# Strategies for Solving the Wordle Puzzle

Successful Wordle players employ several strategies when attempting to guess the daily wordle answer july 31 or any other day. These methods involve optimizing guesses to maximize information gained with each attempt. ## Starting with Common Vowels and Consonants

One effective approach is to begin with words containing frequently used vowels and consonants. This helps identify or eliminate crucial letters early on. Words like “ARISE,” “STALE,” or “CRANE” are popular starting choices because they cover a broad range of common letters.

## Using Feedback to Narrow Down Options

Interpreting the color-coded feedback after each guess is critical. Green tiles confirm correct letters and positions, while yellow tiles indicate the presence of letters in other positions. Players should adjust subsequent guesses to reflect this information, progressively honing in on the correct word. For example, if the letter “U” is highlighted in yellow in the first guess, the next guess should include “U” in different positions.

## Eliminating Improbable Letters

Gray tiles signal letters not present in the word, allowing players to remove those letters from their consideration. Maintaining a mental or written list of excluded letters streamlines the guessing process and prevents wasting attempts on invalid choices.
