teacher and student movies: Exploring Teachers in Fiction and Film Melanie Shoffner, 2016-03-31 This book about teachers as characters in popular media examines what can be learned from fictional teachers for the purposes of educating real teachers. Its aim is twofold: to examine the constructed figure of the teacher in film, television and text and to apply that examination in the context of teacher education. By exploring the teacher construct, readers are able to consider how popular fiction and film have influenced society's understandings and views of classroom teachers. Organized around four main themes—Identifying with the Teacher Image; Constructing the Teacher with Content; Imaging the Teacher as Savior; The Teacher Construct as Commentary—the chapters examine the complicated mixture of fact, stereotype and misrepresentation that create the image of the teacher in the public eye today. This examination, in turn, allows teacher educators to use popular culture as curriculum. Using the fictional teacher as a text, preservice—and practicing—teachers can examine positive and negative (and often misleading) representations of teachers in order to develop as teachers themselves.

teacher and student movies: Teachers, Teaching, and Media , 2019-06-24 Popular representations of teachers and teaching are easy to take for granted precisely because they are so accessible and pervasive. Our lives are intertextual in the way lived experiences overlap with the

stories of others presented to us through mass media. It is this set of connected narratives that we bring into classrooms and into discussions of educational policy. In this day and time—with public education under siege by forces eager to deprofessionalize teaching and transfer public funds to benefit private enterprises—we ignore the dominant discourse about education and the patterns of representation that typify educator characters at our peril. This edited volume offers a fresh take on educator characters in popular culture and also includes important essays about media texts that have not been addressed adequately in the literature previously. The 15 chapters cover diverse forms from literary classics to iconic teacher movies to popular television to rock ‘n’ roll. Topics explored include pedagogy through the lenses of gender, sexuality, race, disability, politics, narrative archetypes, curriculum, teaching strategies, and liberatory praxis. The various perspectives represented in this volume come from scholars and practitioners of education at all levels of schooling. This book is especially timely in an era when public education in the United States is under assault from conservative political forces and undervalued by the general public. Contributors are: Steve Benton, Naeemah Clark, Kristy Liles Crawley, Elizabeth Currin, Mary M. Dalton, Jill Ewing Flynn, Chad E. Harris, Gary Kenton, Mark A. Lewis, Ian Parker Renga, Stephanie Schroeder, Roslin Smith, Jeff Spanke, and Andrew Wirth.

teacher and student movies: Women in Chinese Martial Arts Films of the New Millennium Ya-chen Chen, 2012-01-01 *Women and Gender in Chinese Martial Arts Films of the New Millennium*, by Ya-chen Chen, is an excavation of underexposed gender issues focusing mainly on contradictory and troubled feminism in the film narratives. In the cinematic world of martial arts films, one can easily find representations of women of Ancient China released from the constraints of patriarchal social order to revel in a dreamlike space of their own. They can develop themselves, protect themselves, and even defeat or conquer men. This world not only frees women from the convention of foot-binding, but it also unbinds them in terms of education, critical thinking, talent, ambition, opportunities to socialize with different men, and the freedom or right to both choose their spouse and decide their own fate. Chen calls this phenomenon Chinese cinematic martial arts feminism. The liberation is never sustaining or complete, however; Chen reveals the presence of a glass ceiling marking the maximal exercise of feminism and women's rights which the patriarchal order is willing to accept. As such, these films are not to be seen as celebrations of feminist liberation, but as enunciations of the patriarchal authority that suffuses Chinese cinematic martial arts feminism. The film narratives under examination include *Crouching Tiger, Hidden Dragon* (directed by Ang Lee); *Hero* (Zhang Yimou); *House of the Flying Daggers* (Zhang Yimou); *Seven Swords* (Tsui Hark); *The Promise* (Chen Kaige); *The Banquet* (Feng Xiaogang); and *Curse of the Golden Flower* (Zhang Yimou). Chen also touches upon the plots of two of the earliest award-winning Chinese martial arts films, *A Touch of Zen* and *Legend of the Mountain*, both directed by King Hu.

Dalton, 2010 *The Hollywood Curriculum* is a sophisticated and thoughtful look at the portrayal of teachers in film and television in an exceptionally accessible way. Dalton draws on some of the most relevant and exciting theory to evaluate teacher films and demonstrates a masterful insight into the worlds of education and film studies. This book is a must-read for those interested in exploring the intersection of teaching, curriculum, film/television, and society, and is an outstanding contribution to the literature. —Alan S. Marcus, Associate Professor of Curriculum and Instruction, University of Connecticut; Author of *Celluloid Blackboard: Teaching History with Film* and *Teaching History with Film: Strategies for Secondary Social Studies* —Book Jacket.

teacher and student movies: Teacher-Student Relationships Ernest J. Zarra III, 2013-04-08 Why are so many public school teachers, administrators, and coaches choosing to become romantically and sexually involved with teenage students and players? Since 2000, numbers of intimate relationships between teachers and students have skyrocketed. Teacher arrests are at all-time highs. Is there a correlation between these relationships and communication and social technologies? The book explores: What is driving those in public and private education to have romantic and sexual relationships with their students, and to jeopardize their careers, families, reputations, and freedom? What roles do communication and social technologies play in feeding teacher-student relationships? Who is protecting teenagers from predator-teachers and predator-coaches, in our schools? Is there a new phenomenon in schools: The Predator Teenage Student? What practical strategies can be put in place to protect teenagers from sexual predators on our campuses? The appropriate educational use of communication technologies on high school campuses. This book is provocative and relevant for educators at all levels, public and private. teacher and student movies: Teaching, Learning, and Schooling in Film Daniel P. Liston, Ian Renga, 2014-12-05 Films about education provide many of the most popular interpretations of what teaching and learning mean in schools. An analysis of this medium reveals much about the historical, cultural, political, and philosophical dimensions of education. Timely and engaging, this book fills a gap for scholarly and informed public commentary on the portrayal of education in film, offering a wide range of conceptual and interpretive perspectives. Teaching, Learning, and Schooling in Film explores several key questions, including: What does it mean to be a good teacher? How do these good teachers instruct? When is and what makes teaching complex? What constitutes learning? Do educational reforms work? The book's interdisciplinary group of contributors answers these important questions in essays highlighting Hollywood, independent, and documentary films. Prospective and practicing teachers will engage with the thought-provoking educational issues raised in this book and gain insight into the complexities of teaching and learning portrayed in film.

teacher and student movies: Keywords in Youth Studies Nancy Lesko, Susan Talburt, 2012-03-22 With recent attention to issues such as youth social exclusion, poverty, school underachievement, school violence, gang activity, sexuality, and youth's interactions with media and the internet, youth studies has emerged as a significant interdisciplinary field. Contributors include internationally-renowned field experts who trace the origins, movements, and uses and meanings of keywords such as resistance, youth violence, surveillance, and more. The blending of section essays with focused keywords offers beginning and advanced readers multiple points of entry into the text and connections across concepts. A must-read for graduate students, faculty, and researchers across a range of disciplines, this extraordinary new book promotes new interdisciplinary approaches to youth research and advocacy.

teacher and student movies: Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of

self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented, as opposed to learning oriented, when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria, and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together, in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation, and learning is equally imperative for future research and educational practice, both of which need to go beyond individual opinions and convictions.

teacher and student movies: From Teacher to Lover Tara Star Johnson, 2008 In the decade since Mary Kay Letourneau's infamous liaison with her sixth-grade student was exposed, the reporting of sexual misconduct cases among teachers has proliferated. The amount of media attention - to women teachers in particular - has increased because the public is titillated and baffled by such cases of aberrant female sexuality. This is a qualitative case study of two high school English teachers, Hannah and Kim, who each had a sexual relationship with a student. Their cases are examined, along with those of Letourneau and Heather Ingram, two headline-heavy teachers whose backgrounds and patterns of behavior within the relationships are similar to Hannah's and Kim's. Without judging or sympathizing, this book elucidates the process by which these women crossed the ethical and professional line from teacher to lover. Teacher educators concerned about raising issues of gender, sexuality, and embodiment in their classes will find this a thorny but compelling text for generating dialogue about the taboo topic of bodies in education.

teacher and student movies: Critical Pedagogy and the Everyday Classroom Tony Monchinski, 2008-06-28 Critical Pedagogy addresses the shortcomings of mainstream educational

theory and practice and promotes the humanization of teacher and student. Where Critical Pedagogy is often treated as a discourse of academics in universities, this book explores the applications of Critical Pedagogy to actual classroom situations. Written in a straight-forward, concise, and lucid form by an American high school teacher, drawing examples from literature, film, and, above all, the everyday classroom, this book is meant to provoke thought in teachers, students and education activists as we transform our classrooms into democratic sites. From grading to testing, from content area disciplines to curriculum planning and instruction, from the social construction of knowledge to embodied cognition, this book takes the theories behind Critical Pedagogy and illustrates them at work in common classroom environments.

In an effort to clarify some of the confusion, the authors have included all the information available to them on almost 3,300 films. Each entry includes a listing of the production company, the cast and crew, distributors, running times, reviews with star ratings whenever possible, and alternate film titles. A list of film series and one of the stars' pseudonyms, in addition to a 7,900 name index, are also included. Illustrated.

teacher and student movies: *Seeking Integrity in Teacher Education* Ann Katherine Schulte, 2008-11-01 In this book, a teacher educator examines her practice as a way of learning about teaching as well as challenging teacher education. It is about how one teacher educator sought to transform the perspectives of her student teachers, in order to better prepare them to teach diverse populations of students, while challenging her own beliefs about how best to do that. The author seeks integrity in her practice, defined as her ability to enact what she teaches preservice teachers to do. In particular, this book is a self-study that contributes to understanding the broader question: How much can one affect and change the discourse within education when one also inhabits the characteristics that are privileged by the institution? The teacher education literature supports the need to study this type of self-reflection. Other researchers have pointed out that the role of teacher educators' cultural identities in reforming education has been largely ignored in the literature. This book offers a unique perspective on the analogous relationship involved when a teacher educator teaches teachers how to examine the impact of their own identities on their teaching while examining that herself.
