teacher and student story: Love Is a Story Robert J. Sternberg, 1999-06-03 In this groundbreaking work, Robert Sternberg opens the book of love and shows you how to discover your own story--and how to read your relationships in a whole new light. What draws us so strongly to some people and repels us from others? What makes some relationships work so smoothly and others burst into flames? Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us. Drawing on extensive research and fascinating examples of real couples, Sternberg identifies 26 types of love story--including the fantasy story, the business story, the collector story, the horror story, and many others--each with its distinctive advantages and pitfalls, and many of which are clashingly incompatible. These are the largely unconscious preconceptions that guide our romantic choices, and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships. As long as we remain oblivious to the role our stories

play, we are likely to repeat the same mistakes again and again. But the enlivening good news this book brings us is that though our stories drive us, we can revise them and learn to choose partners whose stories are more compatible with our own. Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner. Are you a traveler, a gardener, a teacher, or something else entirely? Love is a Story shows you how to find out.

teacher and student story: Reflecting Teachers’ Real Life Stories Paulus Kuswandono, Aprilia Arnis Ginting, 2021-02-24 This book is intended to be a reflection source for Pre-Service English Teachers (PSETs) in Micro Teaching Class. PSETs' ability is not only seen from their ability to teach with their good command of English proficiency, but also seen from their ability to infuse the students' soft skills. The targeted soft skill to acquire after learning from this book is the students' ability to improve their problem-solving skills in facing classroom complex issues in the teaching and learning process. The crucial goal of problem-based learning in this setting is to improve the capacity of PSETs to be able to solve authentic complex problems in a school context by being active decision-makers. As a reflection source, this book does not provide answers or solutions to the problems raised in the narratives. Instead, the students are asked to actively explore their imagination, feelings, and cognitive rationale to approach the problems from different angles and perspectives.

teacher and student story: Starting to Teach Latin Steven Hunt, 2016-02-11 This handbook for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. teacher and student story: Metaphors We Teach By Dr. Ken Badley, Harro Walter Van Brummelen, 2012-06-01 Metaphors We Teach By helps teachers reflect on how the metaphors they use to think about education shape what happens in their classrooms and in their schools. Teaching and learning will differ in classrooms whose teachers think of students as plants to be nurtured from those who consider them as clay to be molded. Students will be assessed differently if teachers think of assessment as a blessing and as justice instead of as measurement. This volume examines dozens of such metaphors related to teaching and teachers, learning and learners, curriculum, assessment, gender, and matters of spirituality and faith. The book challenges teachers to embrace metaphors that fit their worldview and will improve teaching and learning in their classrooms.

teacher and student story: Teacher-Student Power Relations in Primary Schools in Hong Kong Mei-Yee Wong, 2014-12-11 This book examines, from a sociological perspective, teacher-student power relations in classroom learning and teaching. The case study consists of four Hong Kong primary schools—and sixteen classrooms therein—that were selected as research sites to explore the concept of teacher-student power relations. Observations, individual interviews, and document analysis were the main data collection methods employed. Wong provides the historical

context for the issue of teacher-student power relationship by reviewing the traditional Chinese cultures and values, in particular the values of respect for authority and for teachers, and demonstrates the intermingling of Chinese and Western cultures in contemporary Hong Kong Chinese society. She reviews the major educational initiatives carried out in Hong Kong since the 1970s, showing how Western educational policies promoting student-centric teaching modes have encouraged changes in classroom culture. With reference to the observed seventy-three lessons, the study identified three patterns of teacher-student power relations—Teacher Domination, Relatively Balanced Opportunity for Power Sharing, and Student Self-Empowerment—each involving different degrees of power being exercised by teacher and students. The coexistence of these three power patterns and the two corresponding power situations (student empowerment and disempowerment) can be explained as the result of multileveled, intertwined interactions among six factors related to social culture, education policy, school and classroom contexts, and to the individual players concerned. The book thus contributes to the understanding of teacher-student power relations in the context of Hong Kong by proposing a theoretical framework that reflects local socio-cultural, educational, and school contexts.
