teacher appreciation questions for students: *Assessing Contexts of Learning* Susanne Kuger, Eckhard Klieme, Nina Jude, David Kaplan, 2016-12-05 This volume brings together educational effectiveness research and international large-scale assessments, demonstrating how the two fields can be applied to inspire and improve each other, and providing readers direct links to instruments that cover a broad range of topics and have been shown to work in more than 70 countries. The book's initial chapters introduce and summarize recent discussions and developments in the conceptualization, implementation, and evaluation of international large-scale context assessments and provide an outlook on possible future developments. Subsequently, three thematic sections - "Student Background", "Outcomes of Education Beyond Achievement", and "Learning in Schools" - each present a series of chapters that provide the conceptual background for a wide range of important topics in education research, policy, and practice. Each chapter defines a conceptual framework that relates recent findings in the educational effectiveness research literature to current issues in education policy and practice. These frameworks were used to develop interesting and relevant indicators that may be used for meaningful reporting from international assessments, other cross-cultural research, or national studies. Using the example of one particular survey (the Programme for International Student Assessment (PISA 2015)), this volume links all theoretical considerations to fully developed questionnaire material that was field tested and evaluated in questionnaires for students and their parents as well as teachers and principals in their schools. The primary purposes of this book are to inform readers about how education effectiveness research and international large-scale assessments are already interacting to inform research and policymaking; to identify areas where a closer collaboration of both fields or input from other areas could further improve this work; to provide sound theoretical frameworks for future work in both fields; and finally to relate these theoretical debates to currently available and evaluated material for future context assessments.

teacher appreciation questions for students: In Search of Wonderful Ideas Mary Kay Delaney, Susan Jean Mayer, 2021 Drawing on the work of Eleanor Duckworth, this volume examines Critical Exploration in the Classroom (CEC)—a learning-teaching research practice that positions teachers as researchers of their students' sense-making and learners as theorizers and investigators. By integrating CEC into their teacher education classrooms, chapter authors have found that they can reliably unsettle their teacher candidates' understandings about the nature of teaching and learning and recenter their attention on the intellectual originality and creativity of all young people. In this way, CEC provides valuable tools in the work of creating more equitable and democratic classrooms. Such tools are needed in a broader environment that overvalues instrumental approaches to achieving specified learning outcomes. Readers will find practices that empower and sustain the deep intellectual engagement of all learners. Integrating classroom narratives and other forms of documentation, this resource illustrates the kinds of profound changes in understanding

that have occurred for teacher candidates as a result of working with CEC. Book Features: Opens both the teacher educator and teacher candidates to new ways of teaching, learning, and being in classrooms. Demonstrates how the practice works to counter deficit thinking by revealing students' brilliance. Uses narratives and other forms of documentation to characterize the potential of CEC within a diverse array of teacher education classrooms. Portrays the many ways in which CEC has been integrated into different disciplinary and institutional settings, illustrating the common intellectual and interpersonal dynamics at work. Chapter authors all studied Critical Exploration in the Classroom (CEC) with its originator, Eleanor Duckworth.
