teacher at oxford crossword: *The Teachers of Spiritual Wisdom* Duncan S. Ferguson, Jamal Rahman, Mary Petrina Boyd, 2021-05-03 We call attention to the harsh reality that we are living in troubled times. We are especially conscious of climate change and COVID-19. We underline that these challenges impact all people. In light of this reality, we use ten primary questions that all human beings ask, consciously or unconsciously, and then amplify each of the ten primary questions with nine additional sub-questions. We then draw upon one of the great teachers of spiritual wisdom (Buddha, Moses, Jesus, Muhammad, etc.) with a brief quote and then write a short wisdom response to the question. By wisdom we mean a body of accumulated reflection about the character and meaning of life. Spiritual wisdom suggests an outlook or attitude that enables us to cope, a deeper way of knowing and learning the art of living in rhythm with the soul. We use the life experience of three authors, coming from different religious and cultural outlooks.

teacher at oxford crossword: Laugh Lines Carrie Conners, 2022-04-19 Humor in recent American poetry has been largely dismissed or ignored by scholars, due in part to a staid reverence for the lyric. *Laugh Lines: Humor, Genre, and Political Critique in Late Twentieth-Century American Poetry* argues that humor is not a superficial feature of a small subset, but instead an integral feature in a great deal of American poetry written since the 1950s. Rather than viewing poetry as a lofty, serious genre, Carrie Conners asks readers to consider poetry alongside another art form that has burgeoned in America since the 1950s: stand-up comedy. Both art forms use wit and laughter to rethink the world and the words used to describe it. Humor's disruptive nature makes it especially whetted for critique. Many comedians and humorous poets prove to be astute cultural critics. To that end, *Laugh Lines* focuses on poetry that wields humor to espouse sociopolitical critique. To show the range of recent American poetry that uses humor to articulate sociopolitical critique, Conners highlights the work of poets working in four distinct poetic genres: traditional, received forms, such as the sonnet; the epic; procedural poetry; and prose poetry. Marilyn Hacker, Harryette

Mullen, Ed Dorn, and Russell Edson provide the main focus of the chapters, but each chapter compares those poets to others writing humorous political verse in the same genre, including Terrance Hayes and Anne Carson. This comparison highlights the pervasiveness of this trend in recent American poetry and reveals the particular ways the poets use conventions of genre to generate and even amplify their humor. Connors argues that the interplay between humor and genre creates special opportunities for political critique, as poetic forms and styles can invoke the very social constructs that the poets deride.

teacher at oxford crossword: Giovanni Gentile and the State of Contemporary Constructivism James Wakefield, 2015-02-12 This book presents Giovanni Gentile's actual idealism as a radical constructivist doctrine for use in moral theory. The first half describes the moral theory that Gentile explicitly identifies with actual idealism, according to which all thinking, rather than an exclusive domain of 'practical reason', has a moral character. It is argued that after Gentile's turn to Fascism in the early 1920s, this theory is increasingly conflated with his political doctrine. This entails several major changes that cannot be squared with the underlying metaphysics. The second half of the book develops a more plausible account of Gentilean moral constructivism based on the pre-Fascist idea of reasoning as an internal dialogue. Comparisons and contrasts are drawn with contemporary constructivist doctrines, as well as theories employing dialogical conceptions of reason. The internal dialogue is presented as a device enabling the thinking subject to make objective judgments about real-world problems despite the impossibility of her occupying a fully objective standpoint. Thus actual idealist moral theory is offered as an example of constructivism at its most radical, inviting advocates of less radical varieties to reassess the foundations on which their theories are built.

teacher at oxford crossword: *Instrumentalising Foreign Language Pedagogy in Translator and Interpreter Training* Olaf Immanuel Seel, Silvia Roiss, Petra Zimmermann-González, 2023-06-15 This volume offers a wide array of cutting-edge original research on the implementation of Foreign Language Pedagogy in translator and interpreter training, a still rather unexplored field of research in Translation Studies. It is divided in two distinct sections. The first section focuses on theoretical approaches to this topic. The chapters of this section will offer the reader valuable new knowledge and thoughts on how to update and enrich academic curricula as well as how to make use of cognitive linguistics and to implement a multicultural approach in the demanding domain of translator and interpreter training. The second practical section comprises a series of diverse methods and didactical means of Foreign Language Pedagogy which are creatively adapted to fit in language and translation/interpreting teaching for translation/interpreting trainees, aiming at fostering their translational sub-competences. The volume's overarching aim is to clearly emphasise that foreign language teaching for translation and interpreting trainees has to be approached and structured differently than conventional language teaching in other academic disciplines. It is useful for scholars and translation/interpreting teachers who want to enrich translator/interpreter training with new interdisciplinary ideas and knowledge which will significantly assist them in enhancing the translation/interpreting competence of their students.
