teach the teacher ideas: Teachers Who Teach Teachers Tom Russell, Fred Korthagen, 2013-09-13 This is a reflection on the education of teachers, written by teacher educators who discuss features of their work and the challenges facing teacher education in the 1990s. The book invites the reader to attempt similar analyses of personal practice and development in their own teaching.; The book deals with the personal development of both new and experienced teacher educators, illustrating how strongly teacher educators are influenced by their visions and by the challenge to prove themselves in the university setting. In addition, the book examines the ways in which teacher educators have acted to promote their own professional development and study their own practices, including writing as a tool for reflection, a life-history approach to self-study, as well as a study of educative relationships with others, and the analysis of a personal return to the classroom. Finally, it takes a broader look at the professional development of teacher educators and offers a challenge to all teacher educators to consider the tension between rigour and relevance.

teach the teacher ideas: Professional Development for Inquiry-Based Science Teaching and Learning Olia E. Tsivitanidou, Peter Gray, Eliza Rybska, Loucas Louca, Costas P. Constantinou, 2018-09-03 This book examines the implementation of inquiry-based approaches in science teaching and learning. It explores the ways that those approaches could be promoted across various contexts in Europe through initial teacher preparation, induction programmes and professional development activities. It illustrates connections between scientific knowledge deriving from the science education research community, teaching practices deriving from the science teachers' community, and educational innovation. Inquiry-Based Science Teaching and Learning (IBST/L) has been promoted as a policy response to pressing educational challenges, including disengagement from science learning and the need for citizens to be in a position to evaluate evidence on pressing socio-scientific issues. Effective IBST/L requires well-prepared and skilful teachers, who can act as facilitators of student learning and who are able to adapt inquiry-based activity sequences to their

everyday teaching practice. Teachers also need to engage creatively with the process of nurturing student abilities and to acquire new assessment competences. The task of preparing teachers for IBST/L is a challenging one. This book is a resource for the implementation of inquiry-oriented approaches in science education and illustrates ways of promoting IBST/L through initial teacher preparation, induction and professional development programmes.

teach the teacher ideas: Becoming a Teacher Educator Anja Swennen, Marcel van der Klink, 2008-11-06 Becoming a Teacher Educator is an impressive book for teacher educators who want to be informed about the latest views and practices of their profession. It is the first book that addresses a range of topics related to the work of teacher educators, the induction of teacher educators and their further professional development. Becoming a Teacher Educator has a practical focus and it provides theoretical insights, experiences of experts and practical recommendations. The book is rooted in the Association of Teacher Education in Europe (ATEE) and many of the chapters are written by authors who are active members of the ATEE. Researchers and practitioners from different parts of Europe, and beyond, joined their efforts to write a book that is truly international and combines research, practice and reflection. Becoming a Teacher Educator is essential reading for novice teacher educators as well as for experienced teacher educators who want to keep up with the latest insights in their profession. This book provides a guide for those who supervise novice and experienced teacher educators and for various professionals who are responsible for the professional development of teacher educators. There is a growing need for evidence-based resources made available to (future) teacher educators. Since a learning society requires new sets of competencies of the main actors, we are most in want of knowledgeable teacher educators that support the professional development of their (student) teachers. This book fits the actual demands. (Dr. Joost Lowyck, Professor Emeritus, former director of the Teacher Education Institute, Leuven University). This is an original book in a very important area. The editors define the concept of 'teacher educator' widely and I think, therefore, that the book is relevant for schools, higher education, and education authorities of all kinds. The authorship and theme have wide relevance across Europe, Australasia and North America. (Prof. Bob Moon, Professor in Education Teaching Studies, Department of Education, Open University, UK). The book highlights that, while the current global focus is very much on the need to educate sufficient and highly qualified teachers, little political focus is given to those who teach the teachers. What makes this book distinctive for all engaged in teacher education, whether experienced or novice, is that it allows the spotlight on those who teach the teachers and the opportunity for teacher educators to discuss, debate and seriously examine themselves as a profession. (Simone White, Deakin University, Australia)

teach the teacher ideas: The Global Assault on Teaching, Teachers, and their Unions L. Weiner, M. Compton, 2008-03-31 Public education's character is increasingly under assault as privatization of education is advanced. This collection of essays by noted scholars, teacher activists, and teacher's union leaders from around the world fuses insights with background and analysis to make real the goal of quality education for all the world's children.
