**sweet dreams in japanese language: Food, Language, and Society** Natsuko Tsujimura, 2023-02-15 *Food, Language, and Society: Communication in Japanese Foodways* examines the language of food in Japanese through the lens of cognitive science and cultural studies to explore intriguing ways in which language, food, and culture interact in the fabric of Japanese society. The questions of how, where, and by whom food and food experiences are described provide abundant opportunities for investigating relationships between language and culture from multi-disciplinary perspectives. Linguistic analysis of the language of food enables us to understand cognitive information that motivates and influences people's rhetorical choices on foodways. Detailed discussions reveal that loanwords, mimetics, cooking terms, and metaphors serve as lynchpins to enrich the expressive power of the language of food. Food discourse situated in broader social and cultural contexts also reflect social norms and cultural practices deeply embedded within and beyond our gustatory and culinary life. Food narratives as in cookbooks and advertisements are an informative means for virtual interpersonal communication where individual and group identity is indexed, providing a platform for reexamination of gender and other social norms as response to changes in society. Examined from the interaction of linguistic and sociocultural perspectives, *Food, Language, and Society* illuminates the form, use, and social meaning of the language of food.

**sweet dreams in japanese language: Divine Work, Japanese Colonial Cinema and its Legacy** Kate Taylor-Jones, 2017-08-24 For many East Asian nations, cinema and Japanese Imperialism arrived within a few years of each other. Exploring topics such as landscape, gender, modernity and military recruitment, this study details how the respective national cinemas of Japan's territories struggled under, but also engaged with, the Japanese Imperial structures. Japan was ostensibly committed to an ethos of pan-Asianism and this study explores how this sense of the transnational was conveyed cinematically across the occupied lands. Taylor-Jones traces how cinema in the region post-1945 needs to be understood not only in terms of past colonial relationships, but also in relation to how the post-colonial has engaged with shifting political alliances, the opportunities for technological advancement and knowledge, the promise of larger consumer markets, and specific historical conditions of each decade.

**sweet dreams in japanese language: Tokyo Listening** Lorraine Plourde, 2019-07-02 Tokyo Listening examines how the sensory experience of the city informs how people listen to both music and everyday, ubiquitous sounds. Drawing on recent scholarship in the fields of sound studies, anthropology, and ethnomusicology and over fifteen years of ethnographic fieldwork in Japan,

Lorraine Plourde traces the linkages between sound and urban space. She examines listening cultures via four main ethnographic sites in Tokyo—an experimental music venue, classical music cafes, office workspaces, and department stores—looking specifically at how such auditory sensibilities are cultivated. The book brings together two different types of spaces into the same frame of reference: places people go to specifically for the music, and spaces where the music comes to them. Tokyo Listening examines the sensory experience of urban listening as a planned and multifaceted dimension of everyday city life, ultimately exploring the relationship between sound, comfort, happiness, and productivity.
