teacher man frank mccourt: *Transcendental Learning* John P. Miller, 2012-01-01

Transcendental Learning discusses the work of five figures associated with transcendentalism concerning their views on education. Alcott, Emerson, Fuller, Peabody and Thoreau all taught at one time and held definite views about education. The book explores these conceptions with chapters on each of the five individuals and then focuses the main features of transcendental learning and its legacy today. A central thesis of the book is that transcendental learning is essentially holistic in nature and provides rich educational vision that is in many ways a tonic to today's factory like approach to schooling. In contrast to the narrow vision of education that is promoted by governments and the media, the Transcendentalists offer a redemptive vision of education that includes: -educating the whole child-body, mind, and soul, -happiness as a goal of education. -educating students so they see the interconnectedness of nature, -recognizing the inner wisdom of the child as something to be honored and nurtured, - a blueprint for environmental education through the work of Thoreau, - an inspiring vision for educating women of all ages through the work of Margaret Fuller, - an experimental approach to pedagogy that continually seeks for more effective ways of educating children, - a recognition of the importance of the presence of teacher and encouraging teachers to be aware and conscious of their own behavior. -a vision of multicultural and bilingual education through the work of Elizabeth Peabody The Transcendentalists, particularly Emerson and Thoreau, sewed the seeds for the environmental movement and for non-violent change. Their work eventually influenced Gandhi and Martin Luther King Jr. and it continues to resonate today in the thinking of Aung Sang Suu Kyi and the Dalai Lama. The Transcendentalists' vision of education is worth examining as well given the dissatisfaction with the current educational scene. Endorsements: A Transcendental Education provides a powerfully hopeful, integrative, and holistic vision that can help guide education out of its current vacuum. The book is thoughtfully explicated, expertly synthesized and completely relevant for anyone interesting in helping education find itself. Like the transcendentalists themselves, this is both down-to-earth and soaring in its potential implications. Tobin Hart author of *The Secret Spiritual World of Children* and *From Information to Transformation: Education for the Evolution of Consciousness*. The secret to a vital, renewed America lies in the life and writings of the Transcendentalist community of Concord, Massachusetts in the 19th century. Jack Miller, who I know has been devoted to a new, living form of education throughout his career, has written a book that could inspire a revolution in teaching. It goes against the tide, as do Emerson and Thoreau. But it offers a blueprint and a hope for our children. Thomas Moore, author of *Care of the Soul*.
