teacher appreciation travel theme: *Lesson Plans for the Elementary PE Teacher* Michael E. Gosset, 2018-07-24 This new book provides PE teachers with practical lesson plans for teaching movement at every elementary grade level. The book's movement and skill theme-based approach, which differs from the typical activity-based approaches found in many schools, helps students develop overall health and well-being regardless of sports interests and hobbies. Each lesson plan is broken down into subsections to illustrate the physical, cognitive, and affective benefits, the central theme or concept to be explored, the grade level, and the equipment needed. By sequencing these lesson plans so that students develop general body awareness and coordination before finer motor skills—like throwing and catching—the author offers a model of PE instruction that will promote healthy lifestyle choices long after graduation.

teacher appreciation travel theme: *Transculturalism and Teacher Capacity* Niranjana Casinader, 2019-10-16 Based on new research data, with a 135-teacher study over 8 countries, this book challenges the assumption that all teachers automatically have the expertise to teach cultural understanding and argues, instead, that there is the need for teachers to acquire transcultural expertise to teach cultural understanding effectively in the present age, rather than depending on current multicultural and intercultural approaches. By outlining a new model to teach cultural

understanding that is appropriate and relevant, this volume focuses on the expertise of teachers to address this gap in current teaching practice. Using the framework of education in Britain and its former empire, this book traces the role that teachers have played in teaching cultural understanding throughout history, and then uses the results of a recent international research project to outline recommendations for teacher education and professional learning that both develop and enhance the ability of teachers to address cultural understanding effectively in their work. *Transculturalism and Teacher Capacity: Professional Readiness in the Globalised Age* is the perfect resource for any researcher, school leader and educational administrator, or those interested in education that prepares teachers to meet the demands of the profession in the current age.

teacher appreciation travel theme: Mobile Teachers, Teacher Identity and International Schooling Ruth Arber, Jill Blackmore, Athena Vongalis-Macrow, 2015-01-19 *Mobile Teachers, Teacher Identity and International Schooling* focuses on the increased mobility of teachers and curriculum and what it means for the expansion of international schooling. In the early 21st century, educational institutions have been transformed by technological innovation and global interconnectivity. The demographic, ideological, economic and cultural flows that integrate local and global interconnections have consequences for the ways in which educational policy, theories and practice can be understood and take place locally. The everyday lives of practitioners, parents and students; the institutions in which they are educated and work; and the sociocultural and ideological contexts in which they work, are all consequently changing. The manifestation of these changes - as evident in the work and lives of teachers within specific cultural contexts and education systems; in their implications for educational theory and methodology; and their consequences for policy, programs, practice and research in education - are the focus of this book. This book explores the mobility of curriculum, pedagogies, ideas and people that represent and mediate the impact of Global uneven flows and movements through, in, and for school education, and the concepts and practices which frame that transformation. The particular focus of the book is on how these flows inform the ways individuals negotiate their identities, cultures and languages in different national and educational contexts. Education systems and the educational experiences offered by schools are being reconfigured due to multiple pressures. What do these moves to mobilise and to work transnationally mean in terms of educational provision, possibilities and practice?
