teacher of the year spencer: *Herbert Spencer: Collected Writings* Herbert Spencer, 2021-03-24 Herbert Spencer (1820-1903) was regarded by the Victorians as the foremost philosopher of the age, the prophet of evolution at a time when the idea had gripped the popular imagination. Until recently Spencer's posthumous reputation rested almost exclusively on his social and political thought, which has itself frequently been subject to serious misrepresentation. But historians of ideas now recognise that an acquaintance with Spencer's thought is essential for the proper understanding of many aspects of Victorian intellectual life, and the present selection is designed to answer this need. It provides a cross-section of Spencer's works from his more popular and approachable essays to a number of the volumes of the *Synthetic Philosophy* itself. Volume I: An Introduction to the Philosophy of Herbert Spencer.

teacher of the year spencer: *Phoenix in Academe* Malcolm Paul Douglass, 2010-05-27 As a young man, Malcolm Douglass talked with his father Aubrey about the difficult formative years of Claremont Colleges. *Phoenix in Academe* grew out of those intimate conversations with his father and others, like William Clary, Jerry Voorhis, E. Wilson Lyon, Robert Bernard, his mother Evelyn Douglass, and of course the author of the Claremont Plan, James A. Blaisdell, who had inspired so many. Why did Blaisdell's Plan fail? Why did Aubrey Douglass abandon Claremont? And how did the Claremont Graduate School (now University) emerge from its ashes. This is a personal history in the best sense, founded upon a forty-year commitment to the Graduate University and upon years of work in the Claremont archives. *Phoenix in Academe* is an elegy for and a celebration of the dream that almost was—and the vision that took its place.

teacher of the year spencer: *Knowing and Teaching Elementary Mathematics* Liping Ma, 2020-01-06 The 20th anniversary edition of this groundbreaking and bestselling volume offers powerful examples of the mathematics that can develop the thinking of elementary school children. Studies of teachers in the U.S. often document insufficient subject matter knowledge in mathematics. Yet, these studies give few examples of the knowledge teachers need to support teaching, particularly the kind of teaching demanded by reforms in mathematics education. *Knowing*

and Teaching Elementary Mathematics describes the nature and development of the knowledge that elementary teachers need to become accomplished mathematics teachers, and suggests why such knowledge seems more common in China than in the United States, despite the fact that Chinese teachers have less formal education than their U.S. counterparts. Along with the original studies of U.S. and Chinese teachers' mathematical understanding, this 20th anniversary edition includes a new preface and a 2013 journal article by Ma, A Critique of the Structure of U.S. Elementary School Mathematics that describe differences in U.S. and Chinese elementary mathematics. These are augmented by a new series editor's introduction and two key journal articles that frame and contextualize this seminal work.

teacher of the year spencer: *The Roth Family, Anthropology, and Colonial Administration* Russell McDougall, Iain Davidson, 2016-06-03 No family better represents the overlapping roles of administrator and scientist in the British empire than the Roths. Descended from a Hungarian emigrant to Australia, two generations of Roths served the empire on four continents and, at the same time, produced ethnographic, archaeological, and linguistic studies that form the basis for much modern research. This volume assesses the often-conflicting roles and contributions of the Roths as government servants and anthropologists. Most of the volume deals with Walter E. Roth, who developed foundational studies of both the Australian Aborigines—considered to be among the first systematic ethnographies anywhere—and South American tribes while serving as Chief Protector of Aborigines in Queensland and later medical officer, magistrate, museum curator and indigenous relations officer in British Guyana. Henry Ling Roth's contributions to the anthropology of Tasmania, Benin, Sarawak, and New Zealand are also enumerated, as are the publications and administrative activities of the succeeding generation of Roths. This volume serves the reader as a family biography, a slice of the English colonial history, and an important introduction to the history of anthropology.
