

technical university of cluj napoca

technical university of cluj napoca stands as one of Romania's premier institutions for higher education in engineering and technology. Established with a commitment to advancing scientific knowledge and technological innovation, it has grown into a reputable university attracting students from across the globe. The university offers a diverse range of academic programs, state-of-the-art research facilities, and a dynamic campus life. This article explores the history, academic offerings, research initiatives, campus facilities, student life, and international collaborations of the Technical University of Cluj Napoca. Through this comprehensive overview, prospective students and academic professionals can gain valuable insights into what makes this institution a leader in technical education. The following sections will guide readers through the various aspects of the university in detail.

- History and Background
- Academic Programs and Faculties
- Research and Innovation
- Campus Facilities and Resources
- Student Life and Extracurricular Activities
- International Cooperation and Partnerships

History and Background

The Technical University of Cluj Napoca was founded in 1948 and has since developed into a significant center for technical education in Romania. Initially established as an institute for polytechnic studies, the university has expanded its academic scope and infrastructure over the years. Its evolution reflects the broader industrial and technological progress in Eastern Europe, adapting to the changing demands of the labor market and technological advancements.

Founding and Early Development

In its early years, the university focused primarily on engineering disciplines crucial to post-war reconstruction and industrialization. The institution quickly gained recognition for its rigorous curriculum and practical training approach, producing skilled engineers who contributed to Romania's economic development.

Growth and Modernization

Throughout the decades, the Technical University of Cluj Napoca invested heavily in modernizing its laboratories and research centers. The introduction of new faculties and interdisciplinary programs has positioned the university as a modern technical school with a strong emphasis on innovation and entrepreneurship.

Academic Programs and Faculties

The Technical University of Cluj Napoca offers a broad spectrum of undergraduate, master's, and doctoral programs across various technical and engineering disciplines. The university is organized into several faculties, each specializing in different areas of science and technology, ensuring comprehensive educational coverage.

Faculties Overview

Currently, the university is composed of multiple faculties including:

- Faculty of Mechanical Engineering
- Faculty of Electrical Engineering
- Faculty of Automation and Computer Science
- Faculty of Architecture and Urban Planning
- Faculty of Materials Science and Engineering
- Faculty of Electronics, Telecommunications and Information Technology

Degree Programs

The academic programs are designed to balance theoretical knowledge with practical application. Bachelor's programs typically span 3 to 4 years, while master's and doctoral studies offer opportunities for specialization and research in cutting-edge technological fields. Programs are accredited and aligned with the European Higher Education Area standards, facilitating student mobility and international recognition.

Research and Innovation

Research is a core pillar of the Technical University of Cluj Napoca, with emphasis on developing new technologies and advancing scientific knowledge. The university actively participates in national and European research projects, fostering innovation and collaboration with industry partners.

Research Centers and Laboratories

The university hosts several specialized research centers focusing on areas such as renewable energy, advanced manufacturing, robotics, and information technology. Equipped with modern laboratories and experimental facilities, these centers provide a fertile ground for scientific discovery and technological development.

Innovation and Technology Transfer

Encouraging entrepreneurship and innovation, the university supports technology transfer initiatives that facilitate the commercialization of research outcomes. Incubators and startup support programs help students and researchers transform ideas into viable business ventures, contributing to regional economic growth.

Campus Facilities and Resources

The campus of the Technical University of Cluj Napoca is designed to support both academic and extracurricular activities, offering students access to modern infrastructure and resources necessary for a comprehensive educational experience.

Academic Infrastructure

Classrooms, lecture halls, and laboratories are equipped with the latest technology to enhance teaching and learning. The university also provides extensive library resources, including digital databases and specialized collections to support research and study.

Student Amenities

On-campus facilities include student dormitories, sports complexes, dining halls, and recreational areas. These amenities contribute to a vibrant campus life, promoting social interaction and physical well-being among the student community.

Student Life and Extracurricular Activities

Beyond academics, the Technical University of Cluj Napoca offers a wide range of extracurricular activities that enrich the student experience. These activities foster personal development, leadership skills, and community engagement.

Clubs and Organizations

Students can join various clubs related to technology, culture, sports, and social causes. These organizations provide opportunities for teamwork, networking, and practical application of knowledge in real-world contexts.

Events and Competitions

The university regularly hosts academic competitions, workshops, conferences, and cultural events that encourage student participation and showcase talents. These events also help build connections between students, faculty, and industry professionals.

International Cooperation and Partnerships

The Technical University of Cluj Napoca maintains a strong international presence through collaborations with universities, research institutions, and companies worldwide. These partnerships enhance academic quality and provide students with global exposure.

Exchange Programs

Through programs such as Erasmus+, students and faculty members have opportunities to study, teach, and conduct research abroad. These exchanges promote cross-cultural understanding and broaden academic horizons.

Joint Research and Collaborative Projects

International cooperation includes joint research initiatives addressing global technological challenges. Collaborative projects often involve multidisciplinary teams working on innovative solutions and knowledge sharing across borders.

Frequently Asked Questions

What programs are offered at the Technical University of Cluj-Napoca?

The Technical University of Cluj-Napoca offers a wide range of undergraduate, master's, and doctoral programs in engineering, computer science, architecture, automation, electronics, and related technical fields.

Where is the Technical University of Cluj-Napoca located?

The Technical University of Cluj-Napoca is located in Cluj-Napoca, Romania, which is a major city in the Transylvania region.

Is the Technical University of Cluj-Napoca recognized internationally?

Yes, the Technical University of Cluj-Napoca is recognized internationally and participates in various Erasmus+ exchange programs and international research collaborations.

What facilities are available for students at the Technical University of Cluj-Napoca?

Students at the Technical University of Cluj-Napoca have access to modern laboratories, libraries, computer centers, sports facilities, and student dormitories.

How can international students apply to the Technical University of Cluj-Napoca?

International students can apply to the Technical University of Cluj-Napoca through the university's official website by submitting required documents such as previous transcripts, proof of language proficiency, and a completed application form.

What research opportunities are available at the Technical University of Cluj-Napoca?

The Technical University of Cluj-Napoca offers numerous research opportunities in fields like robotics, renewable energy, artificial intelligence, and materials science, often collaborating with industry partners and European research projects.

Additional Resources

1. History and Evolution of Technical University of Cluj-Napoca

This book offers a comprehensive overview of the origins and development of the Technical University of Cluj-Napoca. It traces the institution's growth from its founding years through its

expansion into a leading technical university in Romania. Readers will gain insight into key milestones, influential figures, and the university's contributions to engineering education.

2. Engineering Innovations at Technical University of Cluj-Napoca

Focusing on groundbreaking research and projects, this book highlights the innovative engineering solutions developed by faculty and students at the university. It covers areas such as civil engineering, electrical engineering, and computer science. The book also discusses collaboration with industry partners and the impact of these innovations on local and global scales.

3. Academic Programs and Curriculum Design at Technical University of Cluj-Napoca

This volume explores the academic framework and curriculum strategies employed by the university to maintain a high standard of technical education. It details various undergraduate and postgraduate programs, emphasizing interdisciplinary approaches and modern teaching methods. The book is useful for educators looking to understand or replicate successful program designs.

4. Campus Life and Student Experiences at Technical University of Cluj-Napoca

Providing a vivid picture of student life, this book shares stories and testimonials from current and former students. It covers extracurricular activities, student organizations, and support services that enrich the university experience. The book also addresses challenges faced by students and how the university community fosters personal and professional growth.

5. Research Centers and Laboratories at Technical University of Cluj-Napoca

This publication presents an in-depth look at the university's specialized research facilities. It describes key laboratories, their equipment, and ongoing research projects across various technical disciplines. The book serves as a resource for researchers and prospective students interested in cutting-edge technological studies.

6. Technical University of Cluj-Napoca: Partnerships and International Collaborations

Highlighting the university's global outreach, this book details partnerships with other academic institutions, industry leaders, and international organizations. It showcases exchange programs, joint research initiatives, and collaborative conferences. The book emphasizes the importance of global connectivity in advancing technical education and research.

7. Sustainability and Green Technologies at Technical University of Cluj-Napoca

This book focuses on the university's commitment to environmental sustainability through education, research, and campus initiatives. It covers projects related to renewable energy, sustainable construction, and eco-friendly technologies developed by the university community. Readers will find case studies demonstrating the practical applications of green innovations.

8. Notable Alumni of Technical University of Cluj-Napoca

Featuring biographies and achievements, this book celebrates the distinguished alumni who have made significant contributions in engineering, academia, industry, and public service. It provides inspiration through personal stories of success and the impact these individuals have had locally and internationally. The book also explores how the university shaped their careers.

9. Future Directions for Technical University of Cluj-Napoca

Looking ahead, this book discusses strategic plans and visions for the university's future development. It outlines goals related to expanding research capabilities, enhancing educational quality, and fostering innovation ecosystems. The book is a valuable resource for policymakers, university officials, and stakeholders interested in the institution's growth trajectory.

technical university of cluj napoca: Mechanisms, Transmissions and Applications

Erwin-Christian Lovasz, Burkhard J. Corves, 2011-11-02 The first Workshop on Mechanisms, Transmissions and Applications -- MeTrApp-2011 was organized by the Mechatronics Department at the Mechanical Engineering Faculty, "Politehnica" University of Timisoara, Romania, under the patronage of the IFToMM Technical Committees Linkages and Mechanical Controls and Micromachines. The workshop brought together researchers and students who work in disciplines associated with mechanisms science and offered a great opportunity for scientists from all over the world to present their achievements, exchange innovative ideas and create solid international links, setting the trend for future developments in this important and creative field. The topics treated in this volume are mechanisms and machine design, mechanical transmissions, mechatronic and biomechanic applications, computational and experimental methods, history of mechanism and machine science and teaching methods.

technical university of cluj napoca: Mining Intelligence and Knowledge Exploration

Richard Chbeir, Yannis Manolopoulos, Rajendra Prasath, 2022-12-14 This book constitutes revised selected papers from the refereed proceedings of the 9th International Conference on Mining Intelligence and Knowledge Exploration, MIKE 2021, which took place in Hammamet, Tunisia, in November 2021. The 22 full papers included in this book were carefully reviewed and selected from 61 submissions. They deal with topics such as evolutionary computation, knowledge exploration in IoT, artificial intelligence, machine learning, data mining and information retrieval, medical image analysis, pattern recognition and computer vision, speech / signal processing, text mining and natural language processing, intelligent security systems, Smart and Intelligent Systems, etc.

technical university of cluj napoca: The 19th International Conference on Soft Computing Models in Industrial and Environmental Applications SOCO 2024 Héctor Quintián, Emilio Corchado, Alicia Troncoso Lora, Hilde Pérez García, Esteban Jove, José Luis Calvo Rolle, Francisco Javier Martínez de Pisón, Pablo García Bringas, Francisco Martínez Álvarez, Álvaro Herrero Cosío, Paolo Fosci, 2024-11-15 This volume of Advances in Intelligent and Soft Computing contains accepted papers presented at the SOCO 2024 conference held in the beautiful and historic city of Salamanca (Spain) in October 2024. Soft computing represents a collection or set of computational techniques in machine learning, computer science, and some engineering disciplines that investigate, simulate, and analyze very complex issues and phenomena. After a thorough peer-review process, the 18th SOCO 2023 International Program Committee selected 62 papers for publication in these conference proceedings, representing an acceptance rate of 50%. In this relevant edition, a particular emphasis was put on organizing special sessions. Four special sessions were organized related to relevant topics such as Machine Learning and Computer Vision in Industry 4.0, Intelligent Models and Frameworks for Smart Agriculture and Green Economy, Computational Intelligence Applied to Modelling and Control of Engineering Systems, and Applied Machine Learning (2nd Edition). The selection of papers was extremely rigorous to maintain the high quality of the conference. We want to thank the members of the Program Committees for their hard work during the reviewing process. This is a crucial process for creating a high-standard conference; the SOCO conference would not exist without their help.

technical university of cluj napoca: Engineering Education J. Paulo Davim, 2014-10-17

Information about engineering education is highly relevant for improving communication between

professors, researchers and students in engineering schools, institutions, laboratories and industry. Technological change is fundamental to the development of education systems. Engineering Education emphasises curriculum development, pedagogy and didactic aspects of engineering education, covering relevant aspects from more classical engineering courses such as mechanical, manufacturing, industrial, chemical, environmental, civil and systems courses, to more contemporary courses including nano-engineering and bioengineering along with information on sustainable development in the context of engineering education. - Rigorously covers this timely and relevant area - A diverse range of subjects examined by international experts - Written by highly knowledgeable and well-respected experts in the field

technical university of cluj napoca: *Proceedings of EUCOMES 08* Marco Ceccarelli, 2008-11-27 The EUCOMES08, Second European Conference on Mechanism Science is the second event of a series that has been started in 2006 as a conference activity for an European community working in Mechanism Science. The first event was held in Obergurgl, Austria in 2006. This year EUCOMES08 Conference has come to Cassino in Italy taking place from 17 to 20 September 2008. The aim of the EUCOMES Conference is to bring together European researchers, industry professionals and students from the broad ranges of disciplines referring to Mechanism Science, in an intimate, collegial and stimulating environment. In this second event we have received an increased attention to the initiative, as can be seen by the fact that the EUCOMES08 Proceedings will contain contributions by authors even from all around the world. This means also that there is a really interest to have not only a conference frame but even a need of aggregation for an European Community well identified in Mechanism Science with the aim to strengthen common views and collaboration activities among European researchers and institutions. I believe that a reader will take advantage of the papers in these Proceedings with further satisfaction and motivation for her or his work. These papers cover the wide field of the Mechanism Science. The program of EUCOMES08 Conference has included technical sessions with oral presentations, which, together with informal conversations during the social program, have enabled to offer wide opportunities to share experiences and discuss scientific achievements and current trends in the areas encompassed by the EUCOMES08 conference.

technical university of cluj napoca: *Mining Intelligence and Knowledge Exploration* Seifedine Kadry, Rajendra Prasath, 2023-09-23 This book constitutes the refereed post-conference proceedings of the 9th International Conference on Mining Intelligence and Knowledge Exploration, MIKE 2023, held in Kristiansand, Norway, during June 28-30, 2023. The 22 full papers and 16 short papers included in this book were carefully reviewed and selected from 87 submissions. They were grouped into various subtopics including Knowledge Exploration in IoT, Medical Informatics, Machine Learning, Text Mining, Natural Language Processing, Cryptocurrency and Blockchain, Application of Artificial Intelligence, and other areas.

technical university of cluj napoca: *AETA 2013: Recent Advances in Electrical Engineering and Related Sciences* Ivan Zelinka, Vo Hoang Duy, Jaesang Cha, 2013-11-01 Over the past decades, fault diagnosis (FDI) and fault tolerant control strategies (FTC) have been proposed based on different techniques for linear and nonlinear systems. Indeed a considerable attention is deployed in order to cope with diverse damages resulting in faults occurrence.

technical university of cluj napoca: *15th International Conference on Soft Computing Models in Industrial and Environmental Applications (SOCO 2020)* Álvaro Herrero, Carlos Cambra, Daniel Urda, Javier Sedano, Héctor Quintián, Emilio Corchado, 2020-08-28 This book contains accepted papers presented at SOCO 2020 conference held in the beautiful and historic city of Burgos (Spain), in September 2020. Soft computing represents a collection or set of computational techniques in machine learning, computer science and some engineering disciplines, which investigate, simulate, and analyze very complex issues and phenomena. After a thorough peer-review process, the SOCO 2020 International Program Committee selected 83 papers which are published in these conference proceedings and represents an acceptance rate of 35%. Due to the COVID-19 outbreak, the SOCO 2020 edition was blended, combining on-site and on-line participation. In this relevant edition a special emphasis was put on the organization of special

sessions. Eleven special session were organized related to relevant topics such as: Soft Computing Applications in Precision Agriculture, Manufacturing and Management Systems, Management of Industrial and Environmental Enterprises, Logistics and Transportation Systems, Robotics and Autonomous Vehicles, Computer Vision, Laser-Based Sensing and Measurement and other topics such as Forecasting Industrial Time Series, IoT, Big Data and Cyber Physical Systems, Non-linear Dynamical Systems and Fluid Dynamics, Modeling and Control systems The selection of papers was extremely rigorous in order to maintain the high quality of SOCO conference editions and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference and the SOCO conference would not exist without their help.

technical university of cluj napoca: Digital Conversion on the Way to Industry 4.0

Numan M. Durakbasa, M. Güneş Gençyılmaz, 2020-10-25 This book presents the proceedings from the International Symposium for Production Research 2020. The cross-disciplinary papers presented draw on research from academics and practitioners from industrial engineering, management engineering, operational research, and production/operational management. It explores topics including: · computer-aided manufacturing; Industry 4.0 applications; simulation and modeling big data and analytics; flexible manufacturing systems; decision analysis quality management industrial robotics in production systems information technologies in production management; and optimization techniques. Presenting real-life applications, case studies, and mathematical models, this book is of interest to researchers, academics, and practitioners in the field of production and operation engineering.

technical university of cluj napoca: Industrial Engineering in the Industry 4.0 Era

Numan M. Durakbasa, M. Güneş Gençyılmaz, 2024-03-01 This book contains selected papers from International Symposium for Production Research 2023, held on October 5-7, 2023, Antalya, Türkiye. The book reports recent advances in production engineering and operations. It explores topics including: production research; production management; operations management; Industry 4.0; Industry 5.0; industrial engineering; mechanical engineering; engineering management; operational research. Presenting real-life applications, case studies, and mathematical models, this book is of interest to researchers, academics, and practitioners in the field of production and operation engineering. It provides both the results of recent research and practical solutions to real-world problems.

technical university of cluj napoca: SYROM 2009 Ion Visa, 2010-03-23 SYROM conferences have been organized since 1973 by the Romanian branch of the International Federation for the Promotion of Mechanisms and Machine Science IFToMM, Year by year the event grew in quality. Now in its 10th edition, international visibility and recognition among the researchers active in the mechanisms science field has been achieved. SYROM 2009 brought together researchers and academic staff from the field of mechanisms and machine science from all over the world and served as a forum for presenting the achievements and most recent results in research and education. Topics treated include conceptual design, kinematics and dynamics, modeling and simulation, synthesis and optimization, command and control, current trends in education in this field, applications in high-tech products. The papers presented at this conference were subjected to a peer-review process to ensure the quality of the paper, the engineering significance, the soundness of results and the originality of the paper. The accepted papers fulfill these criteria and make the proceedings unique among the publications of this type.

technical university of cluj napoca: Innovations and Advances in Computer Sciences and Engineering Tarek Sobh, 2010-03-10 Innovations and Advances in Computer Sciences and Engineering includes a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of Computer Science, Software Engineering, Computer Engineering, and Systems Engineering and Sciences. Innovations and Advances in Computer Sciences and Engineering includes selected papers form the conference proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS 2008)

which was part of the International Joint Conferences on Computer, Information and Systems Sciences and Engineering (CISSE 2008).

technical university of cluj napoca: Challenges and Opportunities in the Artificial Intelligence Era Carolina Machado, Joao Paulo Davim, 2025-05-24 This book contributes to a better understanding of the impacts that artificial intelligence (AI) has on organizations and how they reinforce opportunities while simultaneously overcoming the underlying risks. The importance of artificial intelligence in business innovation lies in AI's ability to drive efficient automation, provide strategic insights through advanced data analysis and catalyse the development of personalized products and services, resulting in more effective operations and agile responses to market demands. This book will be read by academics, researchers, managers, engineers, practitioners, and other professionals in different sectors of business and management.

technical university of cluj napoca: Digitizing Production Systems Numan M. Durakbasa, M. Güneş Gençyılmaz, 2021-11-10 This book contains selected papers from International Symposium for Production Research 2021, held on October 7-9, 2021, online, Turkey. The book reports recent advances in production engineering and operations. It explores topics including production research; production management; operations management; industry 4.0; industrial engineering; mechanical engineering; engineering management; and operational research. Presenting real-life applications, case studies, and mathematical models, this book is of interest to researchers, academics, and practitioners in the field of production and operation engineering. It provides both the results of recent research and practical solutions to real-world problems.

technical university of cluj napoca: Advanced Manufacturing Processes II Volodymyr Tonkonogyi, Vitalii Ivanov, Justyna Trojanowska, Gennadii Oborskyi, Anatolii Grabchenko, Ivan Pavlenko, Milan Edl, Ivan Kuric, Predrag Dasic, 2021-02-04 This book offers a timely yet comprehensive snapshot of innovative research and developments at the interface between manufacturing, materials and mechanical engineering, and quality assurance. It covers a wide range of manufacturing processes, such as cutting, grinding, assembly, and coatings, including ultrasonic treatment, molding, radial-isostatic compression, ionic-plasma deposition, volumetric vibration treatment, and wear resistance. It also highlights the advantages of augmented reality, RFID technology, reverse engineering, optimization, heat and mass transfer, energy management, quality inspection, and environmental impact. Based on selected papers presented at the Grabchenko's International Conference on Advanced Manufacturing Processes (InterPartner-2020), held in Odessa, Ukraine, on September 8-11, 2020, this book offers a timely overview and extensive information on trends and technologies in production planning, design engineering, advanced materials, machining processes, process engineering, and quality assurance. It is also intended to facilitate communication and collaboration between different groups working on similar topics and offer a bridge between academic and industrial researchers.

technical university of cluj napoca: The 11th IFToMM International Symposium on Science of Mechanisms and Machines Ion Visa, 2013-10-18 The general topic of the symposium follows mechanisms development through all stages of conception, modeling, analysis, synthesis and control to advanced product design. This volume brings together the latest results in the field and celebrates a series of conferences that has been running for 40 years. The contributors and the editor are world leaders in their field.

technical university of cluj napoca: Proceedings of Seventh International Congress on Information and Communication Technology Xin-She Yang, Simon Sherratt, Nilanjan Dey, Amit Joshi, 2022-08-16 This book gathers selected high-quality research papers presented at the Seventh International Congress on Information and Communication Technology, held at Brunel University, London, on February 21-24, 2022. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The work is presented in four volumes.

technical university of cluj napoca: Multiscale Modelling in Sheet Metal Forming Dorel Banabic, 2016-10-20 This book gives a unified presentation of the research performed in the field of multiscale modelling in sheet metal forming over the course of more than thirty years by the members of six teams from internationally acclaimed universities. The first chapter is devoted to the presentation of some recent phenomenological yield criteria (BBC 2005 and BBC 2008) developed at the CERTETA center from the Technical University of Cluj-Napoca. An overview on the crystallographic texture and plastic anisotropy is presented in Chapter 2. Chapter 3 is dedicated to multiscale modelling of plastic anisotropy. The authors describe a new hierarchical multi-scale framework that allows taking into account the evolution of plastic anisotropy during sheet forming processes. Chapter 4 is focused on modelling the evolution of voids in porous metals with applications to forming limit curves and ductile fracture. The chapter details the steps needed for the development of dissipation functions and Gurson-type models for non-quadratic anisotropic plasticity criteria like BBC 2005 and those based on linear transformations. Chapter 5 describes advanced models for the prediction of forming limit curves developed by the authors. Chapter 6 is devoted to anisotropic damage in elasto-plastic materials with structural defects. Finally, Chapter 7 deals with modelling of the Portevin-Le Chatelier (PLC) effect. This volume contains contributions from leading researchers from the Technical University of Cluj-Napoca, Romania, the Catholic University of Leuven, Belgium, Clausthal University of Technology, Germany, Amirkabir University of Technology, Iran, the University of Bucharest, Romania, and the Institute of Mathematics of the Romanian Academy, Romania. It will prove useful to postgraduate students, researchers and engineers who are interested in the mechanical modeling and numerical simulation of sheet metal forming processes.

technical university of cluj napoca: Securing Cyber-Physical Systems Al-Sakib Khan Pathan, 2015-10-06 Think about someone taking control of your car while you're driving. Or, someone hacking into a drone and taking control. Both of these things have been done, and both are attacks against cyber-physical systems (CPS). Securing Cyber-Physical Systems explores the cybersecurity needed for CPS, with a focus on results of research and real-world deploy

technical university of cluj napoca: Advances in Design, Simulation and Manufacturing V Vitalii Ivanov, Justyna Trojanowska, Ivan Pavlenko, Erwin Rauch, Dragan Peraković, 2022-05-24 This book reports on topics at the interface between manufacturing and materials engineering, with a special emphasis on smart and sustainable manufacturing. It describes innovative research in design engineering and manufacturing technology, covering the development and characterization of advanced materials alike. It also discusses key aspects related to ICT in engineering education. Based on the 5th International Conference on Design, Simulation, Manufacturing: The Innovation Exchange (DSMIE-2022), held on June 7-10, 2022, in Poznan, Poland, this first volume of a 2-volume set provides academics and professionals with extensive information on trends and technologies, and challenges and practice-oriented experience in all the above-mentioned areas.
