team lead assessment walmart: International Multi-Unit Leadership Chris Edger, 2016-04-22 In International Multi-Unit Leadership, Chris Edger builds on his earlier Effective Multi-Unit Leadership. First - showcasing up-to-date, contemporaneous case studies of market-leading international organisations - the book takes a cross-border perspective on leading from the middle in international subsidiaries that are committing significant capital to land-based

multi-unit infrastructures. Secondly, it captures the zeitgeist of internationalizing hospitality, retail, service and leisure organizations facing challenges in relation to multi-channel/smart technology spread, divergent national cultures and emergent, imitative local competition. Thirdly, it addresses the conundrum that most subsidiary multi-unit leaders (regional, area and district managers) face, generating commitment amongst their unit managers and team members, whilst coping with their firm's country of origin-based control and change agendas. Continuing the themes that emerged in his earlier book, particularly around how multi-unit leaders (MULs) and directors are expected to expedite a number of competing and contradictory functions, the author finds that in subsidiary-based international situations, complexity and ambiguity escalates due to 'distance decay' and the level of internal and external contextual turbulence. Based on exemplary case studies, the author examines how high-performance MULs manage paradox and ambiguity within an international context and how organizations can deliver local effectiveness within a strategic framework determined by a policy-making centre hundreds or thousands of miles away. The research and case studies in this book will appeal to managers within international multi-unit enterprises, service directors wishing to train and coach others, students on any of the increasing number of multi-unit management programmes being run in business schools, and academics with an interest in internationalizing service-based enterprises.

More than just a gaming technology, VR is top of mind for academics, tech reportage, and industry evangelists who all see the potential for VR to revolutionize fields such as education and health, as well as the way we work and communicate. But will VR achieve all this? In *Fantasies of Virtual Reality*, Marcus Carter and Ben Egliston strip bare the tech industry's vision of a future dominated by immersive VR experiences, challenging the

utopian promises of this technology's potential. Carter and Egliston offer a critical account of VR in a variety of contexts, from gaming to human resources to policing and the military. They argue that while VR does hold significant potential, the overhyped expectations surrounding it, from achieving true empathetic understanding to transforming traditional education and office work, are often overstated and fraught with issues of privacy, control, and exclusion. Drawing on numerous challenging leadership experiences while serving on six boards of directors for publicly traded companies and leading the University of Arkansas, Georgia Tech's engineering college, National Science Foundation's engineering directorate, and numerous professional associations, he provides practical guidance on navigating your leadership journey.
