whole foods diet reddit: Food Faiths Catherine L. Newell, 2023-08-29 *Food Faiths: Diet, Religion, and the Science of Spiritual Eating* explores how individuals internalize scientific knowledge regarding health and diet, and then incorporate that information into their lives as the basis of a personal spiritual practice. In this book, Catherine L. Newell examines how science is used to justify a dietary lifestyle and investigates the world of “spiritual eating,” which is comprised of practitioners who identify themselves not by a religion but by their diet. These diets are based in diverse sciences such as anthropology, ecology, systems biology, nutritional studies, biomedicine, and physiology; adherents view their diet as a lifestyle, a path to enlightenment, and a nebulously defined point of “health.” This, in turn, enables the practitioner to locate themselves in relation to other members of their community, to older traditions suffused with religious practice, and to understand their praxis in relation to the entire biosphere. While on one level this project explores how food, health, and diet can be a source of spiritual fulfillment, on another level *Food Faiths* illustrates how science and religion are subsumed into a culture and merged to form the basis of an individual’s lived spiritual practice.

whole foods diet reddit: Cultural Linguistics and Critical Discourse Studies Monika Reif, Frank Polzenhagen, 2023-11-15 The present volume explores the meeting ground between Critical Discourse Studies and Cultural Linguistics. The contributions investigate culture-specific conceptualisations, ways of framing and conceptual metaphors in political discourse, as well as cultural models, cultural stereotypes and stereotyping. The individual authors use quantitative (e.g. corpus-based approaches) and/or qualitative methods. They address a range of contexts, e.g. Europe, the US, Japan, West Africa, and a variety of topics, e.g. migration, presidential elections, identity, food culture, concepts of health. The papers included in this volume show that ideologies, the key concern of Critical Discourse Studies, cannot be analysed independently of cultural conceptualisations. In a complementary, dialectic fashion, cultural conceptualisation, the central concern of Cultural Linguistics, have ideological implications, sometimes subtle, sometimes very straightforward. The present volume thus illustrates that travelling on this meeting ground is a natural and fruitful endeavour for both approaches.

whole foods diet reddit: A Bright Clean Mind Camille DeAngelis, 2019-10-15 Discover how your diet may affect your creativity, how going vegan is like giving yourself brain food, and how to incorporate veganism into your life. When author and certified vegan lifestyle coach Camille DeAngelis is asked how she feels satisfied on a vegan diet, she thinks of the moment in James and the Giant Peach when the Grasshopper and the Centipede fret that they have nothing to eat until James points out that they're traveling inside an enormous piece of fruit. There is plenty, Camille reminds us in this self-help motivational book for artists and creatives. Everything we could ever want to eat, and more, is all around us. Because we live in a culture in which the eating and wearing of animals is taken for granted, we rarely recognize our limiting meat-centric mindset. But if we can employ our imagination to create worlds from scratch, we can surely use it to envision a new way of seeing ourselves in relation to the animals we eat. On the other side of this brain transformation is a lifestyle that is ideal for our own health and emotional well-being and is much more environmentally sustainable. Camille believes that creative hobbies and habits reinvigorate one's primary work. But she knits, sews, embroiders, and bakes for the pleasure of it, too. Her productivity and brain power have been remarkable since going vegan seven years ago, and even more importantly, she no longer feels any of the frustration or uncertainty artists tend to accept as part of the creative process. If you're a creative suffering from brain fog, A Bright Clear Mind can help. Praise for A Bright Clear Mind "If you are a maker or an artist who feels anxious, depressed or just plain not feeling up to par, I urge you to read this book. In the pages you will discover how to wake up your life force by embracing a more connected way of living and eating." —Elise Marie Collins, author of Super Ager: You Can Look Younger, Have More Energy, A Better Memory and Live a Long and Healthy Life "DeAngelis roundly disproves the theory that plant-eaters are somber moralists . . . Getting to peer into the lives and creative processes of these vegan visionaries makes me want to write and dance and organize my cupboards and make a tofu frittata." —Victoria Moran, author of Creating a Charmed Life and Main Street Vegan

whole foods diet reddit: The Cultural Politics of Food, Taste, and Identity Steffan Igor Ayora-Diaz, 2021-04-08 The Cultural Politics of Food, Taste, and Identity examines the social, cultural, and political processes that shape the experience of taste. The book positions flavor as involving all the senses, and describes the multiple ways in which taste becomes tied to local, translocal, glocal, and cosmopolitan politics of identity. Global case studies are included from Japan, China, India, Belize, Chile, Guatemala, the United States, France, Italy, Poland and Spain. Chapters examine local responses to industrialized food and the heritage industry, and look at how professional culinary practice has become foundational for local identities. The book also discusses the unfolding construction of "local taste" in the context of sociocultural developments, and addresses how cultural political divides are created between meat consumption and vegetarianism, innovation and tradition, heritage and social class, popular food and authenticity, and street and restaurant food. In addition, contributors discuss how different food products—such as kimchi, quinoa, and Soylent—have entered the international market of industrial and heritage foods,

connecting different places and shaping taste and political identities.
