women in ancient history: *Women's History and Ancient History* Sarah B. Pomeroy, 2014-03-01 This collection of essays explores the lives and roles of women in antiquity. A recurring theme is the relationship between private and public, and many of the essays find that women's public roles develop as a result of their private lives, specifically their family relationships. Essays on Hellenistic queens and Spartan and Roman women document how women exerted political power — usually, but not always, through their relationship to male leaders — and show how political upheaval created opportunities for them to exercise powers previously reserved for men. Essays on the writings of Sappho and Nossis focus on the interaction between women's public and private discourses. The collection also includes discussion of Athenian and Roman marriage and the intrusion of the state into the sexual lives of Greek, Roman, and Jewish women as well as an investigation of scientific opinion about female physiology. The contributors are Sarah B. Pomeroy, Jane McIntosh Snyder, Marilyn M. Skinner, Cynthia B. Patterson, Ann Ellis Hanson, Lesley Dean-Jones, Natalie Boymel Kampen, Mary Taliaferro Boatwright, and Shaye J.D. Cohen.

women in ancient history: *Writing Women's History Since the Renaissance* Mary Spongberg, 2017-03-08 The complaint of Catherine Morland in Jane Austen's *Northanger Abbey*, that history has 'hardly any women at all' is not an uncommon one. Yet there is evidence to suggest that women have engaged in historical writing since ancient times. This study traces the history of

women's historical writing, reclaiming the lives of individual women historians, recovering women's historical writings from the past and focusing on how gender has shaped the genre of history. Mary Spongberg brings together for the first time an extensive survey of the progress of women's historical writing from the Renaissance to the present, demonstrating the continuities between women's historical writings in the past and the development of a distinctly woman-centred historiography. *Writing Women's History since the Renaissance* also examines the relationship between women's history and the development of feminist consciousness, suggesting that the study of history has alerted women to their unequal status and enabled them to use history to achieve women's rights. Whether feminist or anti-feminist, women who have had their historical writings published have served as role models for women seeking a voice in the public sphere and have been instrumental in encouraging the growth of a feminist discourse.

Caine, 2016-04-30 This A-Z reference work provides the first comprehensive reference guide to the wide range of historical writing with which women have been involved, particularly since the Renaissance. The Companion covers biographical writing, travelogue and historical fictions, broadening the concept of history to include the forms of writing with which women have historically engaged. The focus is on women writing in English internationally, but historical and historiographical traditions from beyond the English-speaking world are also examined. Brief biographies of individual writers are included.

Its chronological and geographical scope ranges from late third century BCE China, to mid first century BCE Egypt, to Pictish and Viking Europe, to Medieval Germany, to twentieth century Taiwan, and into the contemporary world, but it also ventures beyond our universe and into the fantasy realm of Hyrule and the science fiction solar system of the Nebula.
