teacher pictures and quotes: *Proactive Images for Pre-Service Teachers* Jeremy Delamarter, 2019-03-23 This book provides tools to help pre-service teachers and teacher-preparation programs identify, evaluate, and respond to misaligned expectations early in the teacher-preparation sequence. Plato tells the story of prisoners who mistake the shadows on the wall of their cave for flesh-and-blood reality. These "shadow narratives" dominated their expectations, and when confronted with a three-dimensional reality that bore little resemblance to the shadows, the prisoners were blinded by the light. Surrounded by images and rhetoric that reduce the fullness of teaching to flat, two-dimensional representations, today's pre-service teachers tend to develop expectations of teaching that resemble the shadows more than they resemble reality. These misaligned expectations often lead to practice shock: the painful and disillusioning cognitive dissonance that comes about when unsustainable expectations collide with real-world practice. Intended as a proactive manual for mitigating practice shock, this book shines a light on the shadows by giving pre-service teachers the tools to examine, confront, and revise their own misaligned expectations of teaching before they reach the point of crisis.

teacher pictures and quotes: *Agency through Teacher Education* Ryan Flessner, Grant Miller, Julie Horwitz, Kami Patrizio, 2012-12-27 *Agency through Teacher Education: Reflection, Community, and Learning* addresses the ways that agency functions for those involved in twenty-first-century teacher education. This book, commissioned by the Association of Teacher Educators, relies on the voices of teacher education candidates, in-service teachers, school leaders, and university-based educators to illustrate what agency looks like, sounds like, and feels like for people trying to act as agents of change. These examples take the form of narratives, theoretical explorations, formal research studies, and reflective essays. *Agency through Teacher Education* does not seek to establish one definition for agency, but rather to conceptualize it from three perspectives: reflective practice, community engagement/activism, and organizational learning. The book seeks to explore ways stakeholders in- and outside the classroom become agents of change, as well as the traditional and non-traditional roles played out in teacher education programs across the United States.

teacher pictures and quotes: *Teach Your Child To Swim Through Games And Play* Mark Young, 2024-03-25 Discover 60 games that use little or no equipment and that cover all of the essential basics of learning to swim, including breathing, floating, submerging, gliding, kicking and pulling. Explore games and activities that teach them all. Using games and play to teach your child how to swim will not only open their mind to imagination and engagement, but it will help to distract them from the fears and anxieties often associated with the new sensations of being in the water and the expectations that come with learning how to swim. 'I'm Mark Young, a swimming teacher with 30 years experience, and let me tell you, teaching my own three children to swim was a nightmare! They did not want to listen to Dad and just wanted to play. So, I gave up trying to teach them and let them play. Then it hit me. By playing and doing their own thing, they discovered the water for themselves. So I began to weave in some basic swimming skills and elements of swimming lessons into their games and, because it was a game, they were willing participants. Without knowing, they were learning how to swim as part of their play. Use the games and tools in my book and you can do

the same. Have fun!'

teacher pictures and quotes: *Assessment in Online and Blended Learning Environments* Selma Koç, Xiongyi Liu, Patrick Wachira, 2015-03-01 Online and blended learning requires the reconstruction of instructor and learner roles, relations, and practices in many aspects. Assessment becomes an important issue in non-traditional learning environments. Assessment literacy, i.e., understanding assessment and assessment strategies, is critical for both instructors and students in creating online and blended environments that are effective for teaching and learning. Instructors need to identify and implement assessment strategies and methods appropriate to online or blended learning. This includes an understanding of the potential of a variety of technology tools for monitoring student learning and improving their teaching effectiveness. From the students' perspective, good assessment practices can show them what is important to learn and how they should approach learning; hence, engaging them in goal-oriented and self-regulatory cognitions and behaviors. The book targets instructors, instructional designers, and educational leaders who are interested in understanding and implementing either summative or formative assessment in online and blended learning environments. This book will assist the relevant audience in the theory and practice of assessment in online and blended learning environments. Providing both a research and practice perspective, this book can help instructors make the connection between pedagogy and technology tools to maximize their teaching and student learning. Among the questions addressed in this book are: • What assessment strategies can be used in online or blended learning? • How can instructors design effective assessment strategies? • What methods or technology tools can be used for assessment in online or blended learning? • How does peer-assessment work in online or blended learning environments?

teacher pictures and quotes: *The Educator's Handbook for Teaching with Primary Sources* Scott M. Waring, 2023 Educators across subject areas are striving to integrate primary sources into their pedagogy and teaching. Yet, despite their importance to authentic disciplined inquiry, the implementation of primary source activities in the pre-K-12 classroom has been limited. This lack of utilization can largely be attributed to the perception that these activities are too complex to design, implement, and grade. Many teachers also feel that primary source analysis and the construction of evidence-based narratives is too difficult for students to complete in the traditional classroom. Waring argues that this is not the case and, with this handbook, provides teacher candidates and inservice teachers with detailed and specific perspectives, activities, approaches, and resources to help them effectively and authentically use primary sources in their classrooms. Book Features: Introduces teaching with primary sources, including detailed examples of authentic and tested instructional ideas and approaches. Designed to meet the needs of classroom teachers and teacher candidates in social studies, English and language arts, mathematics, science, and other fields. Offers dozens of primary sources and links to resources throughout the book. Aligns to national standards, frameworks, and the C3 framework for social studies. Can be used to meet the needs of emerging English learners and students with special needs. Focuses on ways in which educators are utilizing a variety of emerging technologies to engage students in deeper and more authentic ways

of learning.

Interviews with historians open each chapter to bring the reader into important conversations about the most cutting edge issues in U.S. history today and are followed by essays from expert teachers on the rewards and challenges of implementing these topics in the classroom.
