teacher keys effectiveness system login: Yes, We Are Stupid in America! Dr. Vicky Wells, 2013-01-21 Students in countries such as Finland, South Korea, and Singapore continue to outperform their peers in America. But that hasn't stopped the United States government from spending more money on education as achievement plummets. Dr. Vicky Wells, a former school principal, explores what's going on at the federal, state, and local levels so that members of the

public can hold bureaucrats accountable. In a series of reality checks, she explains how to meet the growing crisis head on; equip students with the necessary skills upon graduation; make decisions based upon the input of real-life educators; and ignore politics in order to best serve students. Teachers and parents trust leaders to make decisions based on what's best for the students. Even so, all too often, decision making seems to be more about politics and quid pro quo and this does not best serve students, educators, or the community. The educational system continues to decline, and students keep dropping out or graduating without the knowledge they need to succeed. It's time to stop constantly changing curriculum and start focusing on the real problems confronting teachers and students.

teacher keys effectiveness system login: English Language Learners in the Southeastern United States Ester J. de Jong, Eric Dwyer, Mary Elizabeth Wilson-Patton, 2024-07-25 This book examines the impact of and response to the rapidly growing English language learner (ELL) populations in the southeastern United States on K-16 schooling. Using examples of policy and practice from seven states (Alabama, Arkansas, Florida, Georgia, North Carolina, and Tennessee), the book explores how the contemporary context of accountability regimes and neoliberal tenets affect educational responses to the increased linguistic and cultural diversity in schools and how these realities may be different from when traditional states (such as California or Florida) were developing their responses to (im)migration. The collection of chapters addresses key questions of teacher preparation, effective infrastructures, and frameworks for serving ELLs, dual language bilingual education, and advocacy efforts at the state, district, and local level in the Southeast. The authors describe promising practices in each state, but also note the need for more systemic, statewide approaches that resist the enduring monolingual discourse that has historically characterized much of ELL schooling. They call for transformative policies and practices that take current research into account and that stress the centrality of pluralistic principles to design effective schools for ELLs.

teacher keys effectiveness system login: *Mandy Hoffen and a Conspiracy to Resurrect Life and Social Justice in Science Curriculum with Henrietta Lacks* Dana Compton McCullough, 2021-06-01 This book is a theoretical inquiry into alternative pedagogies that challenge current standardized practices in the field of science education. Through Mandy Hoffen, a fictional persona, Dana McCullough, the author, explores how stories of Henrietta Lacks become part of a conspiracy to change science education. Mandy Hoffen, however, never expected to find herself in the middle of a conspiracy. As a science teacher of 20 plus years, she worked diligently to meet the needs of her charges, who are currently ninth and tenth grade biology students in an age of standardized testing. The author also creates imaginary dialogues which serve as the theoretical framework for each chapter. Each chapter unfolds in a form of a play with imaginary settings and events that bring Henrietta Lacks back from the grave to participate in conversations about science, society, and social justice. The imaginary conversations are based on the author's experiences in graduate courses, direct quotations from philosophers of science, historians of science, science educators, curriculum theorists, and stories of students in their study of Henrietta Lacks in a high school biology classroom. The play describes the journey of a graduate student/high school teacher as she researches the importance of the philosophy of science, history of science, science curriculum and social justice in science education. Through reflections on fictional conversations, stories of Henrietta Lacks are examined and described in multiple settings, beginning in an imaginary academic meeting, and ending with student conversations in a classroom. Each setting provides a space for conversations wherein participants explore their personal connections with science,

science curriculum, issues of social justice related to science, and Henrietta Lacks. This book will be of interest to graduate students, scholars, and undergraduates in curriculum studies, educational foundations, and teacher education, and those interested in alternative research methodologies. This is the first book to intentionally address the stories of Henrietta Lacks and their importance in the field of curriculum studies, science studies, and current standardized high school science curriculum.
