**who s most likely questions funny: Sport, Fun and Enjoyment** Ian Wellard, 2013-09-05 Sport, Fun and Enjoyment explores the pleasurable aspects of sport within the context of everyday recreational and competitive physical activities. While much recent work has focused on the relationships between physical activity, health and wellbeing, much less attention has been paid to pleasure and fun, key aspects of our engagement with sport but not so easy to measure in terms of specific outcomes. By offering a critical exploration of what can be constituted as 'fun' in a sporting context, this book reveals the complex ways in which individuals approach sport and engage with it

throughout the life course. The book considers the importance of pleasure and fun as a factor in our initial, formative experiences of sport activity, and as a factor in participation and continued participation. It explores the nature of fun as an embodied experience which incorporates a multitude of social, psychological and physiological components, and as a subjective experience which cannot be fully explained through simplistic binary formulations of pleasure and pain. Drawing on a wide research literature and original empirical research with children and adults, the book outlines a new theoretical framework for thinking about pleasure and fun in sport, highlighting the contrasting ways in which sport and physical activity is experienced and the interplay between individual and social contexts. Sport, Fun and Enjoyment is important reading for anybody with an interest in physical education, youth sport, the sociology of sport, physical activity and health, sport development or sport policy.

**who s most likely questions funny: Collaborative Web Search** Meredith Ringel Morris, Jaime Teevan, 2022-06-01 Today, Web search is treated as a solitary experience. Web browsers and search engines are typically designed to support a single user, working alone. However, collaboration on information-seeking tasks is actually commonplace. Students work together to complete homework assignments, friends seek information about joint entertainment opportunities, family members jointly plan vacation travel, and colleagues jointly conduct research for their projects. As improved networking technologies and the rise of social media simplify the process of remote collaboration, and large, novel display form-factors simplify the process of co-located group work, researchers have begun to explore ways to facilitate collaboration on search tasks. This lecture investigates the who, what, where, when and why of collaborative search, and gives insight in how emerging solutions can address collaborators' needs. This autobiography tells a story of a man born behind the Iron Curtain of Communist Czechoslovakia, a nation known for its cultural and historical heritage and for its prevailing atheistic view on life. Jiri Sebastian Voborsky tells his story of growing up under the heavy fist of the totalitarian regime. In a moving and captivating way, he writes of his experience of the 1989 Velvet Revolution and passionately recounts his own revolt against the voice of spiritual depravity when met by his Savior, Jesus Christ. This narrative paints a picture of the profound truth that God, in His wisdom, carefully orchestrates the events of our lives, allowing us to arrive at the very moment where the exchange between man and God takes place.
