Fascinating and varied, the volume crosses many boundaries, dealing with areas as diverse as football-based computer games, Buffy the Vampire Slayer, digital sampling in the music industry, the films of Sidney Lumet, football hooliganism, and Enid Blyton. These topics are linked together through the key thread of the role of, or the absence of, law - therefore providing a snapshot of significant work in the burgeoning field of law and popular culture. Including important theoretical and truly innovative, relevant material, this contemporary text will enliven and inform a legal audience, and will also appeal to a much broader readership of people interested in this highly topical area.

within the law movie: Film and the Law Steve Greenfield, Guy Osborn, Peter Robson, 2010-10-05 Described by Richard Sherwin of New York Law School as the law and film movement's 'founding text', this text is a second, heavily revised and improved edition of the original *Film and the Law* (Cavendish Publishing, 2001). The book is distinctive in a number of ways: it is unique as a sustained book-length exposition on law and film by law scholars; it is distinctive within law and film scholarship in its attempt to plot the parameters of a distinctive genre of law films; its examination of law in film as place and space offers a new way out of the law film genre problem, and also offers an examination of representations of an aspect of legal practice, and legal institutions, that have not been addressed by other scholars. It is original in its contribution to work within the wider parameters of law and popular culture and offers a sustained challenge to traditional legal scholarship, amply demonstrating the practical and the pedagogic, as well as the moral and political significance of popular cultural representations of law. The book is a valuable teaching and learning resource, and is the first in the field to serve as a basic guidebook for students of law and film.

within the law movie: Law and Film Vittoria Becci, Alexia Katsiginis, Edward Van Daalen, 2024-12-31 This book explores how law can be understood through film by engaging creatively with the intellectual and aesthetic dimensions of both fields. The chapters explore a variety of narratives, aesthetics, cinematic epistemologies and legal phenomena; from assessing law in social debates to film as legal critique, from notions of justice to contemplations on evil, and from masculine vigilantism to radical feminism. Taken together, they constitute an inspiring body of work that embodies an urgency for diverse and subversive ways to challenge law's formalism and authority; and to think about and respond variously to law's impotence, its disappointment, or its boredom. This book will appeal to legal scholars and students in law and the humanities, especially those with interests in aesthetics, law and literature, law and culture, law and society, and critical legal theory.

within the law movie: Images in Law William Pencak, 2016-05-13 What does 'the law' look like? While numerous attempts have been made to examine law and legal action in terms of its language, little has yet been written that considers how visual images of the law influence its interpretation and execution in ways not discernible from written texts. This groundbreaking collection focuses on images in law, featuring contributions that show and discuss the perception of the legal universe on a theoretical basis or when dealing with visual semiotics (dress, ceremony, technology, etc.). It also examines 'language in action', analyzing jury instructions, police directives, and how imagery is used in conjunction with contentious social and political issues within a country, such as the image of family in Ireland or the image of racism in France.
