women s history month memes: *IRL* Chris Stedman, 2020-10-20 What Does IRL (In Real Life) Really Mean in Today's Digital Age? It's easy and reflexive to view our online presence as fake, to see the internet as a space we enter when we aren't living our real, offline lives. Yet so much of who we are and what we do now happens online, making it hard to know which parts of our lives are real IRL, Chris Stedman's personal and searing exploration of authenticity in the digital age, shines a light on how age-old notions of realness--who we are and where we fit in the world--can be freshly understood in our increasingly online lives. Stedman offers a different way of seeing the supposed split between our online and offline selves: the internet and social media are new tools for understanding and expressing ourselves, and the not-always-graceful ways we use these tools can reveal new insights into far older human behaviors and desires. IRL invites readers to consider how we use the internet to fulfill the essential human need to feel real--a need many of us once met in institutions, but now seek to do on our own, online--as well as the ways we edit or curate ourselves for digital audiences. The digital search for meaning and belonging presents challenges, Stedman suggests, but also myriad opportunities to become more fully human. In the end, he makes a bold case for embracing realness in all of its uncertainty, online and off, even when it feels risky.

women s history month memes: *The Methuen Drama Handbook of Gender and Theatre* Sean Metzger, Roberta Mock, 2023-12-28 Shortlisted for the 2024 TaPRA Edited Collection Prize This is a guide to contemporary debates and theatre practices at a time when gender paradigms are both in flux and at the centre of explosive political battlegrounds. The confluence of gender and theatre has long created intense debate about representation, identification, social conditioning, desire, embodiment, and lived experience. As this handbook demonstrates, from the conventions of early modern English, Chinese, Japanese and Hispanic theatres to the subversion of racialized binaries of masculinity and femininity in recent North American, African, Asian, Caribbean and European productions, the matter of gender has consistently taken centre stage. This handbook examines how critical discourses on gender intersect with key debates in the field of theatre studies, as a lens to illuminate the practices of gender and theatre as well as the societies they inform and represent across space and time. Of interest to scholars in the interrelated areas of feminist, gender and sexuality studies, theatre and performance studies, cultural studies, and globalization and diasporic studies, this book demonstrates how researchers are currently addressing theatre about gender issues and gendered theatre practices. While synthesizing and summarizing foundational and evolving debates from a contemporary perspective, this collection offers interpretations and analyses that do not simply look back at existing scholarship, but open up new possibilities and understandings. Featuring essential research tools, including a survey of keywords and an annotated play list, this is an indispensable scholarly handbook for anyone working in theatre and performance.

women s history month memes: *The Munchausen Complex* Richard L. Matteoli, 2011-03 First Conquer Thyself: Socialization of violence and abuse is often highly structured through the Munchausen Complex. Munchausen Syndrome occurs when an individual harms themselves for attention and self-glorification. Munchausen Syndrome by Proxy is when an individual harms another, usually under their care. Attention and self-glorification are achieved through their victim's subsequent medical treatment. Munchausen Syndrome by Proxy is a crime with a victim. Violence and abuse are often common in families, passed down from one generation to the next and may be termed Transgenerational Munchausen Syndrome as these families expand and their habits are introduced into society. Munchausen Syndrome in Collective Transmission occurs when such practices become an acceptable part of society often eventuating into full acculturation. In this way societies attach themselves to self-glorification with various explanations of justification. A Mandated Report is required to be filed by health care, legal, social service and educational professionals who suspect child abuse, as well as developers of film. As socialized beings, we are often unaware why we think what we think and why we do what we do. Exploring beneath the surface, we may discover we are not who we imagine we are. Are our subtle perversions and aberrations so different from those of the ancients, or other cultures we label primitive? The author was under military orders not to discuss the subjects presented in this part's Mandated Report on child abuse to the social body for the last six years of his U.S. Navy career. Censorship is strong when one questions social norms, folkways and rituals that address issues of identity. Internal, interpersonal and professional conflicts arise.

women s history month memes: *Black Women and da 'Rona* Julia S. Jordan-Zachery, Shamara Wyllie Alhassan, 2023-04-18 Rooted in the ways Black women understand their lives, this collection archives practices of healing, mothering, and advocacy during the COVID-19 pandemic. Recognizing that Black women have been living in pandemics as far back as colonialism and enslavement, this volume acknowledges that records of the past—from the 1918 flu pandemic to the onset of the HIV/AIDS epidemic—often erase the existence and experiences of Black women as a whole. Writing against this archival erasure, this collection consciously recenters the real-time experiences and perspectives of care, policy concerns, grief, and joy of Black women throughout the COVID-19 pandemic. Nineteen contributors from interdisciplinary fields and diverse backgrounds explore Black feminine community, consciousness, ethics of care, spirituality, and social critique. They situate Black women's multidimensional experiences with COVID-19 and other violences that affect their lives. The stories they tell are connected and interwoven, bound together by anti-Black gendered COVID necropolitics and commitments to creating new spaces for breathing, healing, and wellness. Ultimately, this time-warping analysis shows how Black women imagine a more just

society, rapidly adapt to changing experiences, and innovate ethics of care even in the midst of physical distancing, which can be instructive for thinking of new ways of living both during and beyond the era of COVID-19. women s history month memes: The Menstrual Movement in the Media Maria Kathryn Tomlinson, 2024-11-16 This book investigates the impact of the mediation of menstruation and menstrual activism on young people's knowledge, attitudes, behaviours, and interpersonal relationships. Since 2015, the menstrual movement has become increasingly visible on social media and in news media from across the globe. In Great Britain, the menstrual movement brings together a diverse group of activists who aim to reduce menstrual stigma and tackle menstrual inequities. By combining original interviews with 32 menstrual activists and focus groups with 77 young people (including women, men, and non-binary teenagers), this book offers an in-depth exploration of this movement and its impact. This book argues that menstrual stigma has decreased, awareness around related health and social issues has increased, and girls as well as other menstruating young people are feeling an increased sense of connection and solidarity with each other. Menstruation is shifting from a very private experience to one of collective concern. It is evident that social media, and, to some extent, news media, have played a key role in disseminating the discourses and aims of menstrual activists that have engendered some of these changes. Nevertheless, this book also examines how the media have negatively impacted young people and identifies further changes that are necessary for the achievement of gender equality. This book makes a significant contribution not only to the fields of health communication, feminism, social movement studies, and critical menstruation studies, but also provides evidence and recommendations that will be of interest to NGOs, advocacy groups, policymakers, schools, workplaces, and medical professionals. This is an open access book.
