teacher and student anime: *Tooning In* Cameron White, Trenia Walker, 2007-12-14 A collection of eloquent essays, *Tooning In* critically examines and interprets the concept of popular culture. What are the differences between traditional and transformative approaches to popular culture? With essays specifically devoted to film, music, television, games, and other alternative popular culture texts, *Tooning In* invites readers to re-examine the fundamental aspects of popular culture as a societal force.

teacher and student anime: *Transgressing Teacher Education* Alice E. Ginsberg, 2022-02-15 This book is a series of original strategies that teacher educators, teacher candidates and practicing teachers can use to think critically about issues of equity, diversity, opportunity, and social justice in urban education. As the demographic of students in America is quickly becoming a “majority minority” we need teachers more than ever who can teach to diverse student populations, can utilize

culturally relevant pedagogy, and have critically reflected on their own biases and stereotypes. We also need to empower teachers who are committed to social justice to navigate through school systems that are rife with structural inequities. This book will help ensure that teacher candidates are getting this preparation and able to continue to reflect on these issues in their practice. The book is designed as a “textbook” or more accurately “workbook” with original strategies and critical reflection and discussion questions included in each chapter. The strategies can be done sequentially or in any order. In addition, they will be able to read counternarratives from their peers, which should encourage them to persist in the profession even when things get rough

teacher and student anime: Language Teachers' Stories from their Professional Knowledge Landscapes Lesley Harbon, Robyn Moloney, 2017-06-23 Language Teachers' Professional Knowledge Landscapes is a collection of fourteen narratives from teachers of different languages, at different school levels, in different contexts across Australia. This volume brings together not simply language teacher stories, but also more political stories of the problems associated with school programs and contexts. Highlighted through these stories are some of the major political issues in schools that impact language teachers' work, and their students' success in sustained language study. The book is conceptually framed by the work of Clandinin and Connelly (1996) and their notion of 'levels' of stories told by teachers about their classrooms: the secret, the sacred and the cover stories. The term 'professional knowledge landscape' is used to indicate how teachers can critically situate their work, and thereby understand it better. The collection includes the stories of two outstanding primary language educators, and a story of mixed success in a rural program in teaching the local Aboriginal language (Ngarrabul). There are stories of frustration with policy failures, particularly in supporting the learning of Asian languages. Many of the teacher narrators ask the confronting question: 'What blocks language learning in Australia?' They offer the strategies which they have developed, that they see making a difference. Other narratives offer autoethnographic tracking of careers, for example, as a teacher of Latin and Classics, Japanese, French, Spanish, Russian, and of teachers' ongoing vigour and creativity in advocacy. A number of teachers examine their own identity story for the intercultural learning, which they then offer and extend in student learning. Consistently expressed, there is the need for teachers to take up individual responsibility, while still being strongly supported by their professional community: 'It is us' who make the difference, one teacher concludes. Supported by a strong Foreword by Canadian scholar F. Michael Connelly, this ground-breaking collection of narratives represents a form of social research in providing critical illustrations of the issues needing attention for national language education enhancement. It is the only extended inquiry into language teaching in the context of an active policy initiative environment, and the first volume to address the language education landscape through the voices of active language teachers.

teacher and student anime: Anime's Identity Stevie Suan, 2021-11-09 A formal approach to anime rethinks globalization and transnationality under neoliberalism Anime has become synonymous with Japanese culture, but its global reach raises a perplexing question—what happens when anime is produced outside of Japan? Who actually makes anime, and how can this help us rethink notions of cultural production? In Anime's Identity, Stevie Suan examines how anime's recognizable media-form—no matter where it is produced—reflects the problematics of globalization. The result is an incisive look at not only anime but also the tensions of transnationality. Far from valorizing the individualistic “originality” so often touted in national creative industries, anime reveals an alternate type of creativity based in repetition and variation. In exploring this alternative creativity and its accompanying aesthetics, Suan examines anime from fresh angles, including considerations of how anime operates like a brand of media, the intricacies of anime production occurring across national borders, inquiries into the selfhood involved in anime's character acting, and analyses of various anime works that present differing modes of transnationality. Anime's Identity deftly merges theories from media studies and performance studies, introducing innovative formal concepts that connect anime to questions of dislocation on a global scale, creating a transformative new lens for analyzing popular media.

teacher and student anime: Culturally Responsive and Sustaining Science Teaching

Elaine V. Howes, Jamie Wallace, 2024-04-18 How can research into culturally responsive and sustaining education (CRSE) inform and transform science teaching and learning? What approaches might teachers use to study CRSE in their classrooms? What are teachers learning from their research that might be transferable to other classrooms and schools? In this practical resource, teacher researchers from the Culturally Responsive and Sustaining Education Professional Learning Group based in New York City provide insights for educators on how to address complex educational and sociocultural issues in the science classroom. Through individual and collaborative research studies, chapters help readers understand various approaches to developing and implementing CRSE strategies in their classrooms and promote students' identification with and affinity for science. Teachers describe the questions driving their investigations, data, and findings, and reflect on their roles as agents of change. Chapters also feature discussion and reflection questions, and include examples of assignments, protocols, and student work that teachers have piloted in their classes. This book is ideal for pre-service and in-service science teachers and teacher educators across grade levels. It provides support for professional learning activities, as well as undergraduate and graduate teacher education courses. It may be particularly useful in science methods, multicultural education; and diversity, equity, and inclusion courses with a focus on CRSE.
