**teacher appreciation week 2024 daily ideas:** What Can I Take Off Your Plate? Jill Handley, Lara Donnelly, 2024-08-28 Teacher burnout demands systemic solutions, not self-care. Learn what leaders can do to actively reduce frustration and provide real, sustaining support for all staff. With teachers across the board assuming additional responsibilities, stress and job dissatisfaction are more prevalent than ever. Widespread staff shortages, which further increase workloads, and budget directives that require everyone to do more with less continue to demotivate and erode morale. It's no wonder so many teachers choose to leave the profession—or that many who remain feel overworked and unappreciated. The proper response from principals and other school leaders is not to encourage so-called self-care but rather to take a systemic approach that focuses on the factors they can control: time, effort, and resources. To increase teacher retention and alleviate the compounded effects of teacher burnout, leaders need to ask less of their staff and offer them more. In What Can I Take Off Your Plate?, veteran educators Jill Handley and Lara Donnelly detail both the immediate steps you can take to triage your staff's emotional exhaustion and the big-picture structural changes you can make to reduce frustration, increase motivation, and support the whole teacher. You'll learn useful ways to \* Reduce initiative fatigue. \* Give the gift of time. \* Support from within the classroom. \* Foster and support a healthy work-life balance. \* Demonstrate appreciation. \* Infuse fun in the workplace. **teacher appreciation week 2024 daily ideas: Of Mind and Machine** Chunshen Zhu, Chengzhi Jiang, 2024-06-28 *Of Mind and Machine* provides a broad perspective on multi-level dialogic engagements between text and reader as seen from the use of language in presenting information to generate a discursive experience in various sociocultural settings. The book observes contexts such as national literature in translation, diplomatic speech events, visual-verbal inter-semiotic translation, second language learning, interpreter training, and computer-aided teaching of translation and bilingual writing. rhetoric and pragmatics. The research embodies a significant prospect of integration of academic originality with technological innovation to advance language education in the present digital era. Theoretically well-founded, the book does not confine itself to a self-contained system of conceptions and methods. Instead, it demonstrates a rich variety of research possibilities in support of theorisation and education in the field of language and translation studies. This edited volume is primarily intended for advanced undergraduates, postgraduates, researchers, and teachers within the fields of language and translation, applied linguistics, and discourse analysis.
