women history month images: Entering the Picture Jill Fields, 2012-02-27 In 1970, Judy Chicago and fifteen students founded the groundbreaking Feminist Art Program (FAP) at Fresno State. Drawing upon the consciousness-raising techniques of the women's liberation movement, they created shocking new art forms depicting female experiences. Collaborative work and performance art - including the famous Cunt Cheerleaders - were program hallmarks. Moving to Los Angeles, the FAP produced the first major feminist art installation, Womanhouse (1972). Augmented by thirty-seven illustrations and color plates, this interdisciplinary collection of essays by artists and scholars, many of whom were eye witnesses to landmark events, relates how feminists produced vibrant bodies of art in Fresno and other locales where similar collaborations flourished. Articles on topics such as African American artists in New York and Los Angeles, San Francisco's Las Mujeres Muralistas and Asian American Women Artists Association, and exhibitions in Taiwan and Italy showcase the artistic trajectories that destabilized traditional theories and practices and reshaped the art world. An engaging editor's introduction explains how feminist art emerged within the powerful women's movement that transformed America. women history month images: *The Religion of Thinness* Michelle Mary Lelwica, 2013-10-18 With so many women approaching their diets, body image, and pursuit of a slender figure with slavish devotion, *The Religion of Thinness* is a timely addition to the discussion of our cultural obsession with weight loss. At the heart of this obsession is the belief that in order to be happy, one must be slim, and the attendant myths, rituals, images, and moral codes can leave some women with severe emotional damage. Idealized images in the media inspire devotees of this "religion" to experience guilt for behaviors that are biologically normal and necessary, and Lelwica offers two ways to combat this dangerous cultural message. Advising readers to look hard at the societal cues that cause them to obsess about their weight, and to remain mindful about their actions and needs, this book will not only help stop the cycle of guilt and shame associated with food, it will help readers to grow and accept their bodies as they are.

women history month images: *Language and Image in the Reading-Writing Classroom* Kristie S. Fleckenstein, Linda T. Calendrillo, Demetrice A. Worley, 2002-02-01 This volume offers concrete answers to the question of how we can use imagery to enrich the teaching of reading and writing. The chapters are organized according to two guiding principles. First, each addresses specific aspects of the inextricable integration of imagery and language in the teaching of reading and writing. Imagery is not privileged over language; the fusion of the two is emphasized. Second, each focuses on a particular kind of imagery--mental, graphic, or verbal--describing teaching/learning strategies based on the deployment of that kind of imagery in the classroom. There is currently a renewed acknowledgment of the importance of imagery in meaning. The rapid spread of the World Wide Web, computer interfacing, and virtual reality further highlights the need to attend to the influence of imagery in a networked world. In response to these shifts in scholarly and cultural perspectives, NCTE has established a committee on visual literacy, and an emphasis on visual literacy has been incorporated into the IRA/NCTE Standards for the English Language Arts. This book contributes significantly toward filling the need for explicit and specific theory-based methods teachers can use to integrate imagery into their pedagogy. Accessible and lively chapters include classroom activities and student-generated examples. *Language and Image in the Reading-Writing Classroom* is an excellent text for preservice and in-service pedagogy courses and an important resource for practicing teachers, researchers, and professionals in the field.

women history month images: *Hidden Buddhas (Large Print 16pt)* Liza Dalby, 2010-06 *Hidden Buddhas* may well be Liza Dalby's best work yet; with its fascinating story of characters caught up in a world they themselves don't understand. Besides taking us on a journey through little-known corners of Japan, it offers us an engaging and believable portrait of people driven to do things they may not have imagined." - Arthur Golden, author of *Memoirs of a Geisha* According to Buddhist theology, the world is suffering through a final corrupt era called mapp. As mapp continues, chaos will increase until the center can no longer hold. Then the world will end. In Japan, many believe that Miroku, Buddha of the Future, will appear and bring about a new age of

enlightenment. From this ancient notion of doom and rebirth comes a startling new novel by the acclaimed author of *Geisha* and *The Tale of Murasaki*. Hundreds of temples in Japan are known to keep mysterious "hidden buddhas" secreted away except on rare designated viewing days. These statues are not hidden because they are powerful - their power lies in their being hidden. Are they being protected, or are they protecting the world? In this novel, one Buddhist priest struggles with the dictates of his inherited orthodoxy, while another rebels. An American graduate student begins to suspect the mysterious purpose of the hidden buddhas, just as he falls in love with a beautiful Japanese artist who is haunted by an aborted child. The weaving of karma that brings these two together results in a tech-savvy half-Western, half-Japanese child who text-messages her way through the profane world to enlightenment. Tracing the lives of its characters through the late twentieth century to the present, from Paris to Kyoto to California, *Hidden Buddhas* turns a cosmopolitan eye on discipline and decadence in religion, fashion, politics, and modern life. Liza Dalby is an anthropologist and writer specializing in Japan. She lives in Berkeley, California.

women history month images: *Women of Color in the Aviation Industry* Shannon McLoughlin Morrison, 2023-08-04 *Women of Color in the Aviation Industry* offers a critical look at the reasons why the aviation industry remains underrepresented with minoritized groups, particularly women of color. Despite the increased efforts to advocate for diversity, equity, and inclusion within the industry, the diversity of its employees remains stagnant. Through interviews and conversations with a number of women of color, this book argues that the industry is not doing enough to create and sustain a more equitable workforce. In this book, readers will discover why less than 4% of qualified, commercial airline pilots are women, and of that, less than 1% are Black women. The numbers of Latinx, Indigenous people, Asian, and other people of color working in the aviation industry are lacking. This book explores how the aviation industry often fails to incorporate the experiences of women of color when developing and implementing diversity, equity, and inclusion initiatives, and offers different perspectives on why it remains challenging to recruit and retain minoritized people to the industry. By bringing in the experiences of a variety of women, this book asks readers to reflect on what it means for an organization to describe itself as one that supports diversity, equity, and inclusion. This timely, important book is a valuable resource for a wide spectrum of researchers and students in aviation as well as gender, race, and ethnic studies. Whilst the examples in this book serve as a case study for aviation, it can be used to examine other fields encountering similar challenges in creating a more equitable workforce.

women history month images: *Vermont Women, Native Americans & African Americans* Cynthia D. Bittinger, 2012-05-15 Vermont's constitution, drafted in 1777, was one of the most enlightened documents of its time, but in contrast, the history of Vermont has largely been told through the stories of influential white men. This book takes a fresh look at Vermont's history,

uncovering hidden stories, from the earliest inhabitants to present-day citizens striving to overcome adversity and be advocates for change. Native Americans struggled to maintain an identity in the state while their land and rights were disappearing. Lucy Terry Prince was the first female African American poet who rose above racism to argue her case before Vermont's governor and won. Educator and historian Cynthia Bitteringer unearths these and other inspirational stories of the contributions of women, Native Americans and African Americans to Vermont's history.

Landis, 2016-03-23 Although a substantial amount of media and professional attention has been devoted to the incidence of sexual abuse in the population at large, the plight of those who have suffered abuse and are seriously mentally ill has largely been ignored. Adding to the existing literature on trauma, this book exposes the prevalence of physical and emotional abuse among severely mentally ill patients, and includes case studies that reveal its tragic and devastating impact. Offering chapters on theory and assessment of abused women, this book explores services that are available to them, discusses treatment (including inpatient and cognitive-behavioral approaches), and addresses recommendations for the improvement of both policy and research.

women history month images: The Politics of Women's Studies Florence Howe, 2000-08-01 The true stories of those bold women who espoused feminism in the world of academia and forever changed our educational system and culture. In the patriarchal halls of 1970s academe, women who spoke their minds risked their careers. Yet intrepid women—students, faculty, administrators, members of the community—persisted in collaborating on women's studies programs. In doing so, they created a movement that altered paradigms, curricula, teaching styles, and content across disciplines. In these original essays "we hear the voices of feminists exhilarated by the opportunities and challenges of creating women's studies programs in American colleges and universities, nurtured by the women's movement of the 1970s," from young graduate students and newly hired faculty to tenured professors in search of ways to improve their students' capacities to learn, veteran academics at last witnessing change, and even a few administrators (Library Journal). In all of these programs, these "founding mothers" grappled not only with issues of gender, but with those of class, race, and sexuality in a decade infused with political unrest and questioning, when civil rights and anti-war activism, as well as feminism, shaped academic worlds.

while growing up in the 40s and 50s when women were allowed to be one of four things: wife/mother, teacher, nurse, or secretary. She educated herself as her children were growing up. Through her own experiences and her observation of the treatment of other women, she raised her own consciousness as consciousness-raising missed Louisiana. She began writing and advocating publicly for women, children, and public education in the 70s. Seeking a wider audience so she could encourage more people to work for equity, she decided to publish this collection of perceptions, ideas, and concerns about women's and their families' everyday lives. She has taught communication on the university level and art in kindergarten through 12th grade. In addition, she administered the regional office of a federal job-retraining program for the Louisiana Department of Education before turning to full-time writing. De Hon now lives in Texas with her husband, a fat tabby cat, and a houseful of plants.
