teacher appreciation week 2024 ideas for teachers: *What Can I Take Off Your Plate?* Jill Handley, Lara Donnelly, 2024-08-28 Teacher burnout demands systemic solutions, not self-care. Learn what leaders can do to actively reduce frustration and provide real, sustaining support for all staff. With teachers across the board assuming additional responsibilities, stress and job dissatisfaction are more prevalent than ever. Widespread staff shortages, which further increase workloads, and budget directives that require everyone to do more with less continue to demotivate and erode morale. It's no wonder so many teachers choose to leave the profession—or that many who remain feel overworked and unappreciated. The proper response from principals and other school leaders is not to encourage so-called self-care but rather to take a systemic approach that focuses on the factors they can control: time, effort, and resources. To increase teacher retention and alleviate the compounded effects of teacher burnout, leaders need to ask less of their staff and offer them more. In *What Can I Take Off Your Plate?*, veteran educators Jill Handley and Lara Donnelly detail both the immediate steps you can take to triage your staff's emotional exhaustion and the big-picture structural changes you can make to reduce frustration, increase motivation, and support the whole teacher. You'll learn useful ways to * Reduce initiative fatigue. * Give the gift of time. * Support from within the classroom. * Foster and support a healthy work-life balance. * Demonstrate appreciation. * Infuse fun in the workplace. This book is for school leaders who are ready to treat burnout like the complicated challenge it is—and meet it with both focused action and the lasting, sustainable solutions it demands.

teacher appreciation week 2024 ideas for teachers: *Learning to Assess* Christopher DeLuca, Jill Willis, Bronwen Cowie, Christine Harrison, Andrew Coombs, 2024-01-01 This book presents a new framework for how teachers develop their assessment capacity, based on a multi-year study conducted in four countries—Australia, Canada, England, and New Zealand—which focused on student-teacher learning in assessment throughout their initial teacher education programs. It examines how teacher learning is shaped by the complex dynamics of assessment capacity within larger teacher education contexts. The framework proposed here identifies four domains involved in cultivating assessment capacity and characterizes assessment learning as always integrating cognitive, philosophical, and moral dimensions with assessment's social, emotional, and physical dimensions, while recognizing that each capacity is continually shaped by the learning context. The book draws on the survey of teacher education programs in each of the four focal countries and data from student teachers to shed light on how the various pedagogies, program structures, and policies encountered provide beginning teachers with codes for classifying and framing assessment capacity and form a template for developing this capacity throughout their careers. Offering suggestions for future research and teacher education practice, the book concludes with an outlook on future steps to cultivate teachers' assessment capacity.

teacher appreciation week 2024 ideas for teachers: Guidance and Counselling in Schools Namita Ranganathan, Toolika Wadhwa, 2024-02-27 This book addresses guidance and counselling needs of children and adolescents in school settings. Acknowledging that most issues which children and adolescents face do not reach clinical settings and are often addressed by primary caregivers, the book focuses on specific strategies that primary caregivers can use. With an overview of mental health concerns that arise during these developmental stages, the book focuses specifically on the roles that parents and teachers can play. Home and school together play vital roles in the lives of children and adolescents. The book thus recognises the need for them to work together and uses examples from the field to build contexts in which school children and adolescents grow. This is attempted in the backdrop of theories of psychology and mental health therapies. The volume tries to bridge the gap between theory and practical applications of mental health in everyday life. This book would be useful to the students, researchers, and teachers working in the fields of education, psychology, development studies, social work, and sociology. It would also be an invaluable companion to policy-makers, professionals from government and non-government organisations working around education and social development.

teacher appreciation week 2024 ideas for teachers: When You're the New Teacher

Elizabeth Soslau, 2024-10-08 Self-directed, self-paced professional learning teachers can use to build agency and improve their practice, with easy-to-digest ideas that can be implemented in the classroom the next day. Teachers start their professional journey with a clear aim: to teach well so students thrive socially, emotionally, and academically. All too often, though, the hard realities of teaching (mandated curricula, scripted lesson plans, overloaded schedules, students' personal struggles) hamper the best of intentions.
