teacher elf on the shelf ideas classroom: Dynamically Different Classrooms Claire Gadsby, 2019-05-16 In Dynamically Different Classrooms: Create spaces that spark learning, Claire Gadsby and Jan Evans provide teachers with a visually striking masterclass on how to maximise the potential of every cubic inch of the learning environment. Classrooms are private places. A lucky few - consultants and inspectors among them - get to visit hundreds of classrooms a year, yet many teachers never get the opportunity to see how other practitioners 'do it'. In Dynamically Different Classrooms, however, experienced educators Claire and Jan take away the guesswork by inviting teachers into a unique journey of classroom discovery that shows them how to design and use the

space within their classroom in such a way that enhances their pupils' learning experiences. Bursting with a rich variety of practical ideas, this inspiring guide to the great indoors talks you through the 'clue corners', 'ceiling circuits' and 'windows of opportunity' waiting to be discovered in your classroom and shares 148 high-impact techniques proven to boost pupils' engagement, long-term learning and progress. The techniques are dispersed across five chapters - each covering a specified aspect of the classroom (e.g. wall displays) - and are tagged to cross-reference with the following six key themes in order to help you navigate your own pathway through the chapters according to your development priorities: Metacognition and self-regulated learning Emotional engagement Retrieval and revision Responsive teaching Oracy and 'word wealth' Collaborative learning. The strategies can be adapted for use with all age groups and will stimulate busy teachers to reimagine the learning space through a more creative lens. Each theme is underpinned by robust research in the book's introduction, in which the authors discuss the key findings and explore how effective classroom design can help unlock the potential of various pedagogical approaches. The book also features a range of illuminating case studies from various schools across the UK, and is beautifully decorated with full-colour photographs that capture the techniques in action to make it even easier for you to adopt and adapt these design principles in your own dynamically different classroom. Suitable for teachers, trainees, teaching assistants and senior leaders in both primary and secondary schools. Chapters include: Chapter 1 - Beyond displays: from static to dynamic; Chapter 2 - Nothing wasted: storing learning to resurrect and revive later; Chapter 3 - Floors: not just for standing or sitting on; Chapter 4 - Zoning: one classroom, endless possibilities; Conclusion: the legacy of the learning. Customer Notice: this book contains a large amount of full colour images, therefore any digital version would be better rendered by being viewed using a device with a colour display.

teacher elf on the shelf ideas classroom: Positive Behavior Support at the Secondary "Targeted Group" Level Laura A. Riffel, Melinda Mitchiner, 2014-09-04 Seal the gaps in student learning with targeted intervention Research on positive behavior support has focused largely on tier one, school-wide disciplinary policies, and tier three interventions tailored to highly problematic students. This leaves a gap in the middle. Yellow zone, or tier two, interventions are an extremely effective way to address many challenging behavior and disciplinary issues in small group settings. Positive Behavior Support at the Secondary Targeted Group Level shows teachers how to identify the students who can benefit from tier two interventions and demonstrates how to create an implementation plan that delivers results. Focusing on proactive strategies rather than reactive solutions, Riffel and Mitchiner's research-based techniques include: General strategies that can be applied at the individual student level, such as self-management, proximity control, and the Premack principle and peer mentoring Comprehensive action plans that anticipate the full range of disruptions that may occur A useful behavior rating sheet proven effective in improving student behavior Funk Sway For The Classroom: Using Feng Shui principles to create a classroom environment that enhances productivity, learning, and creativity Apply the techniques in this book to reduce challenging behavior, improve school climate, and improve outcomes for ALL students. This book is easy to read, understand, and implement in any classroom or school. Teachers will be drawn to the resources that can be copied and used immediately! I can't wait to apply some of these practices in my classroom! Rachel Spenner, Sixth Grade Teacher Westridge Elementary School

teacher elf on the shelf ideas classroom: The Library Collaboration and Flexible

Scheduling Toolkit Andria C. Donnelly, 2015-03-19 Appropriate for experienced elementary librarians as well as students in school library preparation programs, this powerful book explains the advantages of utilizing a flexible schedule with collaboration as compared to a fixed schedule without collaboration. The aptly titled *The Library Collaboration and Flexible Scheduling Toolkit: Everything You Need to Know to Get Started* takes readers step by step through the process of considering collaboration as a method to deliver library services. Authored by an experienced elementary librarian and author for *School Library Monthly* and *School Library Connection*, the text begins by explaining the relevant research and underscoring the importance of being able to articulate the meaning of the research to library stakeholders. Next, readers learn how to gain support from administration and to train the staff in effective collaboration to impact student achievement. The book provides a complete answer to the complex question that many librarians and librarians in training have: How do I go about putting collaboration and a flexible library schedule into place in my library? Specific methods and solutions for handling problems that may come up—such as ways to win over a reluctant staff, or what to do in situations where a library assistant is not available—are provided to lend the author's real-world experience to the challenges that the librarian might encounter in undertaking collaboration.

teacher elf on the shelf ideas classroom: The Broken Rung Kweilin Ellingrud, Lareina Yee, Maria del Mar Martinez, 2025-03-11 The broken rung is more pervasive than the glass ceiling in holding women back from career success. Three McKinsey senior partners offer strategies for overcoming it and fulfilling your potential. Women around the world do extremely well when it comes to their education. They graduate at higher rates than men and have higher average GPAs. But then a strange thing happens: upon entering the workforce, they immediately lose their advantage. When the first promotions come around, the slide continues. For every 100 men promoted to manager, only 81 women overall and 77 women of color get promoted. This is what McKinsey senior partners Kweilin Ellingrud, Lareina Yee, and María del Mar Martínez call the broken rung, and its effects compound throughout women's careers, causing them to fall behind at the start and keeping them from catching up. In this groundbreaking book, the authors reveal the problem's underlying cause: while about half of a person's lifetime earnings come from education and half from work experience, men get more value from their experience than women do. It is also here, in one's work experience, that the solution lies: women need to build their experience capital to level the playing field and maximize their earning potential. The book combines over a decade of research, personal conversations with more than fifty remarkable leaders, and the authors' own rich experiences as leaders at McKinsey. They weave data on the potential pitfalls with inspiring and instructive stories of women who have climbed over the broken rung using strategies that increased their experience capital. Leaders and companies must do more to address gender inequalities in the workplace. But you don't have to wait. *The Broken Rung* is your guide, right now, for moving up the career ladder and reaching your full potential at work.

teacher elf on the shelf ideas classroom: Resiliency in Action Nan Henderson, Bonnie Benard, Nancy Sharp-Light, 2007 How to build bounce-back kids, families, schools, and communities is the theme of *Resiliency In Action: Practical Ideas for Overcoming Risks and Building Strengths in Youth, Families, and Communities*. It is edited by internationally recognized resiliency expert, trainer, and consultant Nan Henderson, M.S.W., whose publications are used in more than 25 countries. The book is a research-based, practical guide for educators, counselors, parents, community organizers, and mentors and is filled with the latest strategies for helping children, families, schools, and communities bounce back from risk, stress, trauma, and adversity. More than two dozen experts in the fields of child, family, organizational, and community resiliency contributed to the book, which challenges a widely accepted myth about people especially young people, who experience risks, stress, trauma, and adversity in their lives, according to Henderson. Contrary to popular opinion, the majority of these individuals, over time, do bounce back and do well. There is a growing body of scientific research from several fields that documents this fact and yields important information as to what can be done every day to facilitate this process of overcoming. This book is

really three books in one: it contains the most recent research, hands-on and practical strategies, and stories of resilient individuals and best practices. The book includes 60 chapters grouped in seven sections: The Foundations of Resiliency, Resiliency and Schools, Resiliency and Communities, Resiliency Connections (Mentoring, Support, and Counseling), Resiliency and Youth Development, Resiliency and Families, and Resiliency and the Brain.
