why do people study history: History of the Urhobo People of Niger Delta Peter Palmer Ekeh, Urhobo Historical Society, 2007 History of The Urhobo People of Niger Delta is the most comprehensive compilation and study of various aspects of the history of the Urhobo people of Nigeria's Niger Delta. It begins with an examination of the prehistory of the region, with particular focus on the Urhobo and their close ethnic neighbour, the Isoko. The book then embarks on a close assessment of the advent of British imperialism in the Western Niger Delta. History of The Urhobo People of Niger Delta also probes the arrival and impact of Western Christian missions in Urhoboland. Urhobo history is notable for the sharp challenges that the Urhobo people have faced at various points of their di?cult existence in the rainforest and deltaic geographical formation of Western Niger Delta. Their history of migrations and their segmentation into twenty-two cultural units were, in large part, e?orts aimed at overcoming these challenges. why do people study history: Was the American Revolution a Mistake? Burton Weltman, 2013-08-27 Why was George Washington dismayed by the outcome of the American Revolution? Would slavery still exist if the South had not seceded from the Union in 1861? Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912? History is full of contingencies. People confront problems and debate options for solving them. Then they make a choice and face the consequences of their choice. Often they wonder if a different choice might have been better. Was the American Revolution a mistake? Was racial segregation inevitable? Was the Cold War necessary? Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices. This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us. It demonstrates a method of teaching history that recreates events as people experienced them, and asks important questions that troubled them but that rarely appear in conventional textbooks. Unlike conventional methods that often reduce history to names, dates and factoids for students to memorize, it is a method that brings past debates to life, the losers' as well as the winners' points of view, and makes the subject

exciting. In studying history as choice, students examine the problems people faced, their options for solving them, their decision-making processes, and the choices they made. Then students evaluate the consequences of those choices both for people in the past and us today. They explore what might have happened if different choices had been made. Finally, students relate the consequences of those past choices to problems we face today and the choices we need to make. History as choice is a practical and practicable method. It has been designed to satisfy the curriculum goals of the National Council for the Social Studies, and the book explains how it can be used to satisfy any state or local curriculum standards. The book also identifies and illustrates resources that can be used with this method -- from data bases to popular music -- and explains how teachers can gradually integrate it into their courses. In the first part of the book, the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point. The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice.

why do people study history: *To the Past* Ruth Wells Sandwell, 2006-01-01 Recent years have witnessed a breakdown in consensus about what history should be taught within Canadian schools; there is now a heightened awareness of the political nature of deciding whose history is, or should be, included in social studies and history classrooms. Meanwhile, as educators are debating what history should be taught, developments in educational and cognitive research are expanding our understanding of how best to teach it. *To the Past* explores some of the political, cultural and educational issues surrounding what history education is, and why we should care about it, in the twenty-first century in Canada. Originally broadcast in the fall of 2002 on the CBC Radio program *Ideas*, the lectures that comprise this volume not only address how history is taught in Canadian classrooms, but also explore strands within larger discussions about the meaning and purposes of history more generally. Contributors show how Canadians are demonstrating a new interest in what scholars have termed 'historical consciousness' or collective memory, through participation in a wide range of cultural activities, from visiting museums to watching the History Channel. Canadian adults and children alike seem to be seeking answers to questions of identity, meaning, community and nation in their study of the past. Through this series of essays, readers will have the opportunity to explore some of the political and ethical issues involved in this emerging field of Canadian 'citizenship through history' as they learn about public memory and broadly defined history education in Canada.

why do people study history: *Teaching Recent Global History* Diana B. Turk, Laura J. Dull, Robert Cohen, Michael R. Stoll, 2014-03-05 *Teaching Recent Global History* explores innovative ways to teach world history, beginning with the early 20th century. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: • An overarching narrative that helps readers address historical arguments; • Relevant primary documents or artifacts, plus a discussion of a particular historical method well-suited to teaching about them; • Lesson plans suitable for both middle and secondary level classrooms; • Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

why do people study history: *Doing History* Linda S. Levstik, Keith C. Barton, 2022-09-06 Now in its sixth edition, *Doing History* offers a unique perspective on teaching and learning history in the elementary and middle grades. Through case studies of teachers and students in diverse classrooms

and from diverse backgrounds, it shows children engaging in authentic historical investigations, often in the context of an integrated social studies curriculum. The book is grounded in the view that children can engage in valid forms of historical inquiry—asking questions, collecting and analyzing evidence, examining the varied perspectives and experiences of people in the past, and creating evidence-based historical accounts and interpretations. Grounded in contemporary sociocultural theory and research, the text features vignettes in each chapter showing communities of teachers and students doing history in environments rich in literature, art, writing, and discussion. The authors explain how these classrooms reflect contemporary principles of teaching and learning, and thus, the descriptions not only provide specific examples of successful activities but also place them in a context that allows teachers to adapt and apply them in a wide range of settings. Doing History emphasizes diversity in two ways: Readers encounter students from a variety of backgrounds and see how their diverse experiences can form the foundation for learning, and they also see examples of how teachers can engage students with diverse experiences and perspectives in the past, including those that led to conflict and oppression. The book also discusses principles for working with English learners and newcomers, and it provides guidance in using multiple forms of assessment to evaluate the specifically historical aspects of children's learning. Updates to this edition include updated historical and instructional examples to ensure currency, new suggestions for children's literature to support good teaching, expanded attention to teaching about oppressed groups in history, and greater attention to when historical perspective taking is and is not appropriate.
