teacher and students images: Reaching and Teaching Students with Special Needs Through Art Beverly Levett Gerber, Doris M. Guay, Jane Burnette, 2024-09-30 This second edition of Reaching and Teaching Students with Special Needs Through Art is written for art educators, special educators, and those who value the arts for students with special needs. It builds on teachers' positive responses to the first edition, and now combines over 700 years of the educational experience of arts and special educators who share their art lessons, behavior management strategies, and classroom stories. The revised second edition provides updated chapters addressing students with emotional/behavioral disabilities, learning disabilities, intellectual disabilities, physical disabilities, and visual and hearing impairments. The newly revised second edition includes chapters on students with autism spectrum disorder, preschool students, and students experiencing trauma. All chapters have been updated to include current definitions and language, recommended teaching strategies, art lesson adaptations, behavior management strategies, and references to related chapters. Follow-up activities are provided for further insights into each group of students. A new summary chapter connects how the authors' collaborations resulted in changes to two professional organizations. Since the first edition, many of the featured authors established the new Division of Visual and Performing Arts Education (DARTS) at the Council for Exceptional Children (CEC) and earlier, formed a new National Art Education Association (NAEA) Interest group—Special Needs in Art Education (SNAE), now Arts in Special Education (ASE). This edition is ideal for preservice arts methods courses and education courses on accessibility and inclusion at the undergraduate and graduate levels. It continues to offer current yet proven best practices for reaching and teaching this ever-important population of students through the arts.

teacher and students images: Ideating Pedagogy in Troubled Times Shalin Lena Raye, Stephanie Masta, Sarah Taylor Cook, Jake Burdick, 2019-10-01 We began the call for this book by asking authors to ideate on activism -to take up and seek to extend- the interbraided values from the Curriculum and Pedagogy group's espoused mission and vision, collocating activist ideologies, theoretical traditions, and practical orientations as a means of creatively, reflectively, and productively responding to the increasingly dire social moment. This moment is framed by a landscape denigrated beyond even Pinar's (2004) original declaration of the present-as-nightmare. The current, catastrophic political climate provides challenges and (albeit scant) opportunities for

curriculum scholars and workers as we reflect on past and future directions of our field, and grapple with our locations and roles as educators, researchers, practitioners, and beings in the world. These troubled times force us to think critically about our scholarship and pedagogy, our influence on educational practices in multiple registers, and the surrounding communities we claim to serve. This is where the call began: from a desire to think through modern conceptions regarding what counts as activism in the fields of education, curriculum, and pedagogy, and to consider how activist voices and enactments might emerge differently through curriculum and pedagogy writ large. A guiding source of inspiration for this book, weaving among the emerging themes between the collected manuscripts, reflections, and poems, was a passage in Sara Ahmed's (2013) book, *The Cultural Politics of Emotion*. In this passage, Ahmed works through the complicated relationship between the testimonies of pain that injustice causes, the recognition of this pain, and the potential of these wounds to move us into a different relationship with healing (p. 200). The chapters, reflections, and poems within this volume, thus, effect a collective ideation on how specific cultural politics and deleterious ideological formations – racism, colonialism, homophobia, ableism, to name only a few – persist and mobilize. The authors seek to expose and name some of these injustices, asking readers not only see and hear these experiences, but to inhabit our complicities in their promulgation. It is important to acknowledge that these named social troubles do not exist in isolation, and will enmesh, weave, wind, and entangle with one another. The section headings parallel Ahmed's (2013) own ideations: testimony, recognition, and wounds, not as a formula to follow as an activist call, or as a model for a means to a more just end, but as a way to engage in these issues as a trope of activist confrontation of readers who are, as many of our authors suggest, complicit in maintaining many of these social troubles. The chapters do not need to be read in any particular order, though the ordering of the chapters moves from the naming of social troubles, to showing how teaching, research, and theory ask us to take a more active role in recognizing and acknowledging the prevalence of these issues, and then theorizing ways to engage the wounds.

thermodynamics, ecology and economics into “ecodynamics.” It is not only a platform to present novel research related to ecological problems from all over the world, but it also gives opportunities for new emergent ideas in science arising from the cross fertilization of different disciplines, including mathematical models and eco-informatics, evolutionary thermodynamics and biodiversity, structures in ecosystems modelling and landscapes to mention but a few. This book contains papers presented at the the Eighth International Conference in the well-established conference series on Ecosystems and Sustainable Development. teacher and students images: *The Status of Social Studies* Jeff Passe, Paul G. Fitchett, 2013-10-01 A team of researchers from 35 states across the country developed a survey designed to create a snapshot of social studies teaching and learning in the United States. With over 12,000 responses, it is the largest survey of social studies teachers in over three decades. We asked teachers about their curricular goals, their methods of instruction, their use of technology, and the way they address the needs of English language learners and students with disabilities. We gathered demographic data too, along with inquiries about the teachers' training, their professional development experiences, and even whether they serve as coaches. The enormous data set from this project was analyzed by multiple research teams, each with its own chapter. This volume would be a valuable resource for any professor, doctoral student, or Master's student examining the field of social studies education. It is hard to imagine a research study, topical article, or professional development session concerning social studies that would not quote findings from this book about the current status of social studies. With chapters on such key issues as the teaching of history, how teachers address religion, social studies teachers' use of technology, and how teachers adapt their instruction for students with disabilities or for English language learners, the book's content will immediately be relevant and useful.
