whole foods market interview: *Winning the Long Game* Steven Krupp, Paul JH Schoemaker, 2014-12-02 Are you winning the battle but losing the war? Every leader has to deliver the goods -- make budget, meet deadlines, and deftly manage people -- to provide the inspirational fuel that keeps their business running day-in and day-out. But therein lies the danger of winning today's battle and losing the war -- that is the long game of creating sustainable value in a volatile, uncertain world that is becoming ever-more complex and ambiguous. whole foods market interview: *Better Safe Than Sorry* Norah MacKendrick, 2018-05 How toxic are the products we consume on a daily basis? Whether it's triclosan in toothpaste, formaldehyde in baby shampoo, endocrine disruptors in water bottles, or pesticides on strawberries, chemicals in food and personal care products are of increasing concern to consumers. This book chronicles how ordinary people try to avoid exposure to toxics in grocery store aisles using the practice of "precautionary consumption." Through an innovative analysis of environmental regulation, the advocacy work of environmental health groups, the expansion of the health-food chain Whole Foods Market, and interviews with consumers, Norah MacKendrick ponders why the problem of toxics in the U.S. retail landscape has been left to individual shoppers—and to mothers in particular. She reveals how precautionary consumption, or "green shopping," is a costly and time-intensive practice, one that is connected to cultural ideas of femininity and good motherhood

but is also most available to upper- and middle-class households. Better Safe Than Sorry powerfully argues that precautionary consumption places a heavy and unfair burden of labor on women and does little to advance environmental justice or mitigate risk.

But now brand proliferation is threatening not only to stifle true choice in the marketplace, but to render hard-won brand identities - some decades in the making - meaningless. With today's unprecedented access to thousands of brands a day, via Twitter, Facebook, and the rest, the balance of brand power is shifting irrevocably away from the businesses behind them. In Brandstorm, branding guru Liz Nickles argues that, as a result, the brand is no longer a value proposition in itself, and that marketers and brand managers must stop the dilution and focus on meaningful, market-specific reinvention for those brands that can stand the test of time. She offers the success secrets behind leading brands like Ralph Lauren, Justin Bieber, and Revlon, and how to channel them today.

whole foods market interview: Local Food Systems in Old Industrial Regions Jay D. Gatrell, Paula S. Ross, 2016-05-06 In recent years there has been an explosion of interest in local food systems-among policy makers, planners, and public health professionals, as well as environmentalists, community developers, academics, farmers, and ordinary citizens. While most local food systems share common characteristics, the chapters in this book explore the unique challenges and opportunities of local food systems located within mature and/or declining industrial regions. Local food systems have the potential to provide residents with a supply of safe and nutritious food; such systems also have the potential to create much-needed employment opportunities. However, challenges are numerous and include developing local markets of a sufficient scale, adequately matching supply and demand, and meeting the environmental challenges of finding safe growing locations. Interrogating the scale, scope, and economic context of local food systems in aging industrialized cities, this book provides a foundation for the development of new sub-fields in economic, urban, and agricultural geographies that focus on local food systems. The book represents a first attempt to provide a systematic picture of the opportunities and challenges facing the development of local food systems in old industrial regions.

whole foods market interview: Foodies Josee Johnston, Shyon Baumann, 2009-12-04 This

important new cultural analysis tells two stories about food. The first depicts good food as democratic. Foodies frequent 'hole in the wall' ethnic eateries, appreciate the pie found in working-class truck stops, and reject the snobbery of fancy French restaurants with formal table service. The second story describes how food operates as a source of status and distinction for economic and cultural elites, indirectly maintaining and reproducing social inequality. While the first storyline insists that anybody can be a foodie, the second asks foodies to look in the mirror and think about their relative social and economic privilege. By simultaneously considering both of these stories, and studying how they operate in tension, a delicious sociology of food becomes available, perfect for teaching a broad range of cultural sociology courses.

In our mailboxes, in delivery vans clogging our streets, in an increasing portion of our air traffic, in our grocery stores, on our televisions, in our smart home devices, and in the infrastructure powering many of the websites we visit. Amazon's tendrils touch the majority of online retail transactions in the United States and in many other countries. As Amazon changes the face of capitalist business, it is also changing global culture in multiple ways. This book examines the broader environmental impacts that Amazon is having on the world, looking at the slow violence it incurs, its underwhelming Climate Pledge, and the regional impacts that its business practices have. Lastly, this book gathers together some important artistic responses to Amazon for the first time in an appendix that offers readers insight into other ways in which critics of the company are making their voices heard and attempting to move broader audiences into solidarity against Amazon.
