wordpress development agency london: The Making of a World City Greg Clark, 2014-12-31 After two decades of evolution and transformation, London had become one of the most open and cosmopolitan cities in the world. The success of the 2012 Olympics set a high water-mark in the visible success of the city, while its influence and soft power increased in the global systems of trade, capital, culture, knowledge, and communications. *The Making of a World City: London 1991 - 2021* sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play: London's openness and self-confidence, its inventiveness, influence, and its entrepreneurial zeal. London's organic, unplanned, incremental character, without a ruling design code or guiding master plan, proves to be more flexible than any planned city can be. Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re-urbanisation of the developed world. If we can explain London's successes and her remaining challenges, we can unlock a better understanding of how cities succeed.

wordpress development agency london: Creative Hubs in Question Rosalind Gill, Andy C. Pratt, Tarek E. Virani, 2019-03-23 Creative hubs have become a cornerstone of economic and cultural policy with only the barest amount of discussion or scrutiny. This volume offers the first interrogation of creative hubs, with ground-breaking critical writing from a combination of established scholars and new voices. Looking across multiple sites trans-nationally, and combining theoretical and empirical reflections, it asks: what are creative hubs, why do they matter, and are they making the world a better place? *Creative Hubs in Question* discusses creative hubs in relation to debates about creative cities, co-working spaces and workers' co-operatives. Featuring case studies from Argentina to the Netherlands, and Nigeria to the UK, the contributions address how hubs are situated in relation to projects of equality and social justice, and whether and in what ways they change the experiences of the creatives who work in them. Drawing on a range of disciplinary perspectives including sociology, geography, economics, media and communications, culture and creative industries, critical policy studies, gender studies, race and ethnicity, and urban studies, this collection will be of interest to policy makers, academics, scholars, students and practitioners across these fields.

wordpress development agency london: The Organization of Things Martin Parker, 2024-11-14 This is a book about knowledge and how it is organized. The business school has captured ideas about organization, and reduced them to questions of formal structures, documented processes, logistics and operations. This book shows how the concept can be understood more generously by illuminating the fundamental importance of culture to our understanding of organization. Using the idea of a cabinet of curiosities, the author shows how we can learn a lot about authority from choirs of angels, about secrecy from shipping containers, or work from art galleries. In disorganizing categories, forcing unusual conjunctions, the work opens itself to

organization studies and studies of organizing, as well as cultural sociology, human geography, and social theory. Bringing together arguments developed over the last two decades, this book brings together and updates work that will provide a unique and valuable reference for students and scholars of management and organization around the world.

This 22nd edition continues with its more recent successful structure, reviewing the core principles, techniques, competencies and skills required of an EHP, and then outlining the specialist subjects without getting bogged down in a legalistic approach, seeking to broaden the content for a more global audience. This new edition seeks to educate the EHP on the public health impacts of global heating and the climate emergency and also reflects the COVID-19 pandemic, as might be expected. Although seeking to have global appeal, the impact of the UK leaving the EU is also addressed. The book examines environmental health in different settings, including in the military, working in both conflict and natural disaster settings, and environmental health at sea and airports. In line with previous editions, case studies are used to illustrate how EH problems have been resolved. This new edition includes guidance on key issues in public and environmental health including air pollution, contaminated land, housing and health, noise, water, food safety, pests and vector control, chemicals in the environment and radiation, as well as sustainability and public health and humanitarian crises. wordpress development agency london: Teacher Agency Mark Priestley, Gert Biesta, Sarah Robinson, 2015-10-22 Recent worldwide education policy has reinvented teachers as agents of change and professional developers of the school curriculum. Academic literature has analyzed changes in how teacher professionalism is conceived in policy and in practice but Teacher Agency provides a fresh perspective on this issue, drawing upon an ecological theory of agency. Using this model for understanding agency, Mark Priestley, Gert Biesta and Sarah Robinson explore empirical findings from the 'Teacher Agency and Curriculum Change' project, funded by the UK-based Economic and Social Research Council (ESRC). Drawing together this research with the authors' international experiences and perspectives, Teacher Agency addresses theoretical and practical issues of international significance. The authors illustrate how teacher agency should be understood not only in terms of individual capacity of teachers, but also in respect of the cultures and structures of schooling.

wordpress development agency london: The Methuen Drama Handbook of Gender and Theatre Sean Metzger, Roberta Mock, 2023-12-28 Shortlisted for the 2024 TaPRA Edited Collection Prize This is a guide to contemporary debates and theatre practices at a time when gender paradigms are both in flux and at the centre of explosive political battlegrounds. The confluence of gender and theatre has long created intense debate about representation, identification, social conditioning, desire, embodiment, and lived experience. As this handbook demonstrates, from the conventions of early modern English, Chinese, Japanese and Hispanic theatres to the subversion of racialized binaries of masculinity and femininity in recent North American, African, Asian, Caribbean and European productions, the matter of gender has consistently taken centre stage. This handbook examines how critical discourses on gender intersect with key debates in the field of theatre studies, as a lens to illuminate the practices of gender and theatre as well as the societies they inform and represent across space and time. Of interest to scholars in the interrelated areas of feminist, gender and sexuality studies, theatre and performance studies, cultural studies, and globalization and diasporic studies, this book demonstrates how researchers are currently addressing theatre about gender issues and gendered theatre practices. While synthesizing and summarizing foundational and evolving debates from a contemporary perspective, this collection offers interpretations and analyses that do not simply look back at existing scholarship, but open up new possibilities and understandings. Featuring essential research tools, including a survey of keywords and an annotated play list, this is an indispensable scholarly handbook for anyone working in theatre and performance.

wordpress development agency london: *Maternal Performance* Lena Šimić, Emily Underwood-Lee, 2021-11-27 *Maternal Performance: Feminist Relations* bridges the fields of performance, feminism, maternal studies, and ethics. It loosely follows the life course with chapters on maternal loss, pregnancy, birth, aftermath, maintenance, generations, and futures. Performance and the maternal have an affinity as both are lived through the body of the mother/artist, are played out in real time, and are concerned with creating ethical relationships with an other – be that other the child, the theatrical audience, or our wider communities. The authors contend that maternal performance takes the largely hidden, private and domestic work of mothering and makes it worthy of consideration and contemplation within the public sphere.

wordpress development agency london: *The Armed Forces: Instrument of Peace, Strength, Development and Prosperity* Joseph Babatunde Fagoyinbo, 2013-05-28 Across the ages, technological developments have been accelerated by the military. This results from the fact that able-bodied vibrant youths are generally involved and are also exposed to high-tech training prevailing at their times for assignments (defence and security) that are essential but not desired. They form the Armed Forces for the nations. Such brilliant military officers like Caesar and Napoleon made their marks; and, in contemporary times, the Armed Forces of United States, France, Britain, Australia, etc are making remarkable contributions to technological developments. Such infrastructure as the Internet, the GPS and the cell phones are products that have significant military contributions. This book scans across the major regions of the world, highlights the efforts of representative countries in the regions and observes that nations that have harnessed the efforts of their Armed Forces have progressively developed. It is also observed that developments in

America and Europe, though not entirely dependent on their Armed Forces, have been greatly affected by their efforts. In Asia, such countries as the People's Republic of China, Brazil, India, Pakistan and Singapore utilise the human and material resources within the Armed Forces for national growth and cohesion. Development effort is least in the African Region, except South Africa and Egypt; notwithstanding the high potentials as exhibited by Nigeria's Armed Forces. Although attempts to industrialise through the Armed Forces may be able to create economic development for developing nations, such factors as historical background, economic resources, political climate, government policies and infrastructure are equally important. Economic development programme of an aspiring country should: i. promote education and access to knowledge ii. aspire to economic self-sufficiency in economic power iii. allow and promote private sector and foreign participation in defence production, research and development iv. commit itself to the establishment and support of defence industries v. indigenise defence programmes, establish a balance between military and economic development and vi. mobilise the nation's economy through technology partnership with the private sector and foreign investors.

wordpress development agency london: *Women in Performance* Sarah Gorman, 2020-07-22 *Women in Performance: Repurposing Failure* charts the renewed popularity of intersectional feminism, gender, race and identity politics in contemporary Western experimental theatre, comedy and performance through the featured artists' ability to strategically repurpose failure. Failure has provided a popular frame through which to theorise recent avantgarde performance, even though the work rarely acknowledges stakes tend to be higher for women than men. This book analyses the imperative work of a number of female, non-binary and trans* practitioners who resist the postmodern doctrine of 'post-identity' and attempt to foster a sense of agency on stage. By using feminism as a critical lens, Gorman interrogates received ideas about performance failure and negotiates contradictions between contemporary white feminism, intersectional feminism, gender and sexuality. *Women in Performance: Repurposing Failure* reveals how performance has the power to both observe and reject contemporary feminist and postmodern theory, rendering this text an invaluable resource for theatre and performance studies students and those grappling with the disciplinary tensions between feminism, gender, queer and trans* studies.
