.

sustainable development in a sentence: *Cultural Due Diligence in Hospitality Ventures* Nicole Häusler, 2017-04-05 This book introduces readers to a powerful method for cross-cultural due diligence in mergers and organizational collaborations. It employs the context of joint ventures between local communities and companies in the domain of hospitality in emerging tourism destinations. The book first analyzes the impact of cultural diversity in mergers between local communities and the private sector, revealing the characteristics and functions of culture and paying specific attention to the roles of organizational and community cultures in hospitality. In two subsequent methodological chapters the book presents a theoretical framework for cultural due diligence and identifies the principal actors, technical aspects and core principles. On the basis of a separate case study from northern Thailand, the book provides an example of cultural context analysis and presents the findings and results. In a concluding chapter the book presents an outlook on further research and development in this field.

sustainable development in a sentence: **SDG1 - No Poverty** Katarzyna Cichos, Amanda Lange Salvia, 2018-11-13 This work provides a new look at global problems of poverty and presents applicable solutions to show that the global community can eliminate poverty today and achieve its global promise - Sustainable Development Goal 1 (SDG 1).

sustainable development in a sentence: *Hydrology and Hydroclimatology* M. Karamouz, S. Nazif, M. Falahi, 2012-11-27 This book presents a systematic approach to understanding and applying the principles of hydrology and hydroclimatology, examining the interactions among different components of the water cycle. It takes a fresh look at the fundamentals and challenges in hydrologic and hydroclimatic systems as well as climate change. The author describes the applic

sustainable development in a sentence: *Leading the inclusive city* Hambleton, Robin, 2014-11-24 Cities are often seen as helpless victims in a global flow of events and many view growing inequality in cities as inevitable. This engaging book rejects this gloomy prognosis and argues that imaginative place-based leadership can enable citizens to shape the urban future in accordance with progressive values ? advancing social justice, promoting care for the environment and bolstering community empowerment. This international and comparative book, written by an experienced author, shows how inspirational civic leaders are making a major difference in cities across the world. The analysis provides practical lessons for local leaders and a significant contribution to thinking on public service innovation for anyone who wants to change urban society for the better.

sustainable development in a sentence: *Essential English for Competitive Examinations - 2nd Edition* Dr. Rashmi Singh, 2019-08-04 Disha's ESSENTIAL ENGLISH, true to its name, covers every essential topic and every essential type and pattern of MCQs asked in various competitive examinations conducted in India. It will serve as a SINGULAR VOLUME to provide complete preparation for scoring high in the English section of any competitive exam. Essential features of the book • Organised into IV parts: Grammar, Verbal Aptitude, RC & Para jumbles; Descriptive English - including 40 Chapters grouped under 10 Segments. • Grammar topics and sub-topics explained in an easy-to-understand manner. • Classroom Exercises to test and reinforce in-depth understanding of Concepts. • Extensive Exam pattern MCQs on each Topic to give you complete practice. • Dedicated Chapters for every specific MCQ pattern. • Things To Remember/Strategies To Employ for solving each Question Type. • 5000+ MCQs in all with Answers and Explanations. • Descriptive composition - Essay, Précis, Letter.

sustainable development in a sentence: **Intelligent Information and Database Systems**

Ngoc Thanh Nguyen, Tien Khoa Tran, Ualsher Tukayev, Tzung-Pei Hong, Bogdan Trawiński, Edward Szczerbicki, 2022-12-08 This book constitutes the refereed proceedings of the 14th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2022, held Ho Chi Minh City, Vietnam in November 2022. The 113 full papers accepted for publication in these proceedings were carefully reviewed and selected from 406 submissions. The papers of the 2 volume-set are organized in the following topical sections: data mining and machine learning methods, advanced data mining techniques and applications, intelligent and contextual systems, natural language processing, network systems and applications, computational imaging and vision, decision support and control systems, and data modeling and processing for industry 4.0. The accepted and presented papers focus on new trends and challenges facing the intelligent information and database systems community.
