women in leadership symposium: *Women in Sports* Maylon Hanold, 2018-03-22 Providing key data, insights, and ways of thinking about women and sports, this book is an excellent resource for high school and undergraduate students as well as for sport organizations serving girls and women. Women are participating in sports in record numbers, and thanks in part to Title IX and a growing interest in women's sports, they're breaking records and achieving remarkable success in sports in every conceivable manner. However, women still struggle for equitable treatment in a variety of sports and face different obstacles than do their male counterparts. How can these issues be solved? Are women in sports being treated fairly? This book provides a comprehensive yet accessible overview of the state of women's participation in sports by referencing both current events and research. Additionally, it offers a breadth of information pertaining to work in sports made available to girls and women. Key aspects include a detailed history of women in sports since 1900 as well as a discussion of current issues surrounding their participation in high school and college athletics, recreational sports, physical activity, and leadership in sports organizations. In particular, the material not only recounts history and analyzes issues but also presents perspectives as to how and why sports continue to be simultaneously a means of empowerment and a conduit for the marginalization of girls and women.

women in leadership symposium: *Communicative Understandings of Women's Leadership Development* Elesha L. Ruminski, Annette Holba, 2012-01-01 *Communicative Understandings of Women's Leadership Development: From Ceilings of Glass to Labyrinth Paths*, edited by Elesha L. Ruminski and Annette M. Holba, intertwines the disciplines of communication studies, leadership studies, and women's studies to offer theoretical and practical reflection about women's leadership development in academic, organizational, and political contexts. Women's leadership development exists at the intersection of consciousness-raising, communication competence, and education to increase one's knowledge and practice of leadership, which makes the weaving together of these three disciplines important. Thus, *Communicative Understandings of Women's Leadership Development* claims a space for women's leadership studies and acknowledges the paradigmatic shift from discussing women's leadership using the glass ceiling phenomenon to what Eagly and Carli (2007) identify as the labyrinth of leadership. Recognizing this metaphoric shift is crucial because many women now develop leadership amid the postmodern flux of organizational change; hierarchical, top-down systems are being eroded in lieu of transformational, collaborative, even improvisational leadership processes. Women's leadership studies is emerging as a fruitful interdisciplinary area that reframes the debate about whether we live, work, and learn within a third-wave feminist or post-feminist context. While this area might include feminist theorizing, it also might not emphasize such epistemologies. For this reason, Ruminski and Holba's edited collection explores and highlights a variety of feminist and non-feminist intersections, and is thus an important and timely contribution to both marking where we are with women's leadership development in higher education and how women can further develop themselves as leaders.

women in leadership symposium: *Feminism, Republicanism, Egalitarianism, Environmentalism* Yulia Maleta, 2019-08-23 This book addresses hegemonic ruling class masculinity and emphasized femininity within renewables organisational governance, and critiques Anglo-Celtic male privilege, as a barrier to women's leadership participation. Primarily using the Australian socio-political context, the author considers the patriarchal control of organisations and renewables governance, and argues that women-led emphasized femininity-resistance strategies can challenge the hegemonic status of ruling elites to create a leadership that is less power oriented, more collaborative and open to change. Utilising detailed interviews with Australian women environmentalists, together with feminist, sociological and social movement theory, whilst considering the historic context of Red Vienna and contemporary political challenges (Brexit, Monarchism etc.), it puts forward an innovative policy framework for an Australian Bill of Rights Act and republican constitutional change. Written for academics, activists and policymakers alike, this

book offers a unique insight into women's inequity within patriarchal institutionalist governance. It will be engaging and inspiring reading for feminist and environmentalist activists and practitioners, in addition to professional associations focussing on gender, justice and environmental change. Academics and postgraduates in Gender Studies, Ecofeminism, Sociology and Organisational Studies will also find the book of key interest in its interdisciplinary discussions of Sustainable Scientific-Technological Development Initiatives (SSTDI) and feminism in an Australian political context.

women in leadership symposium: Round Two United States. Congress. Senate. Committee on Homeland Security and Governmental Affairs. Subcommittee on Federal Financial Management, Government Information, and International Security, 2007

women in leadership symposium: Women in Academic Leadership Susan J. Bracken, Jeanie K. Allen, Diane R. Dean, 2023-07-03 Colleges and universities benefit from diversity in their leadership roles and profess to value diversity--of thought, of experience, of person. Yet why do women remain under-represented in top academic leadership positions and in key positions along the academic career ladder? Why don't they advance at a rate proportional to that of their male peers? How do internal and external environmental contexts still influence who enters academic leadership and who survives and thrives in those roles? *Women in Academic Leadership* complements its companion volumes in the *Women in Academe* series, provoking readers to think critically about the gendered nature of academic leadership across the spectrum of institutional types. It argues that leadership, the academy, and the nexus of academic leadership, remain gendered structures steeped in male-oriented norms and mores. Blending research and reflection, it explores the barriers and dilemmas that these structures present and the professional strategies and the personal choices women make in order to successfully surmount them. The authors pose questions about how women leaders negotiate between their public and private selves. They consider how women develop a vital sense of self-efficacy along with the essential skills and knowledge they need in order to lead effectively; how they cultivate opportunity; and how they gain legitimacy and maintain authenticity in a male-gendered arena. For those who seek to create an institutional environment conducive to equity and opportunity, this book offers insight into the pervasive barriers facing women of all colors and evidence of the need for a more complex, multi-dimensional view of leadership. For women in academe who seek to reach their professional potential and maintain authenticity, it offers encouragement and a myriad of strategies for their growth and development.

women in leadership symposium: Girl at Sea Joanna Sprtel Walters, 2015-09-22 A Naval officer's memoir about finding one's voice. Women have bravely served in the U.S. Navy for nearly a century, but they have only been allowed to serve in combat roles for the last twenty-five years. When the combat exclusion law was lifted in 1993, women in the Navy soon had a new range of opportunities available to them. The repeal of the law finally gave women the chance to serve on combatant ships for the first time. Among the first women to step onto these warships as a new crewmember was Joanna Sprtel Walters. In her memoir *Girl at Sea*, she shares her story beginning with training at the US Naval Academy through her service in the fleet aboard combatant warships. As a member of the class of 1994, she was among the first group of women out of the Academy to have selected warfare specialties. This real-life account sheds light on a ground-breaking time in our country's history as gender barriers continue to be torn down within all divisions of our Armed Forces. Walters's story will resonate with anyone who has ever had to bump their head against a glass ceiling and then fight their way through it. Her story covers difficult topics such as a sexual assault and extortion case at the end of her time at the Academy; struggling to prove herself on a ship where men felt women were invading their spaces; earning the hard-fought respect of her first division; recovering from the career suicide of engaging in a forbidden relationship; fighting to stay in the Navy and then thriving in the most difficult of environments; and her eventual blossoming into a strong Division Officer with an MBA under her belt. Through her successes and failures, Walter's hopes to inspire others to reach beyond what they thought they were capable of and find their own

inner strength. Skyhorse Publishing, along with our Arcade, Good Books, Sports Publishing, and Yucca imprints, is proud to publish a broad range of biographies, autobiographies, and memoirs. Our list includes biographies on well-known historical figures like Benjamin Franklin, Nelson Mandela, and Alexander Graham Bell, as well as villains from history, such as Heinrich Himmler, John Wayne Gacy, and O. J. Simpson. We have also published survivor stories of World War II, memoirs about overcoming adversity, first-hand tales of adventure, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

women in leadership symposium: *Bulletproof Diva* Lisa Jones, 2010-12-22 In *Bulletproof Diva*, Lisa Jones brings the wit and candor of her infamous Village Voice column, *Skin Trade*, to a much larger audience. Chock full of the fierce black girl humor that has made her column so popular, this provocative collection of essays and observations on race, sex, identity, and the politics of style speaks to a young generation of blacks who were raised in an integrated society and are now waiting for America to deliver on its promises of equality. The thirty-seven short pieces and six long essays in *Bulletproof Diva* cover a wide range of topics, many of them extremely controversial. Jones moves smoothly from issues of ethnicity in a changing America, challenging viewpoints on African-American and mixed race identity, to butt theory and the roller-coaster politics of black hair. Written in a style that is as appealing as it is unapologetic, *Bulletproof Diva* marks the debut of a genuinely gifted young writer with a distinctive voice and a fresh perspective on the black cultural scene.

women in leadership symposium: *Governance in Sport* Bonnie Tiell, 2025-06-17 At its core, sport governance encompasses two key elements: power and decision making. To truly grasp a sport organization’s purpose and structure, it’s essential to understand who wields power and which decisions are made by those who possess it. Regrettably, the abuse of power, coupled with ineffective governance and lackluster leadership, has fostered widespread corruption within sport organizations, a situation that calls for a renewed commitment to practicing principles of good governance and restoring integrity and ethical conduct. In response, the updated and enhanced *Governance in Sport: Analysis and Application, Second Edition*, aims to equip students with the skills to navigate both ordinary and extraordinary situations encountered in the oversight and authority of sport organizations at all levels of sport. *Governance in Sport* examines sport governance from three broad analytical and applied perspectives: A legal and managerial overview of practices, processes, and policies in sport organizations, encompassing ethical behavior, effective leadership, decision making, and policy development A framework of the structures and functions of regulatory agencies that govern state, national, regional, and international sports An applied overview of governance and authority in selected sectors of the industry, including professional sports, amateur sports, sports media, sports betting, esports, and more Through examinations of contemporary hot-button issues and compelling new case studies—covering the Ukraine invasion; Brittney Griner; transgender athletes in sports; LIV Golf versus the PGA; conference realignment; name, image, and likeness (NIL) issues; the Kanjuruhan Stadium catastrophe; and the workplace misconduct in the Washington Commanders organization—students will see how governance differs in sport organizations at various levels in the United States and around the world. Additional new features include the

following: Headlines begin each chapter, calling out incidents of corruption within the sport industry. Rules and Regulations Corners provide quick overviews of policies and laws affecting weighty issues. Combating Corruption sections offer best practices for preventing and minimizing behavior deemed illegal, unethical, or counterintuitive. Governance in Action case sidebars explore real-world examples of conflicts and conundrums related to the chapter topic and include discussion questions; suggested responses to the questions can be found in the instructor guide. Recorded lectures by author Bonnie Tiell are available for each chapter of the book. Instructors can use these videos to enhance their lectures. With *Governance in Sport*, students will develop an understanding of where power resides, how decisions are made, and the impact of those factors on the goals and structures of sport organizations.

women in leadership symposium: The Routledge Companion to Indian Ethics

Purushottama Bilimoria, Amy Rayner, 2024-01-22 This companion volume focuses on the application and practical ramifications of Indian ethics. Here Indian dharma ethics is moved from its preeminent religious origins and classical metaethical proclivity to, what Kant would call, practical reason – or in Aristotle’s poignant terms, *ēhikos* and *phronēis* –and in more modern parlance normative ethics. Our study examines a wide range of social and normative challenges facing people in such diverse areas as women’s rights, infant ethics, politics, law, justice, bioethics and ecology. As a contemporary volume, it builds linkages between existing theories and emerging moral issues, problems and questions in today’s India in the global arena. The volume brings together contributions from some 40 philosophers and contemporary thinkers on practical ethics, exploring both the scope and boundaries or limits of ethics as applied to everyday and real-life concerns and socio-economic challenges facing India in the context of a troubled globalizing world. As such, this collection draws on multiple forms of writing and research, including narrative ethics, interviews, critical case studies and textual analyses. The book will be of interest to scholars, researchers and students of Indian philosophy, Indian ethics, women and infant issues, social justice, environmental ethics, bioethics, animal ethics and cross-cultural responses to dominant Western moral thought. It will also be useful to researchers working on the intersection of Gandhi, sustainability, ecology, theology, feminism, comparative philosophy and dharma studies.
