A BEST BOOK OF THE YEAR: The New York Times, Washington Post, NPR, Oprah Daily, Entertainment Weekly, Newsweek Chemist Elizabeth Zott is not your average woman. In fact, Elizabeth Zott would be the first to point out that there is no such thing as an average woman. But it's the early 1960s and her all-male team at Hastings Research Institute takes a very unscientific view of equality. Except for one: Calvin Evans;

the lonely, brilliant, Nobel-prize nominated grudge-holder who falls in love with—of all things—her mind. True chemistry results. But like science, life is unpredictable. Which is why a few years later Elizabeth Zott finds herself not only a single mother, but the reluctant star of America's most beloved cooking show *Supper at Six*. Elizabeth's unusual approach to cooking ("combine one tablespoon acetic acid with a pinch of sodium chloride") proves revolutionary. But as her following grows, not everyone is happy. Because as it turns out, Elizabeth Zott isn't just teaching women to cook. She's daring them to change the status quo. Laugh-out-loud funny, shrewdly observant, and studded with a dazzling cast of supporting characters, *Lessons in Chemistry* is as original and vibrant as its protagonist.

After sexual harassment derails her academic career, Elizabeth takes a lowly job at Hastings Research Institute. She falls in love with Calvin Evans, a scientist as quirky as he is brilliant. Their time together is magical, but Calvin dies in a tragic accident. Months later, Elizabeth gives birth to their daughter. When Hastings fires her for being an unwed mother, Elizabeth finds comfort in her precocious child and her equally precocious dog, Six-Thirty. Soon after, she lucks into hosting "Supper at Six." Through the TV show, she challenges gender norms, empowering women; in her own life, she comes to understand what really makes a family. *Lessons in Chemistry*, the best-selling first novel by Bonnie Garmus, was made into a TV mini-series in 2023.
