teacher appreciation day 2024 deals: *Teaching Higher-Order Thinking to Young Learners, K-3* Steffen Saifer, 2024-09-20 To be truly educated today, students need more than knowledge; they need higher-order thinking skills. Critical and creative thinking is required to recognize and counter disinformation, to overcome thinking errors, and to be successful in school and life. To effectively teach these skills, we must start early, when young minds are still forming. While K-3 students are capable of higher-order thinking, most lessons engage only their lower-order thinking. In this comprehensive book based on sound science, Dr. Saifer offers many practical and engaging ways to develop students' logical, critical, and creative thinking skills within nearly every lesson, in all subject areas, and throughout the day. *Teaching Higher-Order Thinking to Young Learners, K-3: How to Develop Sharp Minds for the Disinformation Age* is key reading for any early childhood teacher, leader, or parent.

teacher appreciation day 2024 deals: *Learning in Depth* Kieran Egan, 2011-01-15 For generations, schools have aimed to introduce students to a broad range of topics through curriculum that ensure that they will at least have some acquaintance with most areas of human knowledge by the time they graduate. Yet such broad knowledge can't help but be somewhat superficial—and, as Kieran Egan argues, it omits a crucial aspect of true education: deep knowledge. Real education, Egan explains, consists of both general knowledge and detailed understanding, and in *Learning in Depth* he outlines an ambitious yet practical plan to incorporate deep knowledge into basic education. Under Egan's program, students will follow the usual curriculum, but with one crucial addition: beginning with their first days of school and continuing until graduation, they will each also study one topic—such as apples, birds, sacred buildings, mollusks, circuses, or stars—in depth. Over the years, with the help and guidance of their supervising teacher, students will expand their understanding of their one topic and build portfolios of knowledge that grow and change along with them. By the time they graduate each student will know as much about his or her topic as almost anyone on earth—and in the process will have learned important, even life-changing lessons about the meaning of expertise, the value of dedication, and the delight of knowing something in depth. Though Egan's program may be radical in its effects, it is strikingly simple to implement—as a number of schools have already discovered—and with *Learning in Depth* as a blueprint, parents, educators, and administrators can instantly begin taking the first steps toward transforming our schools and fundamentally deepening their students' minds.

teacher appreciation day 2024 deals: *Leading under Duress* Jean-Pierre Bongila, 2024-11-15 This comparative study of teacher attrition in the Global South and OECD countries examines the exceptionality of twenty selected learning leaders in the D.R. Congo, Ghana, and Uganda who have stayed in the teaching profession and led their student learning with devotion and integrity. Like any learning leader, exceptional teachers live the challenges and pressures that have caused some of their peers to leave the profession. The extraordinary learning leaders - from elementary, secondary, and higher education - have stood victorious amid education devaluations and professional tensions. The author gives voice to those "exceptional" teachers and analyzes the ethical rationale behind their unfailing commitment to their teaching vocation. Their teaching philosophies and personal accounts revealed altruistic impulses. This book further explores the exceptional teachers' narratives and their selfless actions through the lens of philanthropic and leadership ethics theories. Although the exceptional teachers' altruism appears self-sacrificing - it embodies some form of self-benefit because one can hardly fathom altruism for altruism's sake. Nevertheless, the twenty exceptional teachers acted in a self-sacrificing manner. The author appeals to the Global South countries to implement education policies that should redecorate the profession of learning leadership.
